Want to Get Cisco 300-710 Certified? Rely on UpdateDumps's Exam Questions for Easy Success

We will try our best to solve your problems for you. I believe that you will be more inclined to choose a good service product, such as 300-710 learning question. After all, everyone wants to be treated warmly and kindly, and hope to learn in a more pleasant mood. The authoritative, efficient, and thoughtful service of 300-710 learning question will give you the best user experience, and you can also get what you want with our study materials. I hope our study materials can accompany you to pursue your dreams. If you can choose 300-710 test guide, we will be very happy. We look forward to meeting you.

Cisco 300-710 (Securing Networks with Cisco Firepower) certification exam is a well-recognized and highly sought-after certification in the IT industry. Securing Networks with Cisco Firepower certification exam is designed to validate the skills and knowledge required to implement and manage security features of Cisco Firepower Next-Generation Firewall (NGFW), including

policy configuration, intrusion prevention system (IPS), and URL filtering. Securing Networks with Cisco Firepower certification is ideal for network security engineers, network administrators, and network architects who wish to enhance their skills in managing and securing Cisco Firepower NGFW.

Cisco Firepower is a suite of advanced security products that provide comprehensive network protection against a wide range of threats, including malware, viruses, and other forms of cyber-attacks. The Cisco 300-710 Exam focuses on the specific features and functionality of Cisco Firepower, including its advanced threat detection and prevention capabilities.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q33-Q38):

NEW QUESTION # 33

A security engineer is configuring an Access Control Policy for multiple branch locations. These locations share a common rule set and utilize a network object called INSIDE_NET which contains the locally significant internal network subnets at each location. What technique will retain the policy consistency at each location but allow only the locally significant network subnet within the application rules?

- A. utilizing a dynamic ACP that updates from Cisco Talos
- **B. creating an ACP with an INSIDE_NET network object and object overrides**
- C. utilizing policy inheritance
- D. creating a unique ACP per device

Answer: B

Explanation:

Section: Configuration

NEW QUESTION # 34

Refer to the exhibit.

An engineer is modifying an access control policy to add a rule to inspect all DNS traffic that passes it making the change and deploying the policy, they see that DNS traffic is not being inspected by the Snort engine. What is.....

- A. The rule must define the source network for inspection as well as the port.
- **B. The action of the rule is set to trust instead of allow.**
- C. The rule must specify the security zone that originates the traffic.
- D. The rule is configured with the wrong setting for the source port.

Answer: B

NEW QUESTION # 35

An engineer is configuring a Cisco FTD appliance in IPS-only mode and needs to utilize fail-to-wire interfaces. Which interface mode should be used to meet these requirements?

- A. passive
- B. routed
- C. transparent
- **D. inline set**

Answer: D

Explanation:

https://www.cisco.com/c/en/us/td/docs/security/firepower/630/configuration/guide/fpmc-config_guide-v63/inline_sets_and_passive_interfaces_for_firepower_threat_defense.html

NEW QUESTION # 36

A network administrator registered a new FTD to an existing FMC. The administrator cannot place the FTD in transparent mode. Which action enables transparent mode?

- A. Deregister the FTD device from FMC and configure transparent mode via the CLI.
- B. Assign an IP address to two physical interfaces.
- C. Add a Bridge Group Interface to the FTD before transparent mode is configured.
- D. Obtain an FTD model that supports transparent mode.

Answer: A

NEW QUESTION # 37

Which two statements about deleting and re-adding a device to Cisco FMC are true? (Choose two.)

- A. No option to re-apply NAT and VPN policies during registration is available, so users need to re-apply the policies after registration is completed.
- B. No option to delete and re-add a device is available in the Cisco FMC web interface.
- C. The Cisco FMC web interface prompts users to re-apply access control policies.
- D. Before re-adding the device in Cisco FMC, you must add the manager back in the device.
- E. An option to re-apply NAT and VPN policies during registration is available, so users do not need to re- apply the policies after registration is completed.

Answer: A,C

Explanation:

Section: Management and Troubleshooting
