

# Reliable SOL-C01 Practice Questions - Pass Snowflake Certified SnowPro Associate - Platform Certification Forever

P.S. Free 2026 Snowflake SOL-C01 dumps are available on Google Drive shared by PassSureExam:  
[https://drive.google.com/open?id=1qGjCQt\\_\\_c4LVLxJGMvMyAddpkgnmW7\\_](https://drive.google.com/open?id=1qGjCQt__c4LVLxJGMvMyAddpkgnmW7_)

To address the problems of SOL-C01 exam candidates who are busy, PassSureExam has made the SOL-C01 dumps PDF format of real Snowflake Certified SnowPro Associate - Platform Certification (SOL-C01) exam questions. This format's feature to run on all smart devices saves your time. Because of this, the portability of SOL-C01 dumps PDF aids in your preparation regardless of place and time restrictions. The second advantageous feature of the SOL-C01 Questions Pdf document is the ability to print Snowflake Certified SnowPro Associate - Platform Certification (SOL-C01) exam dumps to avoid eye strain due to the usage of smart devices.

Our SOL-C01 exam materials have free demos for candidates who want to pass the exam, you are not required to pay any amount or getting registered with us that you can download our dumps. If you want to check the quality of our SOL-C01 exam materials, you can download the demo from our website free of charge. Our SOL-C01 exam materials demo will fully show you the characteristics of the actual exam question, therefore, you can judge whether you need it or not. We believe that the unique questions and answers of our SOL-C01 Exam Materials will certainly impress you. It will help you make decisions what benefit you and help you pass the exam easily. In addition, our expert of PassSureExam will provide candidates with specially designed materials in order to access your understanding of various questions. Choosing our SOL-C01 exam materials will definitely give you an unexpected results and surprise.

## Test SOL-C01 Simulator & SOL-C01 New Dumps

According to the needs of all people, the experts and professors in our company designed three different versions of the SOL-C01 certification training dumps for all customers. The three versions are very flexible for all customers to operate. According to your actual need, you can choose the version for yourself which is most suitable for you to preparing for the coming exam. All the SOL-C01 Training Materials of our company can be found in the three versions. It is very flexible for you to use the three versions of the SOL-C01 latest questions to preparing for your coming exam.

## Snowflake Certified SnowPro Associate - Platform Certification Sample Questions (Q46-Q51):

### NEW QUESTION # 46

A data provider wants to share a secure view 'SECURE VIEW SALES' from database 'DB RETAIL' to a consumer account using

a private listing within the Snowflake Data Exchange. The provider has already created the listing. Which of the following steps are necessary to grant the consumer access, assuming the consumer account identifier is 'XYZ 12345'?

- A. Grant the 'IMPORTED PRIVILEGES' privilege on the share to the account 'XYZ12345'.
- B. Grant the 'IMPORTED PRIVILEGES' privilege on the database created from the share to a role and then grant that role to the consumer account 'XYZ 12345'.
- C. Create a new role, grant 'SELECT' on to the role, and grant that role to the consumer account 'XYZ12345'.
- D. Grant 'SELECT' privilege on the share to the account 'XYZ12345'.
- E. Add the consumer account 'XYZ12345' to the listing from the Data Exchange provider interface.

**Answer: E**

Explanation:

Adding the consumer account to the private listing from the Data Exchange provider interface is the action that allows the consumer to access the share. The other options are not directly related to providing access via a private listing within the Data Exchange. Granting privileges on the share is typically done for direct shares, not data exchange shares. Consumers consume the whole shared database.

#### NEW QUESTION # 47

What is a primary function of a view in Snowflake?

- A. Providing a virtual table based on the result set of a query
- B. Managing user authentication
- C. Storing raw data
- D. Executing network configurations

**Answer: A**

Explanation:

A view in Snowflake represents a virtual table whose contents are defined by a stored SQL query. Views allow users to encapsulate transformation logic, simplify complex joins, enforce column-level security, and provide curated datasets for downstream consumers. Views do not store data themselves; the underlying tables store the data, and Snowflake executes the view's query each time the view is referenced. This makes views ideal for abstraction layers, semantic modeling, and separating compute costs across user groups.

Incorrect options:

\* Snowflake views do not store raw data.

\* Views have no role in authentication or network configuration.

Views help streamline business logic and control data access efficiently.

#### NEW QUESTION # 48

You are tasked with creating a secure data sharing environment in Snowflake. You need to share a table named 'CUSTOMER RECORDS' from the 'SALES DB' database in your account (Account A) with another Snowflake account (Account B). You want to ensure that Account B can only query the data and cannot modify it in any way. Which of the following steps are REQUIRED to achieve this securely and effectively?

- A. Create a share object in Account A and grant USAGE privilege on the database and SELECT privilege on the table to the share.
- B. Grant OWNERSHIP on the 'CUSTOMER RECORDS' table to the target account (Account B).
- C. Create an external function that reads the data from Account A and presents it to Account B.
- D. Create a masking policy on all the columns of the 'CUSTOMER RECORDS' table before creating the share object.
- E. Create a database in Account B from the share provided by Account A, and grant SELECT privilege to the roles in Account B that need access.

**Answer: A,E**

Explanation:

To share data securely, you need to create a share object and grant appropriate privileges in the source account (A). This includes USAGE on the database and SELECT on the table. The target account (B) then creates a database from the share, which is a read-only copy of the data.

Finally, SELECT privilege must be granted to roles within account B to allow access. Granting OWNERSHIP to the target account (C) defeats the purpose of secure sharing and isn't required or best practice. External functions (D) are not the correct approach. Masking Policies (E) might be appropriate based on data sensitivity but aren't a fundamental requirement for simple data sharing.

#### NEW QUESTION # 49

What is the purpose of the ACCOUNTADMIN role in Snowflake? (Choose any 2 options)

- A. To monitor query performance
- B. To create and manage databases
- C. To grant and revoke privileges across the account
- D. To manage all aspects of the Snowflake account

**Answer: C,D**

Explanation:

The ACCOUNTADMIN role is Snowflake's highest-privileged system-defined role. It provides complete administrative authority across the entire Snowflake account. Its functions include:

- \* Managing global account parameters, replication settings, business continuity, failover groups, and region configurations
- \* Administering billing, resource monitoring, and governance
- \* Granting and revoking privileges across all objects and roles
- \* Overseeing role hierarchy, including SECURITYADMIN and SYSADMIN

It is typically reserved for platform owners and security/governance teams, following least-privilege principles.

"Create and manage databases" is primarily a SYSADMIN responsibility.

"Monitor query performance" can be accomplished by roles with MONITOR privileges; it is not exclusive to ACCOUNTADMIN.

#### NEW QUESTION # 50

What is the primary purpose of the COPY INTO command in Snowflake for data loading?

- A. To create new virtual warehouses.
- B. To manage user roles and permissions.
- C. To load data from staged files into a table.
- D. To replicate databases across regions.

**Answer: C**

Explanation:

COPY INTO <table> bulk-loads data from internal or external stages into Snowflake tables. It supports transformations, validation, and multiple file formats.

It does not replicate databases, manage roles, or create warehouses.

#### NEW QUESTION # 51

.....

There are some education platforms in the market for college students or just for the use of office workers, which limits the user groups of our SOL-C01 study guide to a certain extent. And we have the difference compared with the other SOL-C01 Quiz materials for our study materials have different learning segments for different audiences. We have three different versions of our SOL-C01 exam questions on the formats: the PDF, the Software and the APP online.
