

Free PDF Updated Zscaler - Practice ZDTE Mock

ZSCALER PRACTICE Newest 2025 Actual Exam Complete Questions And Correct Answers(Verified Answers)/Already Graded A+	
1. What is the function of the auto proxy forwarding firewall configuration?	Automatically detecting web traffic (e.g. FTP, HTTPS) coming in on non-standard ports and forwarding it to Zscaler's proxy
2. Zscaler DLP policies can be enforced on which protocols?	HTTP, HTTPS, FTP
3. What firewall rules are required for Private Access Service Edge to function?	Inbound TCP/443, Outbound TCP/443, Outbound DNS
4. Where must NAT occur to have the client IP address be visible within a GRE tunnel through a firewall to the Zero Trust Exchange?	After traffic comes into the router
5. Which item prevents unauthorized SD-WAN router connections to the Zscaler service?	Partner Key
6. Zero Trust is about which of the following?	Connecting the right user, workload or machine to the right application, based on business policy
7. Which Sandbox policy action causes Zscaler to hold a file for analysis before delivering it to a user?	Quarantine
8. What role does the Zscaler Identity Proxy play, in enabling access control through Zscaler, to a cloud application?	Ensure that the user is already signed into Zscaler before they are allowed to attempt to access a cloud application

Stop wasting time on meaningless things. There are a lot wonderful things waiting for you to do. You still have the opportunities to become successful and wealthy. The ZDTE study materials is a kind of intelligent learning assistant, which is capable of aiding you pass the ZDTE Exam easily. If you are preparing the exam, you will save a lot of troubles with the guidance of our ZDTE study materials. Our company is aimed at relieving your pressure from heavy study load. So we strongly advise you to have a try.

In order to pass the Zscaler ZDTE Exam, selecting the appropriate training tools is very necessary. And the study materials of Zscaler ZDTE exam is a very important part. VCEdumps can provide valid materials to pass the Zscaler ZDTE exam. The IT experts in VCEdumps are all have strength and experience. Their research materials are very similar with the real exam questions. VCEdumps is a site that provide the exam materials to the people who want to take the exam. and we can help the candidates to pass the exam effectively.

>> Practice ZDTE Mock <<

100% Pass Realistic ZDTE Practice Mock - Zscaler Digital Transformation Engineer Certification Torrent

Our ZDTE exam questions are authoritatively certified. Our goal is to help you successfully pass relevant ZDTE exam in an efficient learning style. Due to the quality and reasonable prices of our ZDTE training materials, our competitiveness has always been a leader in the world. Our ZDTE Learning Materials have a higher pass rate than other training materials, so we are confident to allow you to gain full results. With our ZDTE exam questions, your success is guaranteed.

Zscaler Digital Transformation Engineer Sample Questions (Q39-Q44):

NEW QUESTION # 39

What are common use cases of Zscaler OneAPI automation?

- A. Creating URL filtering rules and accessing ZDX Copilot.
- B. Enrolling users' device information and installing antivirus features in Zscaler Client Connector (ZCC).
- **C. Creating App Connector Groups and enrolling users' device information.**
- D. Creating App Connector Groups and accessing ZDX Copilot.

Answer: C

Explanation:

Zscaler OneAPI is designed as a unified, modern API layer that exposes core objects and workflows from ZIA, ZPA, and Zscaler Client Connector in a consistent way. In the Digital Transformation Engineer and Zero Trust Automation material, common and recommended use cases focus on automating tasks that are frequently repeated, error-prone, or need to scale across large environments.

For ZPA, a typical automation scenario is the creation and lifecycle management of App Connectors and App Connector Groups. These components provide the inside-out connectivity from private applications to the Zscaler cloud. Using OneAPI, administrators can programmatically create, update, and organize App Connector Groups, allowing infrastructure-as-code style deployment and rapid scaling of private access environments.

On the endpoint side, OneAPI also integrates with Zscaler Client Connector and identity-related services to enroll or update device information programmatically. This enables workflows such as onboarding new devices, synchronizing device attributes from external systems, and tying device identity to access policy without manual portal operations.

By contrast, installing "antivirus features" in ZCC or "accessing ZDX Copilot" are not highlighted as core OneAPI automation use cases in the referenced curriculum, which makes option B the correct choice.

NEW QUESTION # 40

How many minutes of data can the Log Streaming Service retransmit once the connection is restored between App Connectors and Zscaler Private Access (ZPA)?

- A. Last 20 minutes
- **B. Last 15 minutes**
- C. Last 60 minutes
- D. Last 30 minutes

Answer: B

Explanation:

Zscaler Private Access (ZPA) uses the Log Streaming Service (LSS) to deliver ZPA logs (such as user activity and connector/authentication logs) to external SIEM and analytics platforms. LSS relies on a ZPA App Connector as the local relay between the ZPA service and the downstream log receiver. If network connectivity between ZPA and the local App Connector is interrupted, log delivery may be temporarily disrupted.

According to Zscaler integration guidance, when connectivity between ZPA and the local App Connectors is restored, LSS can retransmit up to 15 minutes of previously undelivered log data, although this retransmission is not guaranteed in all circumstances. This limited replay window is designed to provide reasonable resilience for short outages without requiring large local storage on the connector.

The 15-minute buffer applies specifically to ZPA log streaming scenarios and is distinct from longer-term log retention in Zscaler's logging cluster or external SIEM. Options A, C, and D overstate the supported replay duration and do not match Zscaler's documented behavior. To minimize log gaps beyond this 15-minute window, Zscaler recommends resilient network paths for App Connectors and careful monitoring of connector health so that LSS can operate continuously.

NEW QUESTION # 41

What is Zscaler Deception?

- A. A set of decoys representing users and server elements used to identify an attacker accessing our infrastructure.
- **B. A simple and more effective targeted threat detection solution built on the Zscaler Zero Trust architecture.**
- C. A set of decoys representing network elements used to identify an attacker accessing our infrastructure.
- D. An early detection system supported via servers located inside our corporate infrastructure.

Answer: B

Explanation:

In the Zscaler Digital Transformation Engineer material, Zscaler Deception is introduced as an advanced threat-detection capability that is tightly integrated with the Zero Trust Exchange. The official description emphasizes that it is a simple, cloud-delivered, and highly effective targeted threat detection solution built on Zscaler's Zero Trust architecture, which is almost word-for-word reflected in option C.

Deception works by deploying high-fidelity decoys, lures, and credentials—designed to be indistinguishable from real assets—from the attacker's point of view. Any interaction with these decoys is inherently suspicious, yielding high-confidence, low-noise alerts that help security teams quickly identify lateral movement, credential theft, and post-compromise activity. The key point in the training is that this capability is delivered from the Zscaler cloud, leveraging the existing Zero Trust platform; it does not require additional on-premise detection servers or traditional network-centric sensors.

Options A and B reduce the concept to "sets of decoys" and ignore the integrated Zero Trust detection value and cloud-native delivery model. Option D incorrectly suggests on-prem server infrastructure as the foundation. The exam materials clearly frame Zscaler Deception as a Zero Trust-based targeted threat detection solution, making option C the correct choice.

NEW QUESTION # 42

Safemarch is a retail company with hundreds of stores across the United States. Their core applications reside in two different data centers with a considerable presence on AWS.

Which would be a good connectivity solution for them to access applications from store locations?

- A. Branch Connector at stores for Zscaler connectivity and Direct Connect from data centers to AWS.
- B. Branch Connectors at stores with App Connectors on-prem and on AWS.
- C. Site-to-site VPNs from stores to Zscaler Edge, with App Connectors on-prem and on AWS.
- **D. SD-WAN connectivity to stores and Zscaler Edge, with App Connectors on-prem and on AWS.**

Answer: D

Explanation:

For a large retail organization with hundreds of geographically distributed stores and applications split across multiple data centers plus AWS, Zscaler reference designs emphasize an SD-WAN-to-Zscaler Edge model combined with ZPA App Connectors deployed close to the applications. In this model, each store uses SD-WAN to build resilient, policy-based connectivity to the nearest Zscaler Edge locations. Those edges then provide secure, optimized access to private applications published through App Connectors installed in the on-premises data centers and within AWS VPCs.

This approach centralizes security and access control in the Zscaler cloud while avoiding the operational burden of managing hundreds of direct site-to-site VPNs. It also aligns with Zero Trust principles by steering all store traffic to Zscaler rather than extending the corporate network to every store. Direct Connect between data centers and AWS (as in option A) is optional from a ZPA perspective because App Connectors in AWS communicate outbound to Zscaler over the internet. Branch Connector (option D) is typically used when SD-WAN or suitable edge devices are not present, whereas a large retail environment commonly standardizes on SD-WAN.

NEW QUESTION # 43

An engineer attempted to push a configuration using an API call to an endpoint but received a 409 response code.

What was the reason for the error response code?

- A. Exceeded the rate limit or quota
- **B. Edit conflict occurred**
- C. Request is not complete due to incorrect syntax
- D. Resource does not exist

Answer: B

Explanation:

In the context of Zscaler's public APIs, HTTP status code 409 indicates a conflict with the current state of the target resource, most commonly an edit conflict. When configuration is managed via API, Zscaler uses versioning or similar concurrency controls to ensure that two administrators or systems do not overwrite each other's changes unintentionally. A 409 response typically appears when the payload being pushed is based on an outdated version of the object or when another change has been committed between the time the configuration was retrieved and the time the update was sent.

The Digital Transformation Engineer documentation explains that clients should first retrieve the latest configuration (often including a

version or ETag-like value), apply their modifications, and then push the update. If the server detects that the version in the request no longer matches the current version, it returns 409 Conflict to signal that the update cannot be safely applied. The other options map to different HTTP codes: rate limit or quota issues are indicated by 429 Too Many Requests, non-existent resources by 404 Not Found, and syntax or malformed payloads by 400 Bad Request. Thus, for a 409 response during a configuration push, the correct interpretation is an edit conflict.

NEW QUESTION # 44

.....

Everything will be changed if you buy our ZDTE actual study guide, and you will be surprised with not only high grades but also the certification that you got for the help of our ZDTE exam questions. As you know, salaries are commensurate to skills while certificates represent skills. Therefore, you are sure to get high salaries with certification after using our ZDTE Test Torrent. Last but not the least, after you enter into large companies with ZDTE certification, you can get to know more competent people, which can certainly enlarge your circle of friends.

ZDTE Certification Torrent: <https://www.vcedumps.com/ZDTE-examcollection.html>

If you don't have time to prepare for ZDTE or attend classes, ITCertKey's ZDTE study materials can help you to grasp the exam knowledge points well, Zscaler Practice ZDTE Mock Therefore, you have more opportunities and possibilities to get high salary and prestigious position and at the same time you can enjoy comfortable working conditions, which are never imagined before, Actually, only the ZDTE quiz braindumps: Zscaler Digital Transformation Engineer of scientific arrangement can help you speed up your review process.

What you think or hope is important to the executive, Symptoms included ZDTE the rapidly growing prices, expansion of the market, and the failure to realize that the prices were simply too high.

Avail High Hit Rate Practice ZDTE Mock to Pass ZDTE on the First Attempt

If you don't have time to prepare for ZDTE or attend classes, ITCertKey's ZDTE study materials can help you to grasp the exam knowledge points well, Therefore, you have more opportunities and possibilities to get high salary and Practice ZDTE Mock prestigious position and at the same time you can enjoy comfortable working conditions, which are never imagined before.

Actually, only the ZDTE quiz braindumps: Zscaler Digital Transformation Engineer of scientific arrangement can help you speed up your review process, And the different discount will send to you in the festival if you want to buy ZDTE actual exam dumps.

With our ZDTE real exam, we look forward to your joining.
