

# HPE7-J02 Updated Dumps | Exam HPE7-J02 Simulator

P.S. Free & New HPE7-J02 dumps are available on Google Drive shared by VCEPrep: <https://drive.google.com/open?id=154CRNSgGRnXWtoXanfbembU-2508MbgG>

At the VCEPrep, we guarantee that our customers will receive the best possible HPE7-J02 study material to pass the HP HPE7-J02 certification exam with confidence. Joining this site for the Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) exam preparation would be the greatest solution to the problem of outdated material. The HPE7-J02 would assist applicants in preparing for the HP HPE7-J02 exam successfully in one go HPE7-J02 would provide HPE7-J02 candidates with accurate and real HPE7-J02 Dumps which are necessary to clear the HP HPE7-J02 test quickly.

As you can find on our website, our HPE7-J02 practice questions have three versions: the PDF, Software and APP online. If you want to study with computers, our online test engine and the windows software of the HPE7-J02 exam materials will greatly motivate your spirits. The exercises can be finished on computers, which can help you get rid of the boring books. The operation of the HPE7-J02 Study Guide is extremely smooth because the system we design has strong compatibility with your computers.

## HPE7-J02 Sure-Pass Torrent: Advanced HPE Storage Integrator Solutions Written Exam - HPE7-J02 Test Torrent & HPE7-J02 Exam Guide

Our customers receive HP HPE7-J02 questions updates for up to 365 days after their purchase. They can also try a free demo for satisfaction before buying our HP HPE7-J02 dumps. And a 24/7 support system assists them whenever they are stuck in any problem or issue. This HP HPE7-J02 Questions is a complete package and a blessing for candidates who want to prepare quickly for the HPE7-J02 exam. Buy It Now!

## HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q24-Q29):

### NEW QUESTION # 24

Select the scenario where implementing FCoE would be an appropriate solution.

- A. A company with data centers in different states wants to establish a unified SAN infrastructure. The goal is to centralize storage management across all sites, using a single protocol that can efficiently handle high-latency, long-distance connections between data centers.
- B. A corporation needs to replicate data between data centers in different countries. The data must be synchronized in real-time across a WAN, and the solution must tolerate variable network conditions with minimal impact on performance.
- C. A tech startup is developing an AI-based application that relies heavily on machine learning models. The team needs a solution that allows them to access and process large datasets in the cloud.
- **D. A large enterprise data center with existing Fibre Channel SANs is looking to reduce hardware complexity and costs by consolidating their storage and production networks onto a single infrastructure, while maintaining high performance for mission-critical applications.**

**Answer: D**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Option A is correct because Fibre Channel over Ethernet (FCoE) is designed for large enterprise environments that already have Fibre Channel (FC) infrastructures but want to simplify cabling and reduce hardware by converging LAN and SAN traffic over a single Ethernet fabric. FCoE retains the efficiency, low latency, and reliability of Fibre Channel while leveraging Ethernet to minimize physical infrastructure costs.

This aligns with HPE's best practices for environments using HPE Alletra 9000/Primera or HPE Nimble arrays connected to converged networks where cost reduction and high performance are equally important.

Analysis of Incorrect Options (Distractors):

B: Real-time replication across WANs requires protocols like HPE 3PAR/Alletra Remote Copy, asynchronous/synchronous replication, or HPE Peer Persistence. FCoE is not suited for high-latency WANs because it is a LAN protocol designed for short distances within a data center.

C: For inter-data center SAN unification, FCIP (Fibre Channel over IP) or iSCSI are more suitable. FCoE does not handle long-distance high-latency links effectively.

D: A startup building AI applications with cloud workloads typically benefits from object storage (HPE Scality RING, HPE GreenLake for File and Object) or direct cloud-native APIs (S3/Blob). FCoE is irrelevant in this use case since it is on-prem and infrastructure-focused.

Key Concept:

The question is testing knowledge of FCoE and its appropriate deployment scenarios - specifically, its role in consolidating storage and network traffic inside enterprise data centers while preserving Fibre Channel protocol advantages.

## NEW QUESTION # 25

A financial services company is planning to upgrade its data center infrastructure. Their considerations are:

Budget Management: Prefer one-time expense, avoid variable costs.

Flexibility: Growth planned in yearly budget cycles.

Ownership: Want to own equipment outright.

Operational Control: Full control of equipment lifecycle and customization.

Which procurement option best meets these needs?

- A. Operating lease
- B. Capital lease
- C. Capital purchase
- D. Consumption model

**Answer: C**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

The requirements align with a Capital Purchase - outright ownership with a one-time CapEx expense. This provides complete lifecycle control and no ongoing payments, fitting the financial services company's budgeting and governance model.

Distractors:

A: Operating lease is OpEx, variable payments, and no ownership.

B: Capital lease provides eventual ownership but still requires periodic lease payments.

C: Consumption model (e.g., GreenLake) uses variable OpEx, opposite of the customer's request.

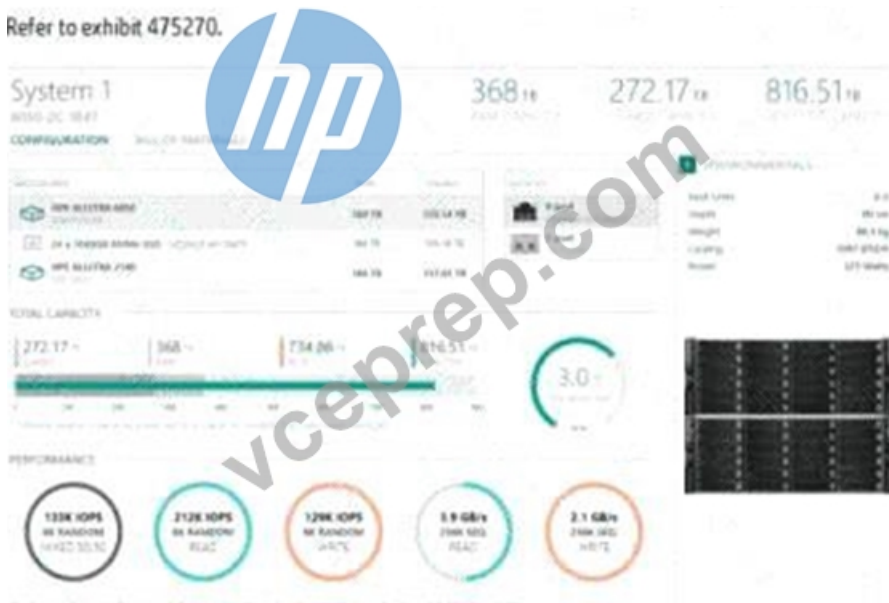

Key Concept: CapEx model = one-time purchase, ownership, full control.

Reference: HPE Financial Services Procurement Options Guide.

## NEW QUESTION # 26

The storage solution based on the exhibit is deployed at a customer site.

Refer to exhibit 475270.

How can the sequential read performance values be enhanced for this configuration?

- A. By replacing 10/25 Gb with a 32 Gb FC HBA
- B. By adding SCM to the solution
- C. By adding another expansion shelf
- D. By increasing the amount of 10/25 Gb NICs

**Answer: D**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

The exhibit shows a system delivering ~2.3 GB/s sequential read. For large-block sequential workloads, aggregate host link bandwidth (number × speed of front-end ports) is the primary limiter. Increasing the count of 10/25 Gb iSCSI NICs adds parallel lanes, raising sustained read GB/s to the hosts. This is a recommended first step in HPE sizing before changing protocols.

Analysis of Incorrect Options (Distractors):

A: Adding an expansion shelf increases capacity, not front-end bandwidth.

C: Moving to 32 Gb FC can help, but simply adding more existing 10/25 Gb ports achieves the same goal without a protocol/adaptor change and is the straightforward, supported scale-out path.

D: SCM (Storage Class Memory) targets latency/IOPS; it doesn't materially lift sequential GB/s if the link budget is the bottleneck.

Key Concept: Scale front-end connectivity to increase sequential throughput; capacity or media class changes won't fix a link-limited system.

Reference: HPE Alletra 6000/MP Sizing and Host Connectivity Guidelines (throughput scaling via additional host ports).

### NEW QUESTION # 27

Your customer has 2 Alletra 6000 arrays configured for asynchronous replication. The facilities team is planning grid maintenance in the datacenter hosting the source array. They want to proactively move all host I/O to the target array.

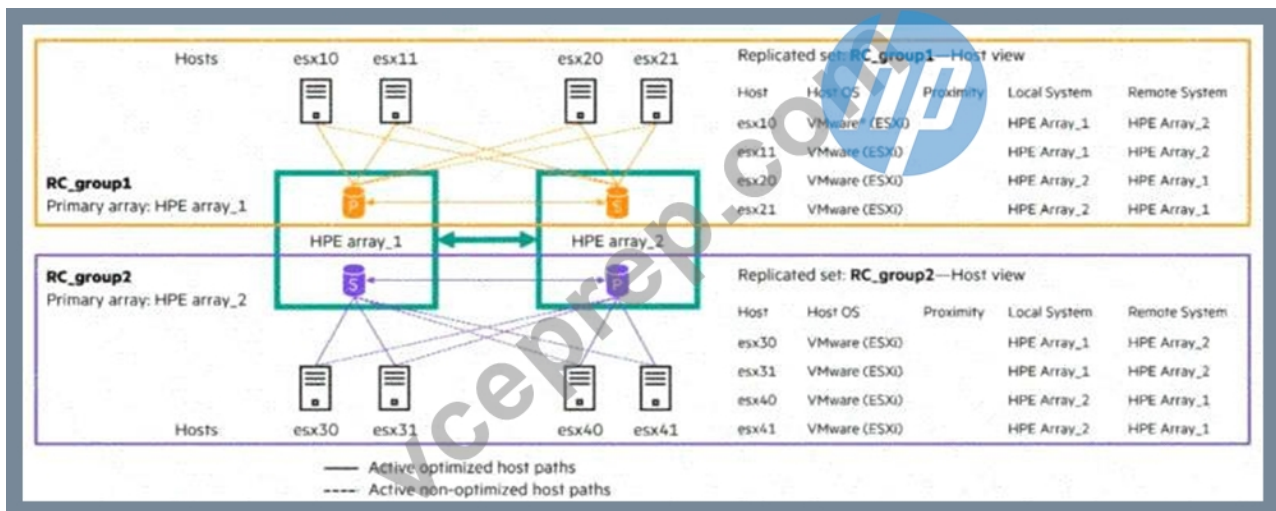

Which action needs to be done on the Alletra group level to move the host I/O to the other datacenter?

- A. Promote
- B. Failover
- C. Handover
- D. Demote

**Answer: B**

### NEW QUESTION # 28

Review the diagram showing an Active Peer Persistence deployment across two arrays.

Question: Which Host Proximity Parameter should be configured for ESX31 to ensure localized access?

- A. Exclusive
- B. All
- C. Secondary
- D. Primary

Answer: C

#### NEW QUESTION # 29

.....

VCEPrep HPE7-J02 practice test simulates the real HP HPE7-J02 exam environment. This situation boosts the candidate's performance and enhances their confidence. After attempting the HPE7-J02 practice exams, candidates become more familiar with a real Advanced HPE Storage Integrator Solutions Written Exam HPE7-J02 Exam environment and develop the stamina to sit for several hours consecutively to complete the HPE7-J02 exam. This way, the actual Advanced HPE Storage Integrator Solutions Written Exam HPE7-J02 exam becomes much easier for them to handle.
