Explanation:

Explanation:

When you register an application through the Azure portal, an application object and service principal are automatically created in your home directory or tenant.

NEW QUESTION # 169

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 170

Which two Azure resources can a network security group (NSG) be associated with? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. a virtual network subnet
- B. a network interface
- C. a resource group
- D. a virtual network
- E. an Azure App Service web app

Answer: A,B

Explanation:

Explanation

You can use an Azure network security group to filter network traffic to and from Azure resources in an Azure virtual network. A network security group contains security rules that allow or deny inbound network traffic to, or outbound network traffic from, several types of Azure resources.

NEW QUESTION # 171
