## New Latest Braindumps ITFAS-Level-1 Ebook | Efficient ITFAS-Level-1 Braindump Pdf: Inspection and Testing of Fire Alarm Systems Level I Exam

To suit customers' needs of the ITFAS-Level-1 preparation quiz, we make our ITFAS-Level-1 exam materials with customer-oriented tenets. Famous brand in the market with combination of considerate services and high quality and high efficiency ITFAS-Level-1 study questions. Without poor after-sales services or long waiting for arrival of products, they can be obtained within 5 minutes with well-built after-sales services.

### **NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample Questions (Q30-Q35):**

#### **NEW QUESTION # 30**

At which interval do duct smoke detectors utilized for HVAC shutdown need to be tested?

- A. Monthly

- B. Annually
- C. Semiannually
- D. Quarterly

**Answer: B**

Explanation:

Duct detectors are used to shut down air handling systems to prevent smoke from circulating. NFPA 72 requires that these detectors and their shutdown functions be tested annually.

NFPA 72 (2022), Table 14.4.3.2 - Testing Frequencies:

"Duct-type smoke detectors with HVAC shutdown" # Frequency: Annually.

The test must verify detector function and HVAC control activation.

Correct answer: D. Annually

#### **NEW QUESTION # 31**

How frequently should control equipment for a fire alarm system that is unmonitored for alarm, supervisory, and trouble signals be visually inspected?

- A. Annually
- B. Daily
- C. Semiannually
- D. Weekly

**Answer: B**

Explanation:

NFPA requires daily visual inspection of fire alarm control equipment if it is not monitored (not connected to a supervising station). This is to manually check for trouble lights, alarms, or other fault indications.

NFPA 72 (2022), Table 14.3.1 - Control Equipment (not monitored):

Visual inspection frequency: Daily

Correct answer: A. Daily

#### **NEW QUESTION # 32**

According to NFPA 72, in addition to the type of equipment, which additional factor should be considered when determining the frequency of cleaning system equipment?

- A. Local ambient conditions
- B. Frequency of periodic testing
- C. Number of devices per loop
- D. Age of the equipment

**Answer: A**

Explanation:

The need to clean devices such as detectors is influenced by the environment they are installed in, not just their type or age. Dusty, smoky, or humid environments will require more frequent cleaning.

NFPA 72 (2022), Section 14.4.1.3:

"The frequency of cleaning shall be determined by the manufacturer's instructions and the local ambient conditions." Correct answer: C. Local ambient conditions

#### **NEW QUESTION # 33**

After 15 years, what should be done with nonrestorable, spot-type heat detectors in lieu of testing?

- A. Replace all devices
- B. Replace 15 devices
- C. Replace 5 devices
- D. Replace 2 devices

### **Answer: A**

Explanation:

If you choose not to send a sample of devices to a lab for testing, then all nonrestorable, fixed-temperature spot-type heat detectors must be replaced after 15 years.

NFPA 72 (2022), Section 14.4.4.4.1:

"After 15 years from the date of installation, all fixed-temperature, nonrestorable heat detectors shall be replaced or tested using a method approved by the manufacturer." If testing is not performed, then replacement of all devices is required.

Correct answer: D. Replace all devices

### **NEW QUESTION # 34**

At minimum, how often must smoke duct detectors be visually inspected?

- A. Monthly
- **B. Quarterly**
- C. Annually
- D. Semiannually

### **Answer: B**

Explanation:

Duct smoke detectors must be inspected visually to check for cleanliness, mounting condition, and airflow alignment. The minimum frequency is quarterly.

NFPA 72 (2022), Table 14.3.1 - Visual Inspection Frequencies:

"Duct detectors (smoke)" # Frequency: Quarterly

This helps ensure proper functionality in HVAC systems.

Correct answer: B. Quarterly

### **NEW QUESTION # 35**
