- C. Settle the created goods movements without receipt of an invoice.
- D. Post the appropriate invoices yourself while using evaluated receipt settlement.

Answer: B

Explanation:

Automated Invoice Settlement (2LH) in SAP S/4HANA Cloud Public Edition is designed to streamline invoice processing by automating settlement based on predefined conditions. Below is an explanation of the correct answers:

* Schedule a job that will periodically settle invoices (A):Automated Invoice Settlement allows users to schedule background jobs that automatically process and settle invoices at regular intervals. This ensures timely settlement of invoices without manual intervention.

* Use the evaluated receipt settlement without the supplier's approval (C):Evaluated Receipt Settlement (ERS) enables automatic invoice creation based on goods receipts. With this functionality, invoices can be settled without requiring explicit approval from the

supplier, provided the terms are pre-agreed.

* Post the appropriate invoices yourself while using evaluated receipt settlement (B): While ERS automates invoice creation, it does not require manual posting of invoices. The system handles this automatically based on goods receipt data.

* Settle the created goods movements without receipt of an invoice (D): Goods movements cannot be settled without an invoice unless specific configurations like ERS are in place. However, this is not a feature of Automated Invoice Settlement (2LH).
