Reliable PL-200 Valid Test Preparation & Useful PL-200 Reliable Exam Pattern & Correct New PL-200 Exam Fee

With limited time for your preparation, many exam candidates can speed up your pace of making progress. Our PL-200 practice materials will remedy your faults of knowledge understanding. Many customers get manifest improvement and lighten their load. As we know, some people failed the exam before, and lost confidence in this agonizing exam before purchasing PL-200 Training

Materials. We are here divide grieves with you. You can abandon the time-consuming thought from now on. In contrast, they will inspire your potential without obscure content to feel. After getting our PL-200 exam prep, you will not live under great stress during the exam period.

Microsoft Power Platform is a collection of tools that allow users to create, automate, and analyze business processes across all Microsoft applications. These tools include Power Apps, Power BI, Power Automate, and Power Virtual Agents. With the Power Platform, businesses can streamline their workflows, improve productivity, and make better decisions.

Microsoft Power Platform Functional Consultant Sample Questions (Q196-Q201):

NEW QUESTION # 196
You need to build a Power Bl dashboard for sales managers to track opportunities.
When a new sale closes that is greater than S1 million, a notification must pop up and an email must be sent to the leadership team.
You need to ensure the email is sent without editing the Microsoft Dataverse.
Which two elements should you configure? Each correct answer is part of the solution.
NOTE: Each correct selection is worth one point.

- A. a Power Automate flow
- B. a custom connector
- C. a calculated column in the Dataverse
- D. a paginated report to save to Microsoft OneDrive
- E. alerts in Power Bl

Answer: A,E

Explanation:
In order to build a Power Bl dashboard for sales managers to track opportunities and send notifications and emails when a new sale closes that is greater than S1 million, you should configure:
A: alerts in Power Bl: You can set up alerts in Power Bl that will trigger when a specific condition is met. For example, you can set an alert to trigger when the value of a specific field in the "Opportunities" table exceeds
$1 million.
E: a Power Automate flow: To send an email to the leadership team when an alert is triggered, you can create a Power Automate flow that is triggered by the Power Bl alert. The flow can then use the "Send an email" action to send an email to the leadership team with the necessary information about the sale that exceeded $1 million.

NEW QUESTION # 197
Drag and Drop Question
A company is creating a business process flow in Power Automate to analyze the probability that a customer will buy a specific product.
The company uses ratings from zero to one hundred. The company assigns likelihoods based on the following table:
You need to define the business process steps. All logic must be included in a single evaluation statement.
Which step should you use? To answer, drag the appropriate steps to the correct ratings. Each step may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:
1 - conditional branch (if..)
2 - conditional branch (if..)
3 - default action (else)

NEW QUESTION # 198

You make the following customizations to a Microsoft Dataverse Environment
* Create a new table
* Add data to the new table.
* Delete an unused area from the site map.
The components must be transported to a different environment.
You need to determine the method required to transport each component.
Which method should you use? To answer, drag the appropriate methods to the correct components. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 199
A company is using Dataverse with a custom table named Prospects. The Prospects table has a lookup to the Account table. SharePoint document management is configured in the environment but is not configured for the Prospects table. All documents saved as part of the integration must be accessed by using an Account row linked to the Prospects table.
Based on new requirements from end users, the Prospects table must be reconfigured for use with the document management feature.
You need to configure the integration.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

NEW QUESTION # 200
A car dealership has a Dynamics 365 Sales environment for its sales company and another environment for its leasing company. Users in one environment must not be able to see the other environment. You need to grant salespeople access to the sales company environment. What should you do?

- A. Set app security
- B. Add salespeople to a security role.
- C. Set privileges.
- D. Add salespeople to an Office 365 security group.

Answer: D
