Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 000-324 exam in first attempt, but also you can get a high score to acquire IBM certification.

If you use pass4sureofficial 000-324 Certification questions and answers, you will experience actual 000-324 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-324 exam. Every point from pass4sure 000-324 PDF, 000-324 review will help you take IBM 000-324 exam much easier and become IBM certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial IBM 000-324 course:

- \* Up-to-Date IBM 000-324 questions taken from the real exam.
- \* 100% correct IBM 000-324 answers you simply can't find in other 000-324 courses.
- \* All of our tests are easy to download. Your file will be saved as a 000-324 PDF.
- \* IBM 000-324 brain dump free content featuring the real 000-324 test questions.

IBM 000-324 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-324 exam training are an absolute favorite in the industry. You will pass IBM 000-324 certification test and career opportunities will be open for you.

In order to allow our customers to better understand our IDP quiz prep, we will provide clues for customers to download in order to understand our IDP exam torrent in advance and see if our products are suitable for you. As long as you have questions, you can send us an email and we have staff responsible for ensuring 24-hour service to help you solve your problems. We do not charge extra service fees, but the service quality is high. Your satisfaction is the greatest affirmation for us and we sincerely serve you. Our IDP Exam Guide deliver the most important information in a simple, easy-to-understand language that you can learn efficiently learn with high quality. Whether you are a student or an in-service person, our IDP exam torrent can adapt to your needs.

## Exam Dumps CrowdStrike IDP Demo - Trustworthy IDP Exam Torrent

Life is beset with all different obstacles that are not easily overcome. For instance, IDP exams may be insurmountable barriers for the majority of population. However, with the help of our IDP exam questions, exams are no longer problems for you. The reason why our IDP Training Materials outweigh other IDP study prep can be attributed to three aspects, namely free renewal in one year, immediate download after payment and simulation for the software version.

## CrowdStrike Certified Identity Specialist(CCIS) Exam Sample Questions (Q16-Q21):

### NEW QUESTION # 16

How many days will an identity-based incident be suppressed if new events related to the same incident occur?

- A. 7 days
- B. 5 days
- C. 30 days
- D. 14 days

**Answer: B**

Explanation:

Falcon Identity Protection uses incident suppression windows to prevent alert fatigue while still maintaining accurate incident tracking. According to the CCIS documentation, when new events related to an existing identity-based incident occur, the incident is suppressed for 5 days.

This suppression means that Falcon does not generate a new incident for the same activity during this window. Instead, additional detections are added to the existing incident, allowing analysts to view the full progression of the threat in a single investigative context.

The 5-day suppression window ensures that ongoing identity attacks—such as repeated authentication abuse or lateral movement—are consolidated rather than fragmented across multiple incidents. This improves investigation efficiency and aligns with Falcon's incident lifecycle management approach.

Because the suppression period is fixed at 5 days, Option D is the correct and verified answer.

### NEW QUESTION # 17

Which of the following are minimum requirements for showing the Falcon Identity Verification Dialog on the end user's machine?

- A. Windows Server 2008 and PowerShell 5.1
- B. Windows Vista and .NET 3.5
- **C. Internet Explorer 9 and Windows Server 2008**
- D. .NET 3.5 and PowerShell 5.1

**Answer: C**

Explanation:

The Falcon Identity Verification Dialog is used to prompt users for identity verification during conditional access enforcement. According to the CCIS curriculum, Internet Explorer 9 and Windows Server 2008 represent the minimum supported requirements for rendering the Identity Verification Dialog on an end user's system.

This requirement exists because the dialog relies on supported browser and OS components to present authentication challenges reliably during enforcement workflows. Systems that do not meet these minimum requirements may fail to display the dialog correctly, impacting the enforcement of MFA or identity verification actions.

The other options reference runtime frameworks or PowerShell versions that are not directly responsible for rendering the verification dialog. Therefore, Option C is the correct and verified answer.

### NEW QUESTION # 18

For false positives, the Detection details can be set to new "Actions" using:

- A. recommendations
- B. exits
- C. remediations
- **D. exceptions**

**Answer: D**

Explanation:

When an identity-based detection is determined to be a false positive, Falcon Identity Protection allows administrators to take corrective action using exceptions. According to the CCIS curriculum, exceptions are the mechanism by which detections can be suppressed for specific entities or conditions without disabling the detection entirely.

Exceptions are configured from the Detection details view and are intended to handle known, acceptable behavior that would otherwise continue to trigger detections. This allows security teams to reduce noise while maintaining visibility into true threats. Exceptions are especially valuable in environments with complex authentication patterns or legacy configurations.

The other options are incorrect:

\* Exits are not a detection control mechanism.

\* Remediations refer to corrective actions, not suppression logic.

\* Recommendations provide guidance but do not change detection behavior.

By using exceptions, Falcon ensures that false positives are handled in a controlled and auditable way, aligning with best practices outlined in the CCIS material. Therefore, Option C is the correct answer.

### NEW QUESTION # 19

Which of the following is NOT an available Goal within the Domain Security Overview?

- A. Pen Testing
- **B. Business Privileged Users Management**
- C. AD Hygiene
- D. Privileged Users Management

**Answer: B**

Explanation:

The Domain Security Overview in Falcon Identity Protection uses Goals to frame identity risks into focused security assessment perspectives. These goals allow organizations to evaluate identity posture based on specific security priorities such as directory hygiene, privilege exposure, or overall attack surface reduction.

According to the CCIS curriculum, the available Goals include Privileged Users Management, AD Hygiene, Pen Testing, and Reduce

Attack Surface. These goals are predefined by CrowdStrike and determine how risks are grouped, weighted, and presented in reports.

Business Privileged Users Management is not an available Goal within the Domain Security Overview.

While Falcon Identity Protection does support the concept of business privileges and evaluates their impact on users and entities, this concept is handled through risk analysis and configuration—not as a selectable Domain Security Goal.

The CCIS documentation clearly distinguishes between Goals (which control reporting and assessment views) and business privilege modeling (which influences risk scoring). Therefore, Option B is the correct and verified answer.

### NEW QUESTION # 20

Where would a Falcon administrator enable authentication traffic inspection (ATI) for Domain Controllers?

- A. Identity management settings
- B. Identity detection configuration
- C. Identity protection settings
- **D. Identity configuration policies**

**Answer: D**

Explanation:

Authentication Traffic Inspection (ATI) is a foundational capability of Falcon Identity Protection that enables the platform to analyze authentication traffic from domain controllers. According to the CCIS documentation, ATI is enabled through identity configuration policies.

Identity configuration policies define how the Falcon sensor captures and inspects authentication-related traffic, including Kerberos, NTLM, LDAP, and other identity protocols. Enabling ATI at this level ensures that domain controllers provide the necessary telemetry for identity risk analysis, detections, and behavioral profiling.

The other options are incorrect because:

- \* Identity management settings focus on identity governance and administration.
- \* Identity detection configuration controls detection logic, not traffic inspection.
- \* Identity protection settings manage high-level configuration but do not directly enable ATI.

Because ATI must be explicitly enabled via identity configuration policies, Option A is the correct and verified answer.

### NEW QUESTION # 21

.....

There is a succession of anecdotes, and there are specialized courses. Experts call them experts, and they must have their advantages. They are professionals in every particular field. The IDP test material, in order to enhance the scientific nature of the learning platform, specifically hired a large number of qualification exam experts, composed of product high IQ team, these experts by combining his many years teaching experience of IDP Quiz guide and research achievements in the field of the test, to exam the popularization was very complicated content of CrowdStrike Certified Identity Specialist (CCIS) Exam exam dumps, better meet the needs of users of various kinds of cultural level.
