Salesforce Salesforce-Slack-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Fundamentals: This section of the exam measures the skills of Salesforce Administrators and covers the key privileges and responsibilities associated with each Slack user role. Candidates will identify unique features of Slack's paid plans and understand the common responsibilities shared by Admins and Owners. Additionally, this section emphasizes the importance of workspace and organization-level settings and dashboards, focusing on how they contribute to effective Slack management.
Topic 2	<ul style="list-style-type: none">• User Lifecycle Management: This area focuses on managing user accounts throughout their lifecycle in Slack. Candidates will implement authentication options based on organizational requirements and recommend processes for new account creation.
Topic 3	<ul style="list-style-type: none">• Enabling Slack Success: This section focuses on the skills of Admins to develop a vision for Slack within their organization. Candidates will use analytics dashboards to track usage and make recommendations based on data insights, such as channel archival or promoting best practices.
Topic 4	<ul style="list-style-type: none">• Security: This domain targets Salesforce Security specialists in identifying Slack product security features that meet organizational needs. Candidates will describe how Slack addresses security governance, risk management, and compliance while recommending features that protect sensitive data.
Topic 5	<ul style="list-style-type: none">• Channel and User Group Administration: This section measures the skills of Salesforce Administrators in setting up and managing Slack channels. Candidates will learn when to use channels versus direct messages or group DMs, as well as when to opt for public or private channels.

Salesforce Certified Slack Administrator Sample Questions (Q95-Q100):

NEW QUESTION # 95

Which TWO statements are true about workflows? (Choose two.)

- **A. Workspace Owners and Admins can view all published workflows created by members of their workspaces.**
- B. It is not possible to create a custom workflow for your team in fewer than five clicks.
- **C. It is currently possible for Org Owners and Admins to view all workflows created in an Enterprise Grid org.**
- D. To see all workflows in a workspace, you need to be an Owner or Admin of that workspace.

Answer: A,C

Explanation:

Slack's Workflow Builder allows users to create workflows without writing code, and Admins have visibility over workflows to maintain governance.

According to Slack documentation:

"Workspace Owners and Admins can view and manage all published workflows in their workspace." "For Enterprise Grid organizations, Org Owners and Org Admins can see workflows across all workspaces." Option A is false - creating a workflow is a quick process requiring fewer than five clicks. Option C is inaccurate because regular members can also view workflows they have access to via Workflow Builder, not just Owners or Admins.

(Reference: Slack Administration Study Guide - Workflow Builder and Admin Controls)

-

NEW QUESTION # 96

What are two benefits of creating user groups for your workspace?

(Select the TWO best answers.)

- A. Assigns default channels to users when they start working at the company.
- **B. Sets channel management permissions at the workspace level.**
- C. Assigns default Slack app integrations to users when they start working at the Company.
- D. Sets permissions on who can view your workspace analytics
- **E. Notifies a group of members who often need to be notified at once. For example:@managers**

Answer: B,E

NEW QUESTION # 97

A user with a claimed email domain tries to create a new workspace. The user is redirected to the Enterprise Grid org's workspace directory and is asked to join an existing workspace or contact the Grid Org Owners for more details.

True or False: Claiming relevant domains for your Enterprise ensures that all workspaces are subject to the organization's Grid policies, such as message retention, SSO/security settings, and eDiscovery/archiving.

- **A. True**
- B. False

Answer: A

Explanation:

When you claim relevant domains for your Enterprise Grid organization:

"Any user with an email address matching a claimed domain who attempts to create a new workspace will be directed to join the Enterprise Grid organization, ensuring that all workspaces fall under centralized policies for security, compliance, and retention." This process prevents rogue or unmanaged workspaces and ensures consistent governance.

(Reference: Slack Administration Study Guide - Claiming Domains and Managing Grid Compliance)

-

NEW QUESTION # 98

In your role as an Org Admin, you are advising a user working on a market research project.

The VP of Human Resources requested a sensitive internal report. Typically, communication takes place in a public project channel. What should you recommend the user do?

- A. Send the report in a DM to the VP of HR.
- B. Send the report in a group DM to the VP and anyone whose information is included in the report.
- C. Post the report in the project's public channel.
- **D. Create a private project channel to share the report with the VP and anyone whose information is included.**

Answer: D

Explanation:

Slack security best practices recommend:

"Sensitive information should be shared in a private channel where access is restricted to authorized individuals." Posting in a public channel (D) would expose confidential information. Group DMs (A) are less scalable and harder to manage. A one-off DM to the VP (C) may not involve all relevant stakeholders.

(Reference: Slack Administration Study Guide - Sharing Sensitive Information in Slack)

-

NEW QUESTION # 99

Your company is on the Slack Business+ plan and is interested in setting up SCIM provisioning in their identity provider (IdP) to more efficiently manage their Slack user base.

Which two benefits would the company gain from using SCIM provisioning? (Select the TWO best answers.)

- **A. They can pre-provision Multi-Channel and Single-Channel Guests to their workspace.**
- B. They can sync custom profile fields to obtain more useful analytics about employees' Slack usage.
- **C. They can deactivate users automatically from their IdP.**
- D. They do not have to pre-provision any users; employees will automatically create an account when they attempt to log in for the first time.
- E. Users only need to remember one set of credentials for all the applications they use.

Answer: A,C

Explanation:

SCIM provisioning offers two major benefits:

"Automatically deactivating user accounts when they are deactivated in the identity provider (IdP)."

"Pre-provisioning Multi-Channel and Single-Channel Guests in Slack."

SSO (Option B) relates to authentication, not provisioning. Automatic account creation upon login (Option D) is tied to Just-in-Time (JIT) provisioning with SSO, not SCIM.

(Reference: Slack Administration Study Guide - SCIM Provisioning Benefits)
