## HCL-DOM-AADM-12 Exam Torrent & HCL-DOM-AADM-12 Latest Pdf & HCL-DOM-AADM-12 Valid Questions

Your privacy and personal right are protected by our company and corresponding laws and regulations on our HCL-DOM-AADM-12 study guide. Whether you are purchasing our HCL-DOM-AADM-12 training questions, installing or using them, we won't give away your information to other platforms, and the whole transaction process will be open and transparent. Therefore, let us be your long-term partner and we promise our HCL-DOM-AADM-12 Preparation exam won't let down.

## HCL Software Academy HCL Software Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q68-Q73):

### NEW QUESTION # 68

What is displayed in the Domino Administrator Client's Messaging tab?

- A. DAOS and attachment consolidation details
- **B. Mail routing status and router diagnostics**
- C. Replication schedule and encryption settings
- D. Sametime server connection details

**Answer: B**

Explanation:

The Messaging tab in the Domino Administrator Client is the central hub for monitoring and managing the mail system. It provides administrators with a comprehensive view of mail routing status and router diagnostics, allowing them to see how many messages are pending in the mail box, track the progress of the Router task, and troubleshoot delivery failures or bottlenecks in the mail flow.

### NEW QUESTION # 69

Which feature within the Domino Administrator Client allows you to replicate databases across servers manually?

- A. Configuration > Policies
- B. Server > Status > Replication Queue
- C. Files > Tools > Compact
- **D. Files > Tools > Replicate**

**Answer: D**

Explanation:

While replication is typically automated via schedules in Connection documents, administrators can trigger it manually when needed. This is done by navigating to the Files tab in the Domino Administrator Client, selecting the desired database, and choosing the Replicate option from the Tools menu. This manual trigger allows for immediate synchronization of data between a source and destination server.

---

### NEW QUESTION # 70

Which two elements are required for a Notes client to successfully authenticate to a Domino server? (Choose two)

- **A. ID file containing the private key**
- **B. Matching user name in the Domino Directory**
- C. Trusted root certificate from the server
- D. notes.ini file with replication schedule

**Answer: A,B**

Explanation:

Notes authentication is a "challenge-response" process that requires two primary components. First, the user must have an ID file containing their private key to sign the authentication request. Second, the server must have a matching user name in the Domino Directory (names.nsf) that contains the user's corresponding public key to verify the signature. Without both pieces, the secure handshake between the client and server cannot be completed.

---

### NEW QUESTION # 71

Domino uses Sequence numbers and replication history to determine when a database requires replication.

- A. ACL last modified date
- **B. Sequence numbers and replication history**
- C. Document size in bytes
- D. File creation date

**Answer: B**

Explanation:

Domino replication is an efficient process that only copies modified data. To achieve this, it uses sequence numbers (which track how many times a document has changed) and the replication history (which logs when two specific replicas last successfully synchronized). By comparing these two elements, the replication task can precisely identify which documents are new or modified since the last update, rather than scanning the entire database or relying on simple file dates.

---

### NEW QUESTION # 72

What is the function of the AdminP task?

- A. Perform full-text indexing
- B. Archive inactive mail files

- C. Automate administrative requests
- D. Monitor server CPU utilization

**Answer: C**

Explanation:

The Administration Process (AdminP) is designed to automate administrative requests throughout a Domino domain. When an administrator performs actions like renaming a user or deleting a group, the request is posted to the admin4.nsf database. AdminP then carries out these changes across all servers, updating ACLs, person documents, and other references automatically to ensure domain-wide consistency.

## NEW QUESTION # 73

.....

We are aimed to improve customer satisfaction and always put customers first. Our experts check daily whether there is an update to the HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 torrent prep, and if there is an update system, we will automatically send it to you. So it can guarantee latest knowledge and keep up with the pace of change. Many people are worried that online shopping electronics have viruses. But you don't have to worry about our products. Our HCL-DOM-AADM-12 Exam Questions are absolutely safe and virus-free. If you have any questions during the installation process, we will arrange professional staff on guidance of your installation and use. We always put your needs first.
