QSSA2022 Exam covers topics such as installation, configuration, security, and troubleshooting.

Qlik Sense System Administrator Certification Exam - 2022 Sample Questions (Q49-Q54):

NEW QUESTION # 49

A domain user had access and was able to successfully log into the hub the day before. You use the same user and domain credentials to sign in to today's hub and receive this error message: "Your account is inactive. Contact your administrator to activate it". The user is able to successfully authenticate to the Windows domain network, proxy and internet browsing. The user has not changed the password recently. What should the system administrator investigate to determine the cause of the problem and resolve?

- A. View Windows operating system events (Event Viewer)
- B. Proxy log files on the Qlik Sense server
- C. User properties in QMC
- D. Security rules that may interfere with user authentication

Answer: C

NEW QUESTION # 50

A system administrator needs to complete the configuration of a Qlik Sense Enterprise environment. The customer solution that needs to access Qlik Sense resources is a JavaScript app which must be authenticated through single sign-on. The customer provides a public key to the system administrator. Qlik Sense is expecting an RSA signature with SHA256. Which authentication method should the system administrator use?

- A. Header
- B. SAML
- C. JWT
- D. Ticket

Answer: B

NEW QUESTION # 51

IT conducts an audit at Qlik Sense installation. The environment has been configured within the defaults options and all RIM nodes have all possible services running.

The auditing process consists of making sure that all traffic is encrypted with 256-bit keys and that passwords follow basic security standards with the use of letters, numbers, and minimum number of characters.

What would be missing to deploy to make the Qlik Sense environment within the requirements?

- A. A third-party certificate and VPN
- B. A firewall web application
- C. A third-party trust certificate installed
- D. A reverse proxy

Answer: D

NEW QUESTION # 52

A system administrator installs Qlik Sense Enterprise and is testing the product with a small team of 10 users.

The users report that the page is NOT trusted on their machines and they receive a certificate warning message. When the system administrator tries to validate this feedback on the server, the administrator does NOT see the same issue.

The system administrator completes the following steps in the proxy configuration:

- Opens all necessary ports
- Checks in MMC that there is a personal certificate on the server
- Creates a DNS entry for an easier URL

- Tries to connect with various Internet browsers on different machines including mobile devices
- Adds the page to trusted sites in the Internet configurations
- Installs OpenSSL in the environment

Which steps should the system administrator take to resolve this issue?

- A. 1. Acquire a third-party certificate from a trusted root certificate authority (CA) 2. Add the certificate to the personal local computer certificate store 3. Add the thumbprint of the third-party certificate to the proxy configuration in the QMC
- B. 1. Generate a valid certificate for organizational needs using OpenSSL 2. Add the certificate to the personal certificate store of the Qlik Sense Service User 3. Add the thumbprint of the third-party certificate to the proxy configuration in the QMC
- **C. 1. Acquire a third-party certificate from a trusted root certificate authority (CA) 2. Add the certificate to the personal certificate store of the Qlik Sense Service User 3. Add the thumbprint of the third-party certificate to the proxy configuration in the QMC**
- D. 1. Acquire a third-party certificate from a trusted root certificate authority (CA) including private key 2. Add the certificate to the personal local computer certificate store 3. Add the thumbprint of the third-party certificate to the proxy configuration in the QMC

Answer: C

NEW QUESTION # 53

A system administrator should ensure that only members of the Active Directory "Developers" group have access to their personal workflows and are able to build applications in Qlik Sense.

The administrator then creates the rule, but other users can still see their personal workflows and are able to create applications.

What's the cause of the problem?

- A. Security rules do not affect work stream
- B. Security rules are corrupted
- C. The functionality of creating applications is disabled for the "Developers" group
- **D. The default security rule for creating applications is enabled**

Answer: D

NEW QUESTION # 54
