

EDGE-Expert Certification Dump, EDGE-Expert Free Vce Dumps

P.S. Free & New EDGE-Expert dumps are available on Google Drive shared by DumpsTests: https://drive.google.com/open?id=1IUfz7_eDAtecrXAjFiCKfkgl7tg91-uh

It is apparent that a majority of people who are preparing for the EDGE-Expert exam would unavoidably feel nervous as the exam approaching, since you have clicked into this website, you can just take it easy now--our EDGE-Expert learning materials. Our company has spent more than 10 years on compiling study materials for the exam, and now we are delighted to be here to share our EDGE-Expert Study Materials with all of the candidates for the exam in this field. There are so many striking points of our EDGE-Expert preparation exam.

DumpsTests can provide a shortcut for you and save you a lot of time and effort. DumpsTests will provide good training tools for your EDGE Certification EDGE-Expert Exam and help you pass EDGE certification EDGE-Expert exam. If you see other websites provide relevant information to the website, you can continue to look down and you will find that in fact the information is mainly derived from our DumpsTests. Our DumpsTests provide the most comprehensive information and update fastest.

EDGE-Expert Free Vce Dumps - New EDGE-Expert Exam Notes

Many exam candidates attach great credence to our EDGE-Expert simulating exam. You can just look at the hot hit on our website on the EDGE-Expert practice engine, and you will be surprised to find it is very popular and so many warm feedbacks are written by our loyal customers as well. Our EDGE-Expert study prep does not need any ads, their quality has propaganda effect themselves. As a result, the pass rate of our EDGE-Expert exam braindumps is high as 98% to 100%.

EDGE Excellence in Design for Greater Efficiencies (EDGE Expert) Exam Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which of the following is NOT a characteristic of the EDGE standard?

- A. Holistic approach that takes into account wider sustainability issues
- B. Simple, as beneath the intuitive interface is a powerful engine that understands local climate and how buildings will be used
- C. Fast tool with ideal measures for the best return on investment
- D. Smart, as capital costs and payback period for buildings are displayed

Answer: A

Explanation:

The EDGE standard is designed to be a practical, focused tool for green building certification, emphasizing specific resource efficiency metrics. The EDGE User Guide describes its characteristics: "EDGE is a simple, fast, and smart tool for green building certification. It provides an intuitive interface with a powerful engine that accounts for local climate and building use (simple), identifies measures with the best return on investment (fast), and displays capital costs and payback periods (smart)" (EDGE User Guide, Section 1.1:

Introduction to EDGE). Options A, C, and D align with these descriptions. However, Option B (holistic approach that takes into account wider sustainability issues) is not a characteristic of EDGE, as the standard focuses narrowly on energy, water, and embodied energy in materials, not broader sustainability issues like biodiversity or social equity. This is clarified in the EDGE Certification Protocol: "EDGE is not a holistic sustainability standard; it specifically targets resource efficiency in energy, water, and materials, excluding wider sustainability metrics such as indoor air quality or ecological impact" (EDGE Certification Protocol, Section 1.2: Scope of EDGE Standard). Thus, Option B is not a characteristic of the EDGE standard.

Reference: EDGE User Guide Version 2.1, Section 1.1: Introduction to EDGE; EDGE Certification Protocol, Section 1.2: Scope of EDGE Standard.

NEW QUESTION # 38

For which of the following is EDGE Advanced certification available?

- A. New constructions
- B. Infrastructure constructions
- C. Parks and landscape projects
- D. Green lease agreements

Answer: A

Explanation:

The EDGE Standard defines specific project types eligible for certification levels, including EDGE Advanced, which requires at least 40% energy savings. The EDGE Certification Protocol specifies: "EDGE Advanced certification is available for new constructions that achieve a minimum of 40% energy savings compared to the base case, applicable to building typologies such as homes, hotels, offices, hospitals, retail, and schools" (EDGE Certification Protocol, Section 2.3: Certification Levels). Option A, new constructions, aligns with this scope, as EDGE focuses on new buildings across supported typologies. Option B, green lease agreements, is not a building type and is outside EDGE's certification framework. Option C, infrastructure constructions, and Option D, parks and landscape projects, are also not covered under EDGE typologies, as confirmed by the EDGE User Guide: "EDGE certification applies to new buildings and major renovations of specific typologies, excluding infrastructure or landscape-only projects" (EDGE User Guide, Section 1.2:

Scope of EDGE Certification). Thus, only new constructions qualify for EDGE Advanced certification.

Reference: EDGE Certification Protocol, Section 2.3: Certification Levels; EDGE User Guide Version 2.1, Section 1.2: Scope of EDGE Certification.

NEW QUESTION # 39

Which of the following parameters can be found in the EDGE App Results Bar?

- A. Climate conditions
- B. Occupant use
- C. Incremental cost
- D. Building type

Answer: C

Explanation:

The EDGE App Results Bar displays key outputs of the software analysis after a project is modeled. The EDGE User Guide details the contents of the Results Bar: "The EDGE App Results Bar provides a summary of the project's performance, including percentage

savings in energy, water, and embodied energy in materials, as well as the incremental cost, payback period, and carbon emissions reduction" (EDGE User Guide, Section 2.4: Interpreting EDGE Results). Option C, incremental cost, is explicitly mentioned as part of the Results Bar, representing the additional cost of implementing green measures. Option A (building type) and Option B (occupant use) are inputs specified by the user during project setup, not outputs in the Results Bar, as noted: "Building type and occupant use are input parameters, not displayed in the Results Bar" (EDGE User Guide, Section 2.2: Project Setup). Option D (climate conditions) is also an input parameter (selected via location), not an output: "Climate conditions are derived from the selected location and are not shown in the Results Bar" (EDGE Methodology Report Version 2.0, Section 3.2: Climate Data Inputs). Thus, incremental cost (Option C) is the correct parameter found in the Results Bar.

Reference: EDGE User Guide Version 2.1, Section 2.4: Interpreting EDGE Results, Section 2.2: Project Setup; EDGE Methodology Report Version 2.0, Section 3.2: Climate Data Inputs.

NEW QUESTION # 40

What are the benefits of using a pool cover that are recognized in EDGE?

- A. Require less maintenance and work from employees
- B. Increase solar control and comfort
- C. Reduce chemical consumption and that of cleaning products
- **D. Reduce both water and energy demand**

Answer: D

Explanation:

Pool covers are a water and energy efficiency measure in EDGE, particularly relevant for hotels with swimming pools. The EDGE User Guide outlines their benefits: "Pool covers reduce water demand by minimizing evaporation and energy demand by reducing the need for heating, as they retain heat in the pool.

In EDGE, the use of pool covers is recognized for its dual impact on reducing both water and energy consumption" (EDGE User Guide, Section 5.3: Additional Water Efficiency Measures). Option B, reduce both water and energy demand, directly aligns with this description. Option A (increase solar control and comfort) is incorrect, as pool covers are not recognized in EDGE for solar control or occupant comfort but for resource savings. Option C (require less maintenance and work from employees) and Option D (reduce chemical consumption and that of cleaning products) are potential secondary benefits but are not quantified or recognized in EDGE calculations, as confirmed by: "EDGE focuses on measurable water and energy savings from pool covers, not on maintenance or chemical use reductions" (EDGE Methodology Report Version 2.0, Section 4.3: Water Efficiency Calculations). Thus, Option B is the correct answer.

Reference: EDGE User Guide Version 2.1, Section 5.3: Additional Water Efficiency Measures; EDGE Methodology Report Version 2.0, Section 4.3: Water Efficiency Calculations.

NEW QUESTION # 41

Which type of evidence is required at the post-construction stage for the efficiency measure window glazing?

- A. Window schedule for the building showing the major window glass types if more than one type of glass is present
- B. Design building elevations marking the window glass specifications
- C. Bill of quantities with the specifications for the window glass highlighted
- **D. Manufacturer's data sheets showing the make and model, U-value, and SHGC of the installed glass**

Answer: D

Explanation:

The post-construction stage in EDGE certification requires evidence to confirm that the efficiency measures claimed in the design stage have been implemented as specified. For window glazing, which affects energy efficiency through its U-value (thermal transmittance) and SHGC (Solar Heat Gain Coefficient), the EDGE Certification Protocol provides clear requirements: "At the post-construction stage, the Client must provide manufacturer's data sheets for the window glazing measure, showing the make and model, U-value, and SHGC of the installed glass, to confirm that the glazing matches the specifications claimed in the self-assessment and meets the energy efficiency requirements" (EDGE Certification Protocol, Section 3.4: Post-Construction Requirements). Option C, manufacturer's data sheets showing the make and model, U-value, and SHGC of the installed glass, directly matches this requirement, as it provides the specific technical data needed to verify compliance. Option A (design building elevations marking the window glass specifications) is relevant at the design stage, not post-construction: "Design elevations are required at the preliminary stage to show intended glazing specifications, not after construction" (EDGE Certification Protocol, Section 3.2:

Audit Requirements). Option B (bill of quantities with specifications highlighted) is insufficient on its own, as it may not provide

detailed technical data: "Bills of quantities may support purchase verification, but manufacturer's data sheets are required for technical specifications like U-value and SHGC" (EDGE Certification Protocol, Section 3.4: Post-Construction Requirements). Option D (window schedule showing major glass types) is helpful but not sufficient, as it lacks the detailed technical data: "Window schedules may indicate glass types, but they do not replace the need for manufacturer's data sheets with U-value and SHGC at post-construction" (EDGE User Guide, Section 6.2: Documentation Requirements). The EDGE User Guide further clarifies: "For glazing measures, post-construction evidence must confirm the installed product's performance through manufacturer's data sheets, ensuring alignment with the design-stage claims" (EDGE User Guide, Section 4.1: Insulation Measures). Thus, manufacturer's data sheets (Option C) are required at the post-construction stage.

Reference: EDGE Certification Protocol, Section 3.4: Post-Construction Requirements, Section 3.2: Audit Requirements; EDGE User Guide Version 2.1, Section 6.2: Documentation Requirements, Section 4.1: Insulation Measures.

NEW QUESTION # 42

.....

DumpsTests is a very wonderful and effective platform to give chances to our worthy clients who want to achieve their expected scores and gain their EDGE-Expert certifications. With our professional experts' tireless efforts, our EDGE-Expert exam guide is equipped with a simulated examination system with timing function, allowing you to examine your learning results at any time, keep checking for defects, and improve your strength. And you can be satisfied with our EDGE-Expert learning guide.

EDGE-Expert Free Vce Dumps: <https://www.dumpstests.com/EDGE-Expert-latest-test-dumps.html>

There are EDGE-Expert free demo for you to download before you buy, No Helpful, No Pay, As we all know, Selecting high quality, respected study material will help develop the required skills to pass your EDGE-Expert exam test, Passing exam won't be a problem anymore as long as you are familiar with our EDGE-Expert exam material (only about 20 to 30 hours practice), You can avail these EDGE-Expert changes for free up to 90 days.

Clear, Concise Instructions, Designing Your Site, There are EDGE-Expert free demo for you to download before you buy, No Helpful, No Pay, As we all know, Selecting high quality, respected study material will help develop the required skills to pass your EDGE-Expert exam test.

Best Way To Ensure Success With EDGE EDGE-Expert Exam Questions

Passing exam won't be a problem anymore as long as you are familiar with our EDGE-Expert exam material (only about 20 to 30 hours practice), You can avail these EDGE-Expert changes for free up to 90 days.
