New 1Z1-947 Exam Pass4sure Free PDF | Valid 1Z1-947 Exam Reference: Oracle GoldenGate 19c Implementation Professional

Revised and updated according to the syllabus changes and all the latest developments in theory and practice, our 1Z1-947 dumps are highly relevant to what you actually need to get through the certifications tests. Moreover they impart you information in the format of 1Z1-947 questions and answers that is actually the format of your real certification test. Hence not only you get the required knowledge but also find the opportunity to practice real exam scenario. For consolidation of your learning, our 1Z1-947 Dumps PDF file also provide you sets of practice questions and answers. Doing them again and again, you enrich your knowledge and maximize chances of an outstanding exam success.

Oracle GoldenGate 19c Implementation Professional Sample Questions

(Q113-Q118):

NEW QUESTION # 113

Table A has (ColA number Primary Key, ColB char(2), ColC varchar(10)) with one record with the following data: (1, 'AB', 'TestData') What will Extract capture by default for an update on ColC?

- A. After Image (1, 'AB', 'NewValue')
- B. Before Image (1, 'AB', 'TestData') + After Image (1, 'AB', 'NewValue')
- C. After Image (1, 'NewValue')
- D. Before Image (1, 'TestData') + After Image (1, 'NewValue')

Answer: B

Explanation:
By default, Oracle GoldenGate Extract captures both the before image and the after image of an update, including all key and updated columns, when:
* GETUPDATEBEFORES is enabled (default in many Extract configurations).
* UPDATERECORDFORMAT COMPACT (default) includes both before and after values in a single record.

NEW QUESTION # 114

A database that requires replication contains sensitive data that is not required on the target. How should you prevent this sensitive data from being replicated?

- A. Use the COLMAP option in the MAP parameter.
- B. Use the COLS and COLSEXCEPT options in the TABLE parameter.
- C. Do not specify those columns in the ADD TRANDATA command.
- D. Use the FILTER option in the MAP parameter.

Answer: B

Explanation:
To prevent sensitive data from being replicated, you should use the COLS and COLSEXCEPT options in the TABLE parameter. These options allow you to explicitly include or exclude specific columns from the replication process, ensuring that sensitive data is not transferred to the target database.

NEW QUESTION # 115

You have a table that has a primary key as well as an additional unique key. Failing to consistently identify a row will result in an error during conflict resolution. Which option solves this?

- A. Use the RESOLVECONFLICT feature to handle errors and resolve the conflict.
- B. Add unique indexes to the table to resolve the conflict.
- C. Use the HANDLECOLLISIONS feature to handle errors and resolve the conflict.
- D. Use the SQLEXEC feature to handle errors and resolve the conflict.

Answer: B

Explanation:
Oracle GoldenGate must consistently identify rows during replication using a primary or unique key. If row identification fails, adding or enforcing a unique index is the correct way to resolve the issue-not relying on collision or conflict-handling features.

NEW QUESTION # 116

Which tools would you use to determine if all Oracle GoldenGate processes are up and running?

- A. GGSCI
- B. tcpers
- C. Process report
- D. Oracle GoldenGate Monitor
- E. CMDSEC

Answer: A,C,D

Explanation:
Use GGSCI, process reports, or Monitor to check running processes.

NEW QUESTION # 117
Oracle GoldenGate can be deployed quickly and easily. You need to prepare the environment, configure and start change capture to GoldenGate trail files, perform Initial Load to synchronize databases, and configure and start change delivery. You can perform the tasks for Initial Load before or after starting change capture. When do you not need to do an Initial Load at all?

- A. You already have the tables and data on the target needed for replicating data changes.
- B. You need only to replicate to the new table on the target database with changes from the source table starting at a specific time.
- C. You don't need to address Initial Load as it is just optional.
- D. You created the target database with Initial Load enabled.

Answer: A

Explanation:
An Initial Load is used to synchronize source and target databases before real-time replication begins.

NEW QUESTION # 118
......

The emerging Oracle field creates a space for Oracle GoldenGate 19c Implementation Professional (1Z1-947) certification exam holders to accelerate their careers. Many unfortunate candidates don't get the Oracle 1Z1-947 certification because they prepare for its Oracle GoldenGate 19c Implementation Professional (1Z1-947) exam questions from a Oracle 1Z1-947 exam that dumps outdated material. It results in a waste of time and money. You can develop your skills and join the list of experts by earning this Oracle GoldenGate 19c Implementation Professional (1Z1-947) certification exam.
