

100-160 Test Vce, Vce 100-160 Torrent

P.S. Free & New 100-160 dumps are available on Google Drive shared by Actual4dump: <https://drive.google.com/open?id=10cPHgL8L7HFHE-kb7bwXQteHHiHgxkJ>

As is known to us, there are three different versions about our Cisco Certified Support Technician (CCST) Cybersecurity guide torrent, including the PDF version, the online version and the software version. The experts from our company designed the three different versions of 100-160 test torrent with different functions. According to the different function of the three versions, you have the chance to choose the most suitable version of our 100-160 study torrent. For instance, if you want to print the 100-160 study materials, you can download the PDF version which supports printing. By the PDF version, you can print the Cisco Certified Support Technician (CCST) Cybersecurity guide torrent which is useful for you. If you want to enjoy the real exam environment, the software version will help you solve your problem, because the software version of our 100-160 Test Torrent can simulate the real exam environment. In a word, the three different versions will meet your all needs; you can use the most suitable version of our 100-160 study torrent according to your needs.

Cisco 100-160 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Basic Network Security Concepts: This section of the exam measures the skills of a Network Defender and focuses on understanding network-level protections, including firewalls, VPNs, and intrusion detection and prevention systems, providing insight into how threats are mitigated within network environments.
Topic 2	<ul style="list-style-type: none">• Vulnerability Assessment and Risk Management: This section of the exam measures the skills of a Risk Management Analyst and entails identifying and assessing vulnerabilities, understanding risk priorities, and applying mitigation strategies that help manage threats proactively within an organization's systems
Topic 3	<ul style="list-style-type: none">• Incident Handling: This section of the exam measures the skills of an Incident Responder and centers on recognizing security incidents, responding appropriately, and containing threats—forming the essential foundation of incident response procedures.
Topic 4	<ul style="list-style-type: none">• Essential Security Principles: This section of the exam measures the skills of a Cybersecurity Technician and covers foundational cybersecurity concepts such as the CIA triad (confidentiality, integrity, availability), along with basic threat types and vulnerabilities, laying the conceptual groundwork for understanding how to protect information systems.
Topic 5	<ul style="list-style-type: none">• Endpoint Security Concepts: This section of the exam measures the skills of an Endpoint Security Specialist and includes securing individual devices, understanding protections such as antivirus, patching, and access control at the endpoint level, essential for maintaining device integrity.

Realistic Cisco 100-160 Test Vce

100-160 practice test material is in line with the content of the actual Cisco 100-160 certification test. Before buying 100-160 exam dumps, you can test its features with a free demo. If you get help from updated 100-160 questions, you can easily clear the Cisco Certified Support Technician (CCST) Cybersecurity (100-160) test in one go. After receiving input from thousands of professionals worldwide, Actual4dump has developed its 100-160 exam study material. After making a payment, clients will get up to three months of free Cisco 100-160 exam questions updates as well.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q276-Q281):

NEW QUESTION # 276

What is the main purpose of a disaster recovery plan?

- A. Identifying potential threats and vulnerabilities
- B. Minimizing the impact of disasters
- C. Recovering data after a disaster
- D. Preventing disasters from occurring

Answer: C

Explanation:

The primary purpose of a disaster recovery plan is to ensure that data, systems, and operations can be restored in a timely manner following a disaster. It focuses on recovering critical resources and minimizing downtime to resume normal business operations as quickly as possible.

NEW QUESTION # 277

Which of the following is a key element of an incident response procedure?

- A. Regularly updating software patches
- B. Classifying incidents based on severity
- C. Performing vulnerability assessments
- D. Conducting employee security awareness training

Answer: B

Explanation:

Incident response procedures include classifying incidents based on their severity. Incident severity classification helps prioritize incident response actions based on the potential impact and risk involved. By categorizing incidents, appropriate resources and response efforts can be allocated to mitigate and resolve them effectively.

NEW QUESTION # 278

What is the role of a firewall in secure access technologies?

- A. To monitor network traffic
- B. To prevent unauthorized access
- C. To encrypt data
- D. To authenticate users

Answer: B

Explanation:

A firewall is a network security device that is used to filter incoming and outgoing network traffic based on predetermined security rules. Its primary role is to prevent unauthorized access to a network or system by blocking potentially harmful or malicious traffic.

NEW QUESTION # 279

Which of the following features of the Cisco Identity Services Engine (ISE) allows network administrators to define policies for controlling access to network resources based on user identities and user or group attributes?

- A. Profiling
- B. Identity Firewall
- C. Network Access Profiles
- D. TrustSec

Answer: A

Explanation:

Option 1: Network Access Profiles: Network Access Profiles in Cisco ISE define the behavior of network devices when they are accessed by authenticated users. They are a set of policies that determine how network resources are allocated to users or user groups, and what level of access they have.

Option 2: Identity Firewall: Cisco ISE's Identity Firewall feature enables network administrators to apply firewall policies based on user identities. It allows for granular control over network access and can enforce allow, deny, or redirect actions based on user attributes.

Option 3: Profiling: This is the correct answer. Cisco ISE's Profiling feature is used to dynamically classify endpoints connecting to the network based on their characteristics, such as their MAC addresses, IP addresses, and DHCP options. This information is then used to enforce access policies.

Option 4: TrustSec TrustSec is a Cisco security solution that provides secure access control across the network infrastructure. While TrustSec is related to identity and access management, it is not a feature of Cisco ISE specifically.

NEW QUESTION # 280

What is the general motivation behind an Advanced Persistent Threat (APT)?

- A. Publicity
- B. Financial gain
- C. Random disruption
- D. Revenge

Answer: B

Explanation:

The general motivation behind an APT is often financial gain. Threat actors conducting APTs aim to gain unauthorized access to valuable information, such as financial data or intellectual property, with the intention of extracting monetary value from their targets.

NEW QUESTION # 281

.....

After you practice our 100-160 study materials, you can master the examination point from the 100-160 exam torrent. Then, you will have enough confidence to pass your 100-160 exam. We can succeed so long as we make efforts for one thing. As for the safe environment and effective product, why don't you have a try for our 100-160 Test Question, never let you down! Before your purchase, there is a free demo of our 100-160 training material for you. You can know the quality of our 100-160 guide question earlier before your purchase.
