Microsoft Identity and Access Administrator Sample Questions (Q330-Q335):

NEW QUESTION # 330

You have a custom cloud app named App1 that is registered in Azure Active Directory (Azure AD).

App1 is configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/assign-user-or-group-access-portal>

NEW QUESTION # 331

You have an Azure Active Directory (Azure AD) tenant.

You create an enterprise application collection named HR Apps that has the following settings:

- Applications: App1, App2, App3
- Owners: Admin1
- Users and groups: HRUsers

All three apps have the following Properties settings:

- Enabled for users to sign in: Yes
- User assignment required: Yes
- Visible to users: Yes

Users report that when they go to the My Apps portal, they only see App1 and App2.

You need to ensure that the users can also see App3.

What should you do from App3?

- **A. From Users and groups, add HRUsers.**
- B. From Properties, change User assignment required to No.
- C. From Permissions, review the User consent permissions.
- D. From Single sign-on, configure a sign-on method.

Answer: A

Explanation:

User assignment and Visible to Users goes hand in hand for this.

If Visible to Users is set to Yes then this is the explanation from the 'I' next to it:

If this option is set to yes, then assigned users will see the application on My Apps and O365 app launcher. If this option is set to no, then no users will see this application on their My Apps and O365 launcher. Assigned User is the key here.

Unless the users are assigned to the app, then No one will see the application on their MyApps or O365 Launcher.

NEW QUESTION # 332

SIMULATION

Task 5

You need to assign a Windows 10/11 Enterprise E3 license to the Sg-Retail group.

Answer:

Explanation:

See the Explanation for the complete step by step solution

Explanation:

To assign a Windows 10/11 Enterprise E3 license to the Sg-Retail group, you can follow these steps:

Sign in to the Microsoft Entra admin center:

Make sure you have the role of Global Administrator or License Administrator.

Navigate to the licensing page:

Go to Billing > Licenses1.

Find the Windows 10/11 Enterprise E3 license:

Look for the Windows 10/11 Enterprise E3 license in the list of available products.

Assign licenses to the group:

Select the license and then choose Assign licenses.

Search for and select the Sg-Retail group.

Confirm the assignment and make sure that the correct number of licenses is available for the group.

Review and confirm the assignment:

Ensure that the licenses have been properly assigned to the Sg-Retail group without affecting other groups or users.

Monitor the license status:

Check the license usage and status to ensure that the Sg-Retail group members can utilize the Windows 10/11 Enterprise E3 features.

NEW QUESTION # 333

Hotspot Question

You have a Microsoft 365 tenant that contains a group named Group1 as shown in the Group1 exhibit. (Click the Group1 tab.)

☐ You create an enterprise application named App1 as shown in the App1 Properties exhibit. (Click the App1 Properties tab.)

☐ You configure self-service for App1 as shown in the App1 Self-service exhibit. (Click the App1 Self-service tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Explanation:

Box 1: No

Only direct members will have access. Approved users will be added to Group 1.

Box 2: Yes

The approver will automatically become owner of the Group 1 after self service is configured.

Box 3: No

Visible to users is NO. So no one will be able to see the app.
