Valid H19-427_V1.0-ENU Exam Answers - Exam Questions H19-427_V1.0-ENU Vce

our H19-427_V1.0-ENU study materials will also save your time and energy in well-targeted learning as we are going to make everything done in order that you can stay focused in learning our H19-427_V1.0-ENU study materials without worries behind. We are so honored and pleased to be able to read our detailed introduction and we will try our best to enable you a better understanding of our H19-427_V1.0-ENU Study Materials better.

Huawei HCSE-Presales-Campus Network Planning and Design V1.0 Sample Questions (Q152-Q157):

NEW QUESTION # 152

In the Cloudcampus public cloud deployment scenario, APs are centrally managed and configured by the cloud management platform. The wireless tuning algorithm works by detecting and collecting radio frequency and interference information from surrounding neighbors through the AP, and then reporting it to the cloud management platform for centralized tuning calculation. After the cloud management platform completes the calculation, it sends the channel and power allocated to each AP to the corresponding AP.

- A. Correct
- B. Error

Answer: A

NEW QUESTION # 153

Which descriptions of the flexible networking in Huawei's SD-WAN solution are correct?

- A. Different services cannot use different overlay topologies
- B. For the Full-mesh topology model, the next hop of the route can be left unchanged on the RR.
- C. For the Partial-mesh topology model, RR can modify the next hop for some routes, but not for others.
- D. For the Hub-Spoke topology model, the RR reflects the Spoke route to other Spokes and modifies the next hop.

Answer: B,C

NEW QUESTION # 154

In a CloudCampus Huawei public cloud deployment scenario, what happens if a device becomes disconnected from the CloudCampus cloud management platform after being connected to it?

- A. The device will clear the configuration
