Tableau TDA-C01 certification exam consists of multiple-choice questions and is designed to test a candidate's knowledge and skills in using Tableau to analyze and visualize data. TDA-C01 exam covers different areas of Tableau, including data connection and preparation, visualization, analysis, and dashboard creation. Candidates will have two hours to complete the exam, and they must score at least 75% to pass. Successful candidates will receive a Tableau TDA-C01 certification, which is valid for two years and can be renewed by passing a recertification exam.

Tableau TDA-C01 Certification Exam covers a wide range of topics, including data preparation, data analysis, data visualization, and dashboard creation. Candidates are expected to have a good understanding of data analysis concepts, data visualization best practices, and the Tableau platform. TDA-C01 exam also tests the ability of candidates to analyze different types of data and create effective visualizations to communicate insights.

NEW QUESTION # 171

You have the following dataset

You need to create the following visualization.

Which quick table calculation should you drag to Text on the Marks card?

- A. Percentile
- **B. Percent of Total**
- C. Compound Growth Rate
- D. Percent Difference

Answer: B

Explanation:

we need to create a quick table calculation that shows the percent of total sales for each category and sub-category. To do this, we can follow these steps:

Drag Category to Columns and Sub-Category to Rows.

Drag Sales to Text on the Marks card.

Right-click Sales on the Marks card and select Quick Table Calculation > Percent of Total.

Right-click Sales on the Marks card again and select Compute Using > Category.

This will create a quick table calculation that shows the percent of total sales for each sub-category within each category. The visualization will look like this:

NEW QUESTION # 172

You have two data sources that use the same schema. One data source contains order data from 2019 and the other data source contains order data from 2020.

You have a worksheet that shows the orders from 2019.

You need to configure the worksheet to show the orders from 2020 without reloading the data.

Which option should you select?

Answer:

Explanation:

NEW QUESTION # 173

Open the link to Book1 found on the desktop. Open the sales dashboard.

Add the Sales by State sheet in a Show/Hide button to the right side of the dashboard.

Answer:

Explanation:

check the steps below in explanation.

Explanation:

To add the Sales by State sheet in a Show/Hide button to the right side of the dashboard, you need to do the following steps:

Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the sales dashboard.

Click on the sales dashboard tab at the bottom of the workbook to open the dashboard. You will see a dashboard that shows various charts and filters related to sales data.

Drag Sales by State from the Sheets pane to the right side of the dashboard. This will add the sheet as a floating element on the dashboard. You can resize and position it as you like.

Right-click on Sales by State and select Add Show/Hide Button from the menu. This will add a button that allows you to show or hide the sheet on the dashboard. You can customize the appearance and behavior of the button by clicking on it and using the options on the Marks card.

Optionally, you can drag a vertical layout container from the Objects pane to the right side of the dashboard and place Sales by State and its button inside it. This will help you organize your dashboard elements and align them neatly.
