SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q39-Q44):

NEW QUESTION # 39

What have SAP S/4HANA Cloud Business Workflows been designed for? Note: There are 3 correct answers to this question.

- A. To create very simple release or approval procedures
- B. To create complex, repeated work processes with iterative cycles
- C. To create standard procedures from SAP Signavio Process Navigator
- D. To create business processes with a high number of people involved in a pre-defined sequence
- E. To create cross-product workflow procedures

Answer: B,D,E

Explanation:

SAP S/4HANA Cloud Business Workflows are designed to enhance and automate business processes within the organization. They serve multiple purposes:

- * To create complex, repeated work processes with iterative cycles: These workflows are designed to handle intricate processes that occur regularly within the business environment, allowing for automation and efficiency in tasks that require repetition and involve multiple steps or conditions.
- * To create cross-product workflow procedures: This capability allows for the integration of various SAP products and services into a cohesive workflow, ensuring smooth and interconnected operations across different aspects of the business. It enables workflows that span across different SAP applications and solutions, providing a unified approach to managing business processes.
- * To create business processes with a high number of people involved in a pre-defined sequence: SAP S/4HANA Cloud Business Workflows are capable of handling processes that involve many participants, orchestrating the sequence of tasks to be completed by different individuals or departments. This ensures that each step of the process is executed in the right order by the right person, enhancing collaboration and efficiency.

NEW QUESTION # 40

What tools enable non-developers to create low/no-code extensions? Note: There are 2 correct answers to this question.

- A. SAP Fiori extensibility apps
- B. SAP Business Application Studio
- C. SAP Build
- D. SAP Cloud SDK

Answer: A,C

Explanation:

Tools that enable non-developers to create low/no-code extensions are designed to be user-friendly, requiring minimal to no programming knowledge, allowing business users to tailor applications to their specific needs. Among these tools, SAP Fiori extensibility apps and SAP Build stand out:

* SAP Fiori extensibility apps: These apps allow users to adapt the user interface and behavior of standard SAP Fiori apps without writing code. Users can personalize forms, fields, and workflows directly within the SAP Fiori environment, making it possible to adjust applications to meet specific business requirements.

* SAP Build: SAP Build is a suite of tools designed to enable users to create and enhance applications, automate processes, and design business sites with low-code or no-code approaches. It provides a user-friendly interface where users can drag and drop components, set up workflows, and integrate data without needing deep technical expertise.

NEW QUESTION # 41

Which embedded support offerings can you make use of in the SAP Fiori Launchpad? Note: There are 3 correct answers to this question.

- A. Recorded webinars from the SAP Learning Website
- B. Recorded system simulations from the Learning Center
- C. Video tutorials from the SAP Help Portal
- D. Digital assistance from generative AI (SAP Joule)
- E. Assessment questions from the SAP Learning Hub

Answer: B,C,D

Explanation:

The SAP Fiori Launchpad provides embedded support offerings that can help users learn and perform tasks more efficiently. These offerings include:

* Digital assistance from generative AI (SAP Joule): This is a conversational AI assistant that can answer user questions, provide guidance, and execute tasks using natural language. SAP Joule can be accessed by selecting the headphones icon in the top right corner of the SAP Fiori Launchpad and choosing the chat option.

* Recorded system simulations from the Learning Center: These are interactive tutorials that show users how to perform common tasks and scenarios in the SAP S/4HANA Cloud system. Users can access the simulations by selecting the question mark icon in the top right corner of the SAP Fiori Launchpad and choosing the graduation cap icon. The simulations are created with the SAP Enable Now tool and can be customized by customers if needed.

* Video tutorials from the SAP Help Portal: These are short videos that explain the features and functionalities of the SAP S/4HANA Cloud system and the SAP Fiori Launchpad. Users can access the videos by selecting the question mark icon in the top right corner of the SAP Fiori Launchpad and choosing the megaphone icon. The videos are also available on the SAP Help Portal website.

The other options are not embedded support offerings in the SAP Fiori Launchpad. Recorded webinars from the SAP Learning Website and assessment questions from the SAP Learning Hub are external learning resources that users can access separately from the SAP Fiori Launchpad. NEW QUESTION # 42

Where are the manual test cases created for customer User Acceptance Testing?

- A. SAP Cloud ALM
- B. SAP Signavio Process Navigator
- C. SAP Solution Manager
- D. Test Automation Tool

Answer: A

Explanation:

Manual test cases for customer User Acceptance Testing are created in SAP Cloud ALM, a cloud-based application lifecycle management solution that supports SAP S/4HANA Cloud Public Edition implementations. SAP Cloud ALM provides test management apps that allow consultants to document and track all testing activities for both manual and automated test cases in one location. Manual test cases are created in the Test Preparation app based on the finalized solution scope (business processes) and assigned to test plans in the Test Plans app. SAP Cloud ALM also integrates with the SAP S/4HANA Cloud test system and third-party test providers to execute and monitor automated test cases.
