

Latest 2V0-11.25 Exam Materials | Positive 2V0-11.25 Feedback

P.S. Free 2026 VMware 2V0-11.25 dumps are available on Google Drive shared by PrepAwayTest:
https://drive.google.com/open?id=13OAu2EAIfFvEnBYnbjsnr9dmY_NV4u2O

The profession of our experts is expressed in our 2V0-11.25 training prep thoroughly. They are great help to catch on the real knowledge of 2V0-11.25 exam and give you an unforgettable experience. Do not miss this little benefit we offer for we give some discounts on our 2V0-11.25 Exam Questions from time to time though the price of our 2V0-11.25 study guide is already favourable. And every detail of our 2V0-11.25 learning braindumps is perfect!

VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.
Topic 2	<ul style="list-style-type: none">Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.

Topic 3	<ul style="list-style-type: none"> • Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network • storage design.
Topic 4	<ul style="list-style-type: none"> • VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.
Topic 5	<ul style="list-style-type: none"> • Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.

Pass Guaranteed Quiz 2026 VMware 2V0-11.25: VMware Cloud Foundation 5.2 Administrator – Valid Latest Exam Materials

How can you pass your exam and get your certificate in a short time? Our 2V0-11.25 exam torrent will be your best choice to help you achieve your aim. According to customers' needs, our product was revised by a lot of experts; the most functions of our 2V0-11.25 exam dumps are to help customers save more time, and make customers relaxed. If you choose to use our 2V0-11.25 Test Quiz, you will find it is very easy for you to pass your 2V0-11.25 exam in a short time. You just need to spend 20-30 hours on studying with our 2V0-11.25 exam questions; you will have more free time to do other things.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q130-Q135):

NEW QUESTION # 130

Which prerequisite task must be completed before deploying VMware Cloud Foundation (VCF) using VMware Cloud Builder?

- A. Ensure HCX is configured for workload migration.
- **B. Verify network configurations and DNS settings for all components.**
- C. Ensure that all ESXi hosts are connected to a single vCenter Server.
- D. Verify configurations on Virtual Distributed Switch on the ESXi hosts that will be used for the deployment.

Answer: B

Explanation:

Before using Cloud Builder, you must validate network connectivity and DNS name resolution for all management components to ensure the deployment can register and communicate correctly.

NEW QUESTION # 131

An administrator needs to scale an NSX Edge cluster by adding additional Edge nodes.

Which three steps must be taken before scaling an Edge cluster from SDDC Manager? (Choose three.)

- **A. Assign a unique management IP for each Edge node.**
- **B. Assign two Tunnel Endpoint (TEP) addresses for each Edge node.**
- **C. Verify DNS records have been added for each new Edge node.**
- D. Add an additional NSX VDS uplink for each Edge node being added.

- E. Place the Edge cluster in maintenance mode prior to expanding.

Answer: A,B,C

Explanation:

When scaling an NSX Edge cluster in VMware Cloud Foundation using SDDC Manager, the following preparatory steps are explicitly required as per the official documentation:

Assign a unique management IP for each Edge node (A): Each new Edge node must have its own unique management IP address for proper identification and network communication.

Assign two Tunnel Endpoint (TEP) addresses for each Edge node (B): Two TEP addresses are needed for overlay network connectivity to ensure redundancy and optimal traffic flow.

Verify DNS records have been added for each new Edge node (D): Proper DNS records must exist for management and operational connectivity, as DNS resolution is critical for Edge node communication and cluster integration. Adding uplinks or placing the Edge cluster in maintenance mode are not prerequisites for adding new Edge nodes, according to the preparation requirements detailed in VMware documentation.

NEW QUESTION # 132

How do virtual machine (VM) storage policies in a VMware vSphere environment contribute to optimizing resource utilization, ensuring data availability, and meeting application-specific requirements?

- A. By guaranteeing storage IOPs for a particular virtual machine
- B. By regulating and optimizing storage traffic between virtual machines
- C. By streamlining the process of automating virtual machine backups
- D. By defining and enforcing storage requirements, such as performance, availability, and redundancy

Answer: D

Explanation:

VM storage policies let you specify requirements like performance tiers, redundancy levels, and availability SLA, and vSphere enforces these rules against underlying storage capability profiles to optimize resource usage and meet application needs.

NEW QUESTION # 133

An administrator is troubleshooting a high CPU usage issue in a VMware Cloud Foundation environment running IaaS Control Plane. Several namespaces are reporting degraded performance.

What two steps should the administrator take to diagnose and potentially resolve the issue? (Choose two.)

- A. Reboot the supervisor cluster to clear any temporary issues.
- B. Upgrade the vSphere version to the latest release.
- C. Review the CPU usage of the ESXi hosts to identify any that are overcommitted.
- D. Reconfigure the DRS settings to be more aggressive in load balancing.
- E. Check the resource limits and reservations set on the Kubernetes namespaces.

Answer: C,E

Explanation:

The administrator should review the CPU usage of the ESXi hosts to identify if any hosts are overcommitted.

Overcommitted hosts can lead to performance degradation across workloads.

Checking the resource limits and reservations on Kubernetes namespaces is crucial. If the resource limits are too low or improperly configured, it could cause degraded performance for workloads running in those namespaces.

NEW QUESTION # 134

When setting up a new port group on a Virtual Distributed Switch (VDS), what role does configuring a VLAN ID play in network management and traffic isolation?

- A. To improve the performance of virtual machines by distributing network traffic across multiple uplinks
- B. To logically segment network traffic by assigning the port group to a specific VLAN, ensuring that traffic is isolated
- C. To enable the automatic assignment of IP addresses to virtual machines in the port group
- D. To configure storage replication settings for virtual machines connected to the port group

Answer: B

Explanation:

Assigning a VLAN ID to a VDS port group ensures that all traffic on that port group is tagged for and confined to the specified VLAN, providing logical segmentation and isolation of network traffic.

NEW QUESTION # 135
