

# 2026 SAP The Best C\_ADBTP: Valid Administrating SAP Business Technology Platform(C\_ADBTP\_2601) Cram Materials

By offering you excellent C\_ADBTP dumps files, Pass4guide make you career bright and successful. We will offer you discount in buying C\_ADBTP exam pdf. Once you buy our SAP practice questions, you will receive the download link immediately. Our aim is to provide our customers with latest exam study guide and the best-quality service. The up-to-date C\_ADBTP Practice Questions and answers are right here.

Pass4guide online digital C\_ADBTP exam questions are the best way to prepare. Using our C\_ADBTP exam dumps, you will not have to worry about whatever topics you need to master. The C\_ADBTP practice test Pass4guide keeps track of each previous attempt and highlights the improvements with each attempt. The C\_ADBTP Mock Exam setup can be configured to a particular style & arrive at unique questions. SAP C\_ADBTP practice exam went through real-world testing with feedback from more than 90,000 global professionals before reaching its latest form.

## Valid C\_ADBTP Cram Materials Newest Questions Pool Only at Pass4guide

During these years, our PDF version of our SAP C\_ADBTP study engine stays true to its original purpose to pursue a higher pass rate that has never been attained in the past. And you will be content about our considerate service on our SAP C\_ADBTP training guide. If you have any question, you can just contact us!

## SAP Administrating SAP Business Technology Platform(C\_ADBTP\_2601) Sample Questions (Q10-Q15):

### NEW QUESTION # 10

#### SIMULATION

Create Directories and Subaccounts

In a global account for SAP Business Technology Platform (BTP), create a hierarchy of subaccounts using directories.

Task 1: Create Directories

In your SAP BTP cockpit, create the directory Americas (Description: Americas Accounts) with your global account as the parent.

Create the directory Eurasia (Description: Eurasia Accounts) with your global account as the parent.

Create the directory Partner (Description: Partner Accounts) with the Americas directory as the parent. Add the label access with value external.

Create the directory Human Resources (Description: Human Resources Accounts) with the Eurasia directory as the parent. Add the label access with value internal.

#### Answer:

Explanation:

See the Explanation below for complete solution

Explanation:

## Task 1: Create Directories

You need to create these directories:

Americas

Eurasia

Partner under Americas with label access=external

Human Resources under Eurasia with label access=internal

Before You Start

Log in to the SAP BTP Cockpit.

Make sure you are inside the correct Global Account.

Open the left-side navigation menu.

Why this is important:

All directories in this task must be created inside the correct global account hierarchy. If you create them in the wrong location, the simulation result will be incorrect.

Step 1 - Create Directory Americas

What to do

In the SAP BTP Cockpit, select your Global Account.

In the left navigation menu, click Directories.

Click Create or Create Directory.

Fill the fields as follows:

Name: Americas

Description: Americas Accounts

Parent: your Global Account

Click Create.

**Create Directory**

Display Name *	Description
Americas	Americas Accounts

Parent \*

BTP Admin Certification xxxxx

> **Advanced**

Cockpit supports multi-level directories in your account structure. You can add your new directory directly to the root global account or to an existing directory by choosing the location under **Parent**.

**Create** **Cancel**

Explanation:

This creates a top-level directory directly under the global account.

It will later be used as the parent for the Partner directory.

What to verify

After creation, you should see:

Americas

listed under the directories of the global account.

Step 2 - Create Directory Eurasia

What to do

Stay in Directories.

Click Create Directory again.

Fill the fields:

Name: Eurasia

Description: Eurasia Accounts

Parent: your Global Account

Click Create.

Explanation:

This creates another top-level directory, parallel to Americas.

What to verify

You should now see both:

Americas

Eurasia

under the global account.

Step 3 - Create Directory Partner under Americas

What to do

In the Directories area, select Americas.

Click Create Directory.

Enter:

Name: Partner

Description: Partner Accounts

Parent: Americas

Locate the Labels section.

Add a new label:

Key: access

Value: external

Click Create.

Name	Type	Environment	Provider	Region	Changed On
BTP Admin Certification xxxx	Global Account				March 25, 2026, 5:11:2...
Americas	Directory				March 26, 2026, 3:27:5...
Eurasia	Directory				March 26, 2026, 9:28...

## Select Parent

Show only directories I can create in [Expand All](#) [Collapse All](#)

▼  BTP Admin Certification xxxx

- Americas
- Eurasia

## Create Directory

Display Name\*  ®

Parent\*  

Description

Advanced

Enable entitlement management   Enable user management 

Add labels to this directory. 

Name:  Values:  

Explanation:

This creates Partner as a child directory under Americas.

The label is required and must be entered exactly:

access = external

This label helps classify the directory.

What to verify

Under Americas, you should now see:

Partner

and the directory should contain the label:

access=external

Step 4 - Create Directory Human Resources under Eurasia

What to do

Go back to the Directories list.

Select Eurasia.

Click Create Directory.

Enter:

Name: Human Resources

Description: Human Resources Accounts

Parent: Eurasia

In the Labels section, add:

Key: access

Value: internal

Click Create.

**Create Directory**

Display Name\*  Description

Parent\*

**Advanced**

Enable entitlement management  Enable user management

Add labels to this directory.

Name:  Values:

**Create** **Cancel**

Explanation:

This creates Human Resources as a child directory under Eurasia.

The required label is:

access = internal

What to verify

Under Eurasia, you should now see:

Human Resources

and the label should be:

access=internal

Final Expected Directory Structure

After completing Task 1, your structure must be exactly like this:

Global Account

Americas

Partner

Label: access=external

Eurasia

Human Resources

Label: access=internal

Name	Type	Environment	Provider	Region	Labels	Changed On
STP Admin Certification: XXXX	Global Account					March 20, 2026, 6:56:2...
Americas	Directory				1 label	March 22, 2026, 4:29:1...
Partner	Directory				1 label	March 22, 2026, 4:29:2...
Eurasia	Directory				1 label	March 22, 2026, 4:26:0...
Human Resources	Directory				1 label	March 22, 2026, 4:31:0...

Important Checks Before Moving On

Verify all of the following:

Americas exists

Eurasia exists

Partner is under Americas

Human Resources is under Eurasia

Partner has label access=external

Human Resources has label access=internal

All names and descriptions are entered exactly as required

Common Mistakes to Avoid

1. Wrong parent

Partner must be created under Americas

Human Resources must be created under Eurasia

2. Wrong label key or value

Use exactly:

access → external

access → internal

3. Spelling errors

Be careful with:

Americas

Eurasia

Partner

Human Resources

4. Creating all directories directly under the global account

Only Americas and Eurasia are direct children of the global account.

Partner and Human Resources must be child directories.

## NEW QUESTION # 11

### SIMULATION

Establish Shared Services

Task 2: Entitle and Subscribe a Service in a Shared Subaccount

In your SAP BTP cockpit, in your SH Dev subaccount, entitle one standard (Application) service plan for the SAP Build Work Zone, advanced edition.

In the SH Dev subaccount, establish a trust to the agvlankzw.accounts.ondemand.com identity provider.

In your SH Dev subaccount, create a service subscription for SAP Build Work Zone, advanced edition with the standard service plan.

### Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to the Shared Services directory.

Open the SH Dev subaccount.

This matters because all three required actions must be done inside SH Dev, not in the directory and not in another subaccount.

Part 1 - Entitle the service in SH Dev

Step 1 - Open the subaccount

In the cockpit, choose Directories.

Open Shared Services.

Select SH Dev.

You should now be on the SH Dev subaccount page.

Step 2 - Open Entitlements

In SH Dev, choose Entitlements.

SAP documents that service plans and quotas for a subaccount are added in the subaccount's Entitlements are a.

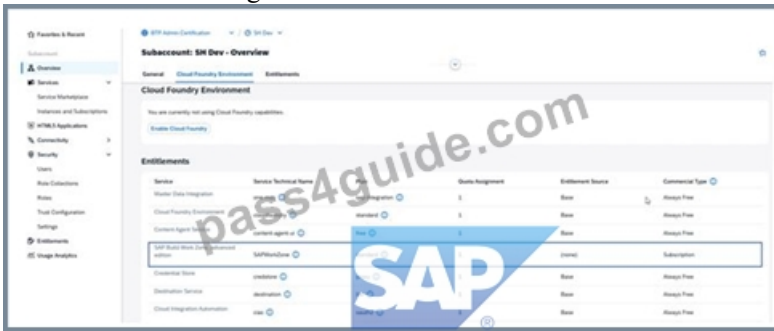

Step 3 - Add the required service plan

Click Configure Entitlements or Add Service Plans.

Search for SAP Build Work Zone, advanced edition.

Select the service.

Choose the plan standard (Application).  
 Set the quantity to 1 if a quota/amount field is shown.  
 Save the entitlement changes.

This task explicitly asks for one standard (Application) service plan. SAP Help also notes that SAP Build Work Zone usage depends on the correct entitlement being available in the subaccount first.

Verify

Under Entitlements, you should now see:  
 SAP Build Work Zone, advanced edition  
 plan: standard (Application)  
 quantity: 1 if shown

Part 2 - Establish trust to the identity provider

Step 4 - Open Trust Configuration

In SH Dev, go to Security.

Choose Trust Configuration.

SAP Help states that trust to a custom identity provider is established from Security > Trust Configuration in the SAP BTP cockpit.

Step 5 - Create the trust

Click Establish Trust.

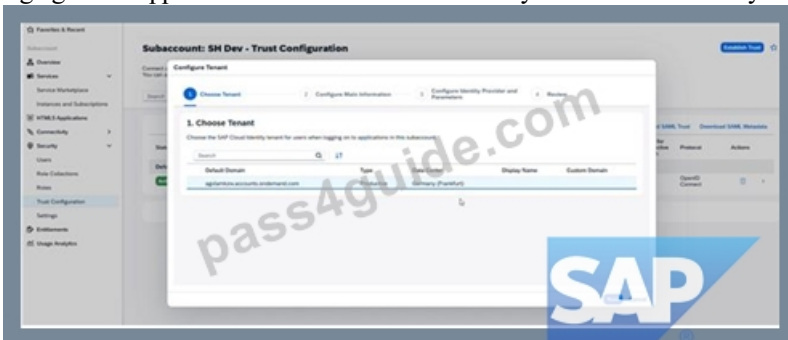

Enter or select the identity provider:

agvlankzw.accounts.ondemand.com

Continue through the wizard.

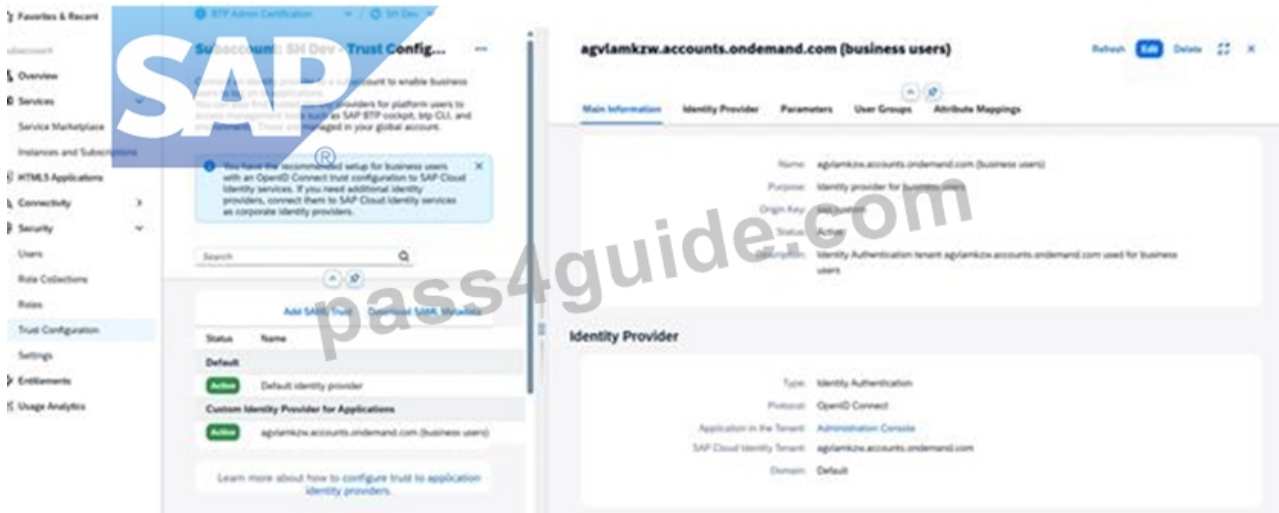

Save the trust configuration.

SAP documents that to use a custom identity provider, the subaccount must have a trust relationship to that provider. SAP also highlights that apps such as SAP Build Work Zone rely on SAP Cloud Identity Services trust configuration.

Verify

On the Trust Configuration page, you should see:  
 agvlankzw.accounts.ondemand.com  
 as a trusted identity provider.

Part 3 - Create the subscription

Step 6 - Open Instances and Subscriptions

In SH Dev, go to Services.

Choose Instances and Subscriptions.

Step 7 - Create the subscription

Click Create.

Choose Subscription if the cockpit asks for a type.

Search for SAP Build Work Zone, advanced edition.

Select the service.

Choose the plan standard.

Confirm the creation.

SAP Help for SAP Build Work Zone scenarios indicates that the subaccount needs the correct entitlements and subscription flow to expose and use SAP Build Work Zone content.

Step 8 - Confirm subscription status

Stay on Instances and Subscriptions.

Check that the new subscription appears and is active.

Verify

You should see:

SAP Build Work Zone, advanced edition

plan: standard

subscription created successfully

## New Instance or Subscription

1

Basic Info

Enter basic info for your instance or subscription.

**i** Some services are not shown because Cloud Foundry is not enabled. To enable it, select it from the Service dropdown menu and create an instance of it.

Service: \* 

Can't find what you're looking for?

SAP Build Work Zone, advanced edition

Plan: \*

standard

Create Cancel

Final expected result

Inside SH Dev:

the entitlement for SAP Build Work Zone, advanced edition exists

the entitled plan is standard (Application)

trust is established to agvlamkzw.accounts.ondemand.com

a subscription exists for SAP Build Work Zone, advanced edition

the subscription uses the standard plan

Common mistakes to avoid

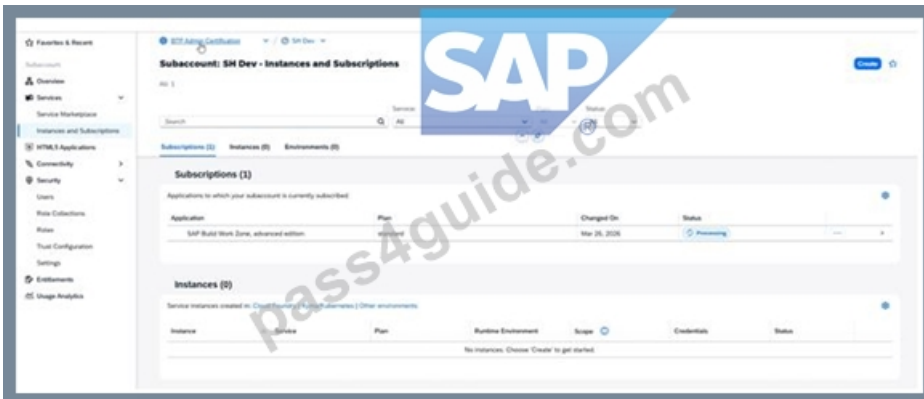

Doing the entitlement in Shared Services directory instead of SH Dev

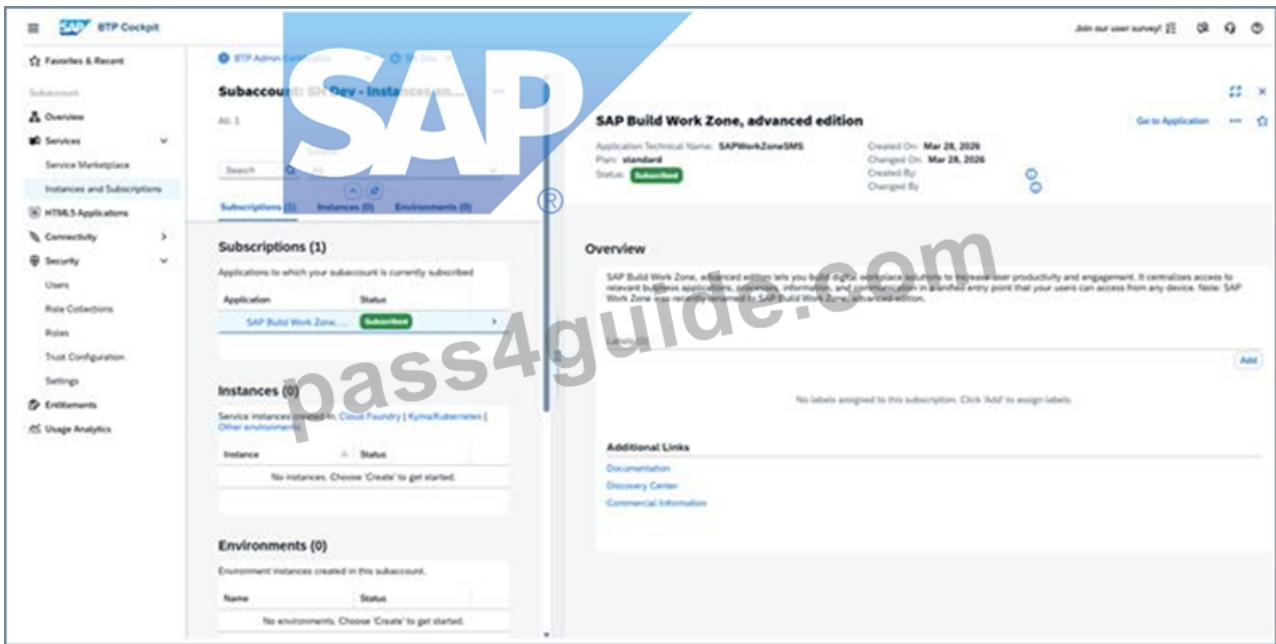

Choosing SAP Build Work Zone, standard edition instead of advanced edition

Choosing the wrong plan; the entitlement must be

standard (Application) Forgetting the trust step to agvlamkzw.accounts.ondemand.com

Trying to subscribe before the entitlement exists

## NEW QUESTION # 12

### SIMULATION

Enable Service Subscriptions

In the entitlements of a directory, add a service plan for a service subscription. Assign and create this subscription to/in a subaccount of the directory.

Task 1: Entitle a Service in a Directory

In your SAP BTP cockpit, enable entitlement management for your Partner directory.

In your Partner directory, entitle the standard (Application) service plan for the SAP Build Work Zone, standard edition.

### Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both actions in this task must be done at the Partner directory level, not directly in a subaccount.

Step 1 - Open the Partner Directory

What to do

In the left navigation, click Directories.

Select Partner.

Explanation:

This opens the directory where you must manage entitlements for this task.

What to verify

You should now be inside the Partner directory page.

### Select Subaccounts and Directories

Search  All

Show only subaccounts [Select All](#) [Unselect All](#) [Expand All](#) [Collapse All](#)

▼  BTP Admin Certification

			Assigned (1 unit)	<input type="checkbox"/>		v

Explanation:

This opens the service catalog where you can select the service and plan to add.

What to verify

You should see the list of available services and plans.

## Directory Partner: Add Service Plans

**Solutions:**  
All [x] Q

**Services available to this directory**

- business process model connector for SAP Signavio solutions
- Master Data Integration
- SAP Build Work Zone, advanced edition
- SAP Build Work Zone, standard edition**
- SAP Master Data Integration Tenant
- SAP Task Center

1 selected plan  
Services: SAP Build Work Zone, standard edition (1 plan)

**Service Details: SAP Build Work Zone, standard edition**

- foundation **Always Free**  
Sets up the technical requirements for running SAP solutions that utilize the foundation service, such as SAP Start. Please don't manually subscribe to it.  
Features: Sets up the technical requirements for running SAP solutions that utilize the foundation service, such as SAP Start. Please don't manually subscribe to it.
- > Availability by Region and Data Center
- > Entitlement Sources
- standard (Application)**  
Build business sites that serve as a unified entry point to applications.
- > Availability by Region and Data Center
- > Entitlement Sources
- foundation (Application) **Always Free**  
Sets up the technical requirements for running SAP solutions that utilize the foundation service, such as SAP Start. Please don't manually subscribe to it.
- > Availability by Region and Data Center
- > Entitlement Sources

**Add 1 Service Plan** Cancel

### Step 5 - Find the Required Service

What to do

Search for or scroll to:

SAP Build Work Zone, standard edition

Select that service.

Explanation:

You must choose the exact service named in the task. Be careful not to select a different SAP Build service by mistake.

What to verify

The selected service should be:

SAP Build Work Zone, standard edition

### Step 6 - Select the Correct Service Plan

What to do

Under the selected service, choose the service plan:

standard (Application)

Add the plan to the entitlement configuration.

Explanation:

This task requires the standard (Application) service plan specifically.

Do not choose another plan if more than one is listed.

What to verify

The selected plan should read exactly:

standard (Application)

### Step 7 - Save the Entitlement Changes

What to do

Click Add, Save, or Confirm depending on the screen.

Then click Save for the entitlement configuration.

Explanation:

This commits the new service plan entitlement to the Partner directory.

What to verify

After saving, the entitlements list for Partner should include:

SAP Build Work Zone, standard edition

plan: standard (Application)

Credential Store	credstore	proxy	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
Destination Service	destination	lite	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
Feature Flags Service	feature-flags-dashboard	dashboard (Application)	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
	feature-flags	standard	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
		lite	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
HTML5 Application Repository Service	html5-apps-repo	app-host	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
		app-runtime	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
Print Service	print	receiver	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
SaaS Provisioning Service	saas-registry	application	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
SAP Build Work Zone, standard edition	SAPLaunchpad	standard (Application)	Assigned (1 unit)	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Service Manager	service-manager	service-operator-access	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
		global-offerings-audit	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
		subaccount-audit	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
		subaccount-admin	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
		container	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>

Final Expected Result for Task 1

Inside the Partner directory:

Entitlement management is enabled

The service SAP Build Work Zone, standard edition is entitled

The plan standard (Application) is added

Common Mistakes to Avoid

1. Working in the wrong level

Do this in:

Partner directory

Not in:

Global Account

Subaccount

Another directory

2. Forgetting to enable entitlement management first

If entitlement management is not enabled for the directory, you may not be able to add the service plan properly.

3. Choosing the wrong service

Be sure you select:

SAP Build Work Zone, standard edition

Not another SAP Build service.

4. Choosing the wrong plan

You must select:

standard (Application)

## NEW QUESTION # 13

### SIMULATION

Enable a Cloud Foundry Environment

Add a service plan for Cloud Foundry environment and enable it in a subaccount.

Task 1: Add a Service Plan for Cloud Foundry Environment

In your SAP BTP cockpit, in your EU HCM Dev subaccount, entitle one MEMORY service plan for the Cloud Foundry Runtime.

### Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to the Human Resources directory.

Open the EU HCM Dev subaccount.

This matters because the runtime memory quota must be assigned to the EU HCM Dev subaccount specifically. SAP documents that the MEMORY plan is the quota-bearing plan for Cloud Foundry Runtime.

Step 1 - Open the EU HCM Dev subaccount

In the cockpit, choose Directories.

Open Human Resources.

Select EU HCM Dev.

You should now be on the EU HCM Dev subaccount page.

## Step 2 - Open Entitlements

In EU HCM Dev, choose Entitlements.

SAP Help confirms that service plans and quota assignments for a subaccount are configured in the Entitlements area.

## Step 3 - Configure entitlements

Click Configure Entitlements or Add Service Plans.

Search for:

Cloud Foundry Runtime

In SAP Help, this appears as Cloud Foundry Runtime (APPLICATION\_RUNTIME), and the relevant plan for assigning runtime memory is MEMORY.

## Step 4 - Select the MEMORY plan

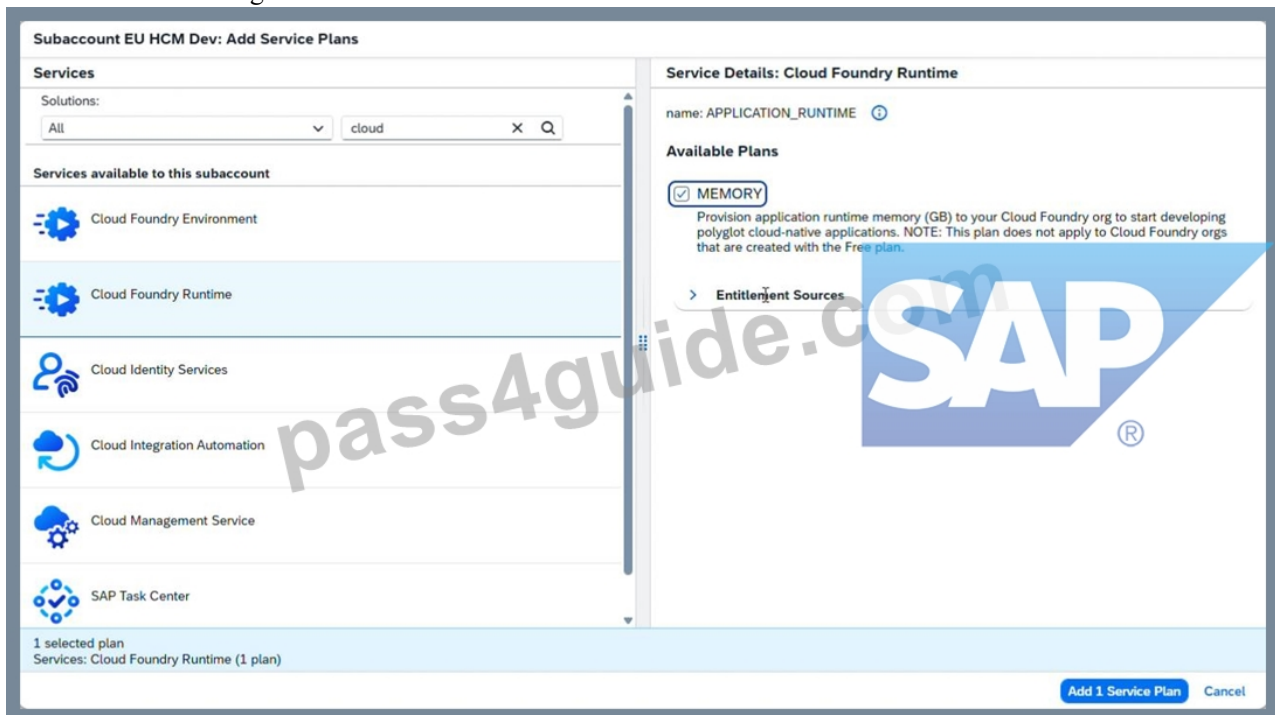

Under Cloud Foundry Runtime, select:

MEMORY

Set the quantity to 1 if the cockpit shows an amount/quota field.

Add the plan to the subaccount.

Save the entitlement changes.

SAP documents that the MEMORY plan is specifically used to assign runtime memory quota to the subaccount, and that 1 unit corresponds to 1 GB of runtime memory when quota is adjusted or assigned.

## Step 5 - Verify the result

After saving, check the Entitlements page of EU HCM Dev.

You should see:

Cloud Foundry Runtime

plan: MEMORY

quantity: 1 if shown

Final expected result

Inside EU HCM Dev:

Cloud Foundry Runtime is entitled

the service plan is MEMORY

the assigned amount is 1 if the cockpit displays quantity/quota units

Common mistakes to avoid

Doing this in the wrong subaccount; it must be EU HCM Dev

Choosing the wrong Cloud Foundry plan; the task asks for MEMORY

Forgetting to save the entitlement change after adding the plan

Confusing the runtime memory entitlement with the later step of actually enabling the Cloud Foundry environment; SAP distinguishes the MEMORY runtime quota from enabling the Cloud Foundry org itself

## NEW QUESTION # 14

.....

This way you will be able to experience the actual Adminstrating SAP Business Technology Platform(C\_ADBTP\_2601) exam environment and become a more prepared and confident candidate to step into the examination center. You will know where exactly you stand before the actual SAP C\_ADBTP Certification Exam. The actual SAP C\_ADBTP exam questions will make you familiar with the inside-out view of the exam pattern and syllabus.
