### NEW QUESTION # 49

Refer to the exhibit, which shows a VPN topology.

The device IP 10.1.100.40 downloads a file from the FTP server IP 192.168.4.50 Referring to the exhibit, what will be the traffic

flow behavior if ADVPN is configured in this environment?

- **A. Spoke1 will establish an ADVPN shortcut to Spoke2**
- B. The TCP port 21 must be allowed on the NAT Device2
- C. All the session traffic will pass through the Hub
- D. ADVPN is not supported when spokes are behind NAT

**Answer: A**

### NEW QUESTION # 50

Refer to the exhibit.

The exhibit shows two error messages from a FortiGate root Security Fabric device when you try to configure a new connection to a FortiClient EMS Server.

Referring to the exhibit, which two actions will fix these errors? (Choose two.)

- **A. Verify that the CRL is accessible from the root FortiGate**
- **B. Authorize the root FortiGate on the FortiClient EMS**
- C. Export and import the FortiClient EMS server certificate to the root FortiGate.
- D. Install a new known CA on the Win2K16-EMS server.

**Answer: A,B**

Explanation:

A is correct because the error message "The CRL is not accessible" indicates that the root FortiGate cannot access the CRL for the FortiClient EMS server. Verifying that the CRL is accessible will fix this error.

D is correct because the error message "The FortiClient EMS server is not authorized" indicates that the root FortiGate is not authorized to connect to the FortiClient EMS server. Authorizing the root FortiGate on the FortiClient EMS server will fix this error. The other options are incorrect. Option B is incorrect because exporting and importing the FortiClient EMS server certificate to the root FortiGate will not fix the CRL error. Option C is incorrect because installing a new known CA on the Win2K16-EMS server will not fix the authorization error.

### NEW QUESTION # 52

Refer to the exhibit.

The exhibit shows the forensics analysis of an event detected by the FortiEDR core. In this scenario, which statement is correct regarding the threat?

- **A. This is an exfiltration attack and has not been stopped by FortiEDR**
- B. This is an exfiltration attack and has been stopped by FortiEDR.

- D. This is a ransomware attack and has been stopped by FortiEDR

**Answer: A**

Explanation:

The exhibit shows that the FortiEDR core has detected an exfiltration attack. The attack is attempting to copy files from the device to an external location. The FortiEDR core has blocked the attack, and the files have not been exfiltrated.

The exhibit also shows that the attack is using the Cobalt Strike beacon. Cobalt Strike is a penetration testing tool that can be used for both legitimate and malicious purposes. In this case, the Cobalt Strike beacon is being used to exfiltrate files from the device.

The other options are incorrect. Option A is incorrect because the attack has not been stopped. Option C is incorrect because the attack is not a ransomware attack. Option D is incorrect because the FortiEDR core has not stopped the attack.
