Official 1Z0-1163-1 Practice Test | 1Z0-1163-1 Free Practice Exams

After so many years' development, our Oracle Certified Associate exam torrent is absolutely the most excellent than other competitors, the content of it is more complete, the language of it is more simply. Believing in our 1Z0-1163-1 guide tests will help you get the certificate and embrace a bright future. Time and tide wait for no man. Come to buy our test engine. TestValid have most professional team to compiled and revise 1Z0-1163-1 Exam Question. In order to try our best to help you pass the exam and get a better condition of your life and your work, our team worked day and night to complete it. Moreover, only need to spend 20-30 is it enough for you to grasp whole content of our practice materials that you can pass the exam easily, this is simply unimaginable.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1

Sample Questions (Q10-Q15):

NEW QUESTION # 10

Which two capabilities within the Predict Demand process in the Demand to Management OMBP make it a powerful tool for demand planning and management?

- A. Demand Sensing.
- **B. Machine Learning-based Forecasting.**
- C. Statistical Forecasting.
- **D. Collaborative Forecasting Platform.**

Answer: B,D

Explanation:

The Predict Demand process within the Demand to Management OMBP in Oracle Fusion Cloud SCM leverages advanced capabilities to enhance demand planning. Collaborative Forecasting Platform (A) enables stakeholders-such as sales teams, suppliers, and distributors-to collaborate in real time, inputting qualitative insights (e.g., market trends or promotions) that refine forecasts beyond pure data analysis. For example, a retailer might adjust forecasts based on an upcoming sale confirmed via the platform, improving accuracy. Machine Learning-based Forecasting (B) uses algorithms to analyze historical data, detect patterns (e.g., seasonality or anomalies), and adapt predictions dynamically, making it more precise than traditional methods. For instance, it might identify a spike in demand for umbrellas during unexpected rainy seasons. Option C (Statistical Forecasting) is a traditional method relying on statistical models but lacks the adaptive intelligence of machine learning, though it's still used as a foundation. Option D (Demand Sensing) focuses on short-term demand signals (e.g., point-of-sale data) rather than long-term planning, making it complementary but not a core strength of Predict Demand. Together, A and B empower businesses with both human collaboration and cutting-edge AI, ensuring robust demand planning that balances quantitative and qualitative inputs.

NEW QUESTION # 11

Which function does the Global Order Promising component serve in Oracle Fusion Cloud SCM?

- A. It guarantees order fulfillment within 24 hours.
- B. It focuses only on local supplier availability.
- **C. It provides real-time order promising based on supply and demand constraints.**

Answer: C

Explanation:

Global Order Promising (GOP) in Oracle Fusion Cloud SCM provides real-time order promising by evaluating supply and demand constraints across the enterprise, ensuring accurate delivery commitments. Option A is incorrect as GOP considers global, not just local, availability. Option C is false-it doesn't guarantee a 24-hour fulfillment but provides feasible timelines. This enhances customer satisfaction and planning accuracy.

NEW QUESTION # 12

What is a key benefit of Supplier Qualification Management in Oracle Fusion Cloud SCM?

- **A. It assesses and approves suppliers based on compliance and performance criteria.**
- B. It eliminates supplier performance reviews.
- C. It only tracks supplier payments.

Answer: A

Explanation:

Supplier Qualification Management in Oracle Fusion Cloud SCM evaluates and approves suppliers based on predefined compliance and performance criteria, ensuring reliable partnerships. Option A is incorrect as it focuses on payments, not qualification. Option C is wrong-performance reviews are integral to the process. This benefit mitigates risks and ensures quality suppliers.

NEW QUESTION # 13

Which feature in Oracle Fusion Cloud SCM assesses and approves suppliers based on compliance and performance criteria?

- A. Supplier Portal.
- B. Manufacturing Execution.
- **C. Supplier Qualification Management.**
- D. Cost Accounting.

Answer: C

Explanation:

Supplier Qualification Management (D) assesses and approves suppliers based on compliance (e.g., regulatory standards) and performance criteria (e.g., delivery reliability). For example, it might evaluate a supplier's 95% on-time delivery rate and ISO certification before approval. Option A (Cost Accounting) tracks costs, not supplier quality. Option B (Supplier Portal) facilitates communication, not qualification. Option C (Manufacturing Execution) manages production, not supplier vetting. This feature ensures reliable, high-quality suppliers, reducing supply chain risks and enhancing procurement outcomes.

Reference:

Below is the batch of questions formatted as requested, with comprehensive and detailed explanations verified against Oracle Fusion Cloud Applications SCM and Procurement documentation. Each explanation is extensive, covering the reasoning behind the correct answer, why other options are incorrect, practical examples, and the broader implications within the SCM or Procurement framework. All questions have four options, so the format includes A, B, C, and D. Note that Question 11 was included in this batch as it aligns with the pattern of your request.

NEW QUESTION # 14

What is the primary advantage of the Replenishment Planning process in Oracle Fusion Cloud SCM?

- **A. It ensures optimal inventory levels by predicting demand and adjusting supply plans.**
- B. It eliminates the need for demand forecasting.
- C. It reduces supplier payment cycles.
- D. It guarantees inventory levels remain static regardless of demand fluctuations.

Answer: A

Explanation:

The primary advantage of Replenishment Planning (A) is ensuring optimal inventory levels by predicting demand and adjusting supply plans accordingly. It uses demand signals-e.g., a forecast of 500 units for next month-to trigger timely replenishments, avoiding overstock (costly) or stockouts (lost sales). Option B is incorrect-static levels defy dynamic demand; Replenishment Planning adapts to fluctuations. Option C is false-demand forecasting is its foundation. Option D is unrelated-payment cycles are a financial process. For instance, if demand spikes unexpectedly, it recalibrates orders, saving costs and maintaining service levels, a key operational benefit.

NEW QUESTION # 15

.....

As we all know, passing the exam just one time can save your money and time, our 1Z0-1163-1 exam dumps will help you pass the exam just one time. 1Z0-1163-1 exam materials are edited by professional experts, and they are quite familiar with the exam center, therefore quality can be guaranteed. In addition, 1Z0-1163-1 exam materials cover most of knowledge points for the exam, and you can have a good command of the major knowledge points. We offer you free demo to have a try, and you can try before buying. Online and offline service are available, if you have any questions for 1Z0-1163-1 Training Materials, you can consult us.
