

Mule-Arch-201 zu bestehen mit allseitigen Garantien

Die Materialien zur Salesforce Mule-Arch-201 Zertifizierungsprüfung von ZertFragen werden speziell von dem IT-Expertenteam entworfen. Sie sind zielgerichtet. Durch die Zertifizierung können Sie Ihren internationalen Wert in der IT-Branche verwirklichen. Viele Anbieter für Antwortspeicherung und die Schulungsunterlagen versprechen, dass Sie die Salesforce Mule-Arch-201 Zertifizierungsprüfung mit ihren Produkten bestehen können. ZertFragen sagen mit den Beweisen. Der Moment, wenn das Wunder vorkommt, kann jedes Wort von uns beweisen.

Nun ist die Salesforce Mule-Arch-201 Zertifizierungsprüfung eine beliebte Prüfung in der IT-Branche. Viele IT-Fachleute wollen das Salesforce Mule-Arch-201 Zertifikat erhalten. So ist die Salesforce Mule-Arch-201 Zertifizierungsprüfung eine beliebte Prüfung. Das Salesforce Mule-Arch-201 Zertifikat ist sehr hilfreich, um Ihre Arbeit in der IT-Industrie zu verbessern und Ihr Gehalt zu erhöhen und Ihrem Leben eine zuverlässige Garantie zu geben.

>> Mule-Arch-201 Prüfungs-Guide <<

bestehen Sie Mule-Arch-201 Ihre Prüfung mit unserem Prep Mule-Arch-201 Ausbildung Material & kostenloser Download Torrent

Wenn Sie Ihre Stelle in der schärfkonkurrierten IT-Branche durch das Zertifikat von Salesforce Mule-Arch-201 festigen und somit Ihre beruflichen Fähigkeiten verstärken wollen, können Sie die Schulungsunterlagen zur Salesforce Mule-Arch-201 Zertifizierungsprüfung von unserem ZertFragen wählen. Nach langjährigen Bemühungen haben unsere Erfolgsquote von der Salesforce Mule-Arch-201 Zertifizierungsprüfung 100% erreicht. Wählen Sie ZertFragen, wählen Sie Erfolg.

Salesforce Certified MuleSoft Platform Architect Mule-Arch-201

Prüfungsfragen mit Lösungen (Q138-Q143):

138. Frage

An existing Quoting API is defined in RAML and used by REST clients for interacting with the quoting engine. Currently there is a resource defined in the RAML that allows the creation of quotes; however, a new requirement was just received to allow for the updating of existing quotes.

Which two actions need to be taken to facilitate this change so it can be processed?

Choose 2 answers

- A. Deprecate existing versions of the API in Exchange
- B. Remove the old client applications and create new client applications to account for the changes
- C. Add a new API policy to API Manager to allow access to the updated endpoint
- **D. Update the API implementation to accommodate the new update request**
- **E. Update the RAML with new method details for the update request**

Antwort: D,E

Begründung:

To accommodate the new requirement of allowing updates to existing quotes, the following actions should be taken:

Update the RAML Definition (Option C):

The RAML specification defines the structure and behavior of the API. Adding a new method (such as PUT or PATCH) for updating quotes requires modifying the RAML to include this new endpoint. This ensures the API specification is up-to-date and accurately reflects the new functionality.

Update the API Implementation (Option A):

Once the RAML is updated, the backend API implementation must also be modified to handle the new update requests. This could involve adding logic to process and validate update requests, connect to necessary backend resources, and apply the changes to existing quotes.

of Incorrect Options:

Option B (removing and creating new clients) is unnecessary; client applications can remain as they are, with no need for complete replacement.

Option D (deprecating existing versions) may not be required if backward compatibility is maintained.

Option E (adding a new policy) does not facilitate functional changes and is unrelated to implementing the update feature.

Reference

For more details on updating RAML definitions and API implementations, refer to MuleSoft's API Design documentation on RAML and RESTful API practices.

139. Frage

A company stores financial transaction data in two legacy systems. For each legacy system, a separate, dedicated System API (SAPI) exposes data for that legacy system. A Process API (PAPI) merges the data retrieved from all of the System APIs into a common format. Several API clients call the PAPI through its public domain name.

The company now wants to expose a subset of financial data to a newly developed mobile application that uses a different Bounded Context Data Model. The company wants to follow MuleSoft's best practices for building out an effective application network.

Following MuleSoft's best practices, how can the company expose financial data needed by the mobile application in a way that minimizes the impact on the currently running API clients, API implementations, and support asset reuse?

- A. Develop and deploy a new PAPI implementation with data transformation and ... login to support this required endpoints of both mobile and web clients.
Deploy an API Proxy with an endpoint from API Manager that redirect the existing PAPI endpoints to the new PAPI.
- **B. Add two new Experience APIs (EAPI-1 and EAPI-2).**
Add Mobile PAPI-2 to expose the Intended subset of financial data as requested.
Both PAPIs access the Legacy Systems via SAPI-1 and SAPI-2.
- C. Create a new mobile Experience API (EAPI) that exposes that subset of PAPI endpoints.
Add transformation logic to the mobile Experience API implementation to make mobile data compatible with the required PAPIs.

- D. Add two new Experience APIs (EAPI-1 and EAPI-2).
Add Mobile PAPI-2 to expose the Intended subset of financial data as requested.
Both PAPIs access the Legacy Systems via SAPI-1 and SAPI-2.

Antwort: B

Begründung:

To achieve the goal of exposing financial data to a new mobile application while following MuleSoft's best practices, the company should follow an API-led connectivity approach. This approach ensures minimal disruption to existing clients, maximizes reusability, and respects the separation of concerns across API layers.

of Solution:

Experience APIs for Client-Specific Requirements:

Create two new Experience APIs (EAPI-1 and EAPI-2) for the mobile application, tailored to meet the specific data and format requirements of the mobile application. These APIs encapsulate the client-specific needs and provide a custom interface without impacting other clients.

Process API Layer for Data Transformation:

By adding Mobile PAPI-2, we allow the mobile application to access the required subset of data, formatted according to the mobile application's requirements. This approach ensures that data transformation and aggregation are handled in the Process layer, maintaining consistency and reusability across different applications.

Reuse of System APIs:

Both the new Mobile PAPI-2 and existing PAPI-1 access data from System APIs (SAPI-1 and SAPI-2), which continue to expose data from each legacy system in a consistent, reusable manner. This avoids duplicating logic and ensures that data access remains centralized and manageable.

Why Option A is Correct:

Option A aligns with MuleSoft's best practices by isolating client-specific requirements in the Experience layer, utilizing Process APIs for data orchestration and transformation, and maintaining reusable System APIs for backend access.

This approach also ensures that the current API clients are not impacted, as new clients (e.g., the mobile app) interact with newly defined Experience APIs without modifying the existing API setup.

of Incorrect Options:

Option B: This option seems similar but lacks clarity on the separation of mobile-specific requirements and does not explicitly mention data transformation, which is essential in this scenario.

Option C: Creating a single mobile Experience API that exposes a subset of PAPI endpoints directly adds unnecessary complexity and may violate the separation of concerns, as transformation logic should not be in the Experience layer.

Option D: Deploying a new PAPI and using an API Proxy to redirect existing endpoints would add unnecessary complexity, disrupt the current API clients, and increase maintenance efforts.

Reference

For additional guidance, refer to MuleSoft documentation on API-led connectivity best practices and best practices for structuring Experience, Process, and System APIs.

140. Frage

Which three tools automate the deployment of Mule applications?

Choose 3 answers

- A. Runtime Manager
- B. Platform APIs
- C. Mule Maven plugin
- D. API Community Manager
- E. Anypoint Platform CLI
- F. Anypoint Studio

Antwort: A,B,E

Begründung:

MuleSoft offers various tools to automate the deployment of Mule applications, which can streamline deployment and management processes. Here's how each tool supports automated deployment:

Runtime Manager:

Anypoint Runtime Manager is MuleSoft's web-based interface that allows users to deploy, manage, and monitor applications directly. It provides deployment automation through its user-friendly interface.

Anypoint Platform CLI:

The Anypoint CLI enables scripting of deployment and management tasks, making it possible to automate deployments via command-line scripts. This tool is ideal for CI/CD pipelines as it integrates with automated processes.

Platform APIs:

MuleSoft's Platform APIs allow programmatic access to deployment functions, enabling integration with external automation tools and CI/CD systems. These APIs facilitate deployment through RESTful calls, which can be automated for continuous delivery.

of Incorrect Options:

Option D (Anypoint Studio) is primarily for development and does not support deployment automation.

Option E (Maven Plugin) can be used for building and deploying Mule applications but isn't classified as a platform tool for deployment.

Option F (API Community Manager) is unrelated to deployment and instead focuses on managing API communities.

Reference

For detailed steps on automating deployments with these tools, refer to MuleSoft documentation on Runtime Manager, CLI, and Platform APIs.

141. Frage

Mule applications that implement a number of REST APIs are deployed to their own subnet that is inaccessible from outside the organization.

External business-partners need to access these APIs, which are only allowed to be invoked from a separate subnet dedicated to partners - called Partner-subnet. This subnet is accessible from the public internet, which allows these external partners to reach it.

Anypoint Platform and Mule runtimes are already deployed in Partner-subnet. These Mule runtimes can already access the APIs.

What is the most resource-efficient solution to comply with these requirements, while having the least impact on other applications that are currently using the APIs?

- A. Implement (or generate) an API proxy Mule application for each of the APIs, then deploy the API proxies to the Mule runtimes
- B. Redeploy the API implementations to the same servers running the Mule runtimes
- C. Duplicate the APIs as Mule applications, then deploy them to the Mule runtimes
- D. Add an additional endpoint to each API for partner-enablement consumption

Antwort: A

142. Frage

In which layer of API-led connectivity, does the business logic orchestration reside?

- A. Experience Layer
- B. System Layer
- **C. Process Layer**

Antwort: C

Begründung:

Correct Answer: Process Layer

>> Experience layer is dedicated for enrichment of end user experience. This layer is to meet the needs of different API clients/consumers.

>> System layer is dedicated to APIs which are modular in nature and implement/ expose various individual functionalities of backend systems

>> Process layer is the place where simple or complex business orchestration logic is written by invoking one or many System layer modular APIs So, Process Layer is the right answer.

143. Frage

.....

Der Traum von IT ist immer gering in Wirklichkeit. Aber der Traum, die Salesforce Mule-Arch-201 Zertifizierungsprüfung zu bestehen, ist absolut in reichweite, wenn Sie ZertFragen benutzen. Wir ZertFragen bietet Ihnen hochwertigen Service, und die Genauigkeit der Fragenkataloge zur Salesforce Mule-Arch-201 Zertifizierungsprüfung ist so hoch, dass die Bestehensrate der Salesforce Mule-Arch-201 Zertifizierungsprüfung 100% beträgt. Solange Sie ZertFragen wählen, können wir Ihnen versprechen, dass Sie die Salesforce Mule-Arch-201 Zertifizierungsprüfung bestimmt bestehen!

Mule-Arch-201 Prüfungsfrage: https://www.zertfragen.com/Mule-Arch-201_pruefung.html

Unsere Mule-Arch-201 Test VCE Dumps bieten gültige Fragen & Antworten Materialien der tatsächlichen echten Teste, Salesforce Mule-Arch-201 Prüfungs-Guide Leistungsfähiges Expertenteam, Salesforce Mule-Arch-201 Prüfungs-Guide Man sollte die verlässliche Firma auswählen, wenn man etwas kaufen will, Salesforce Mule-Arch-201 Prüfungs-Guide Ja, Sie können PDF-Version wählen und ausdrucken, Es gibt viele unterschiedene Eigenschaften unseres Mule-Arch-201 pdf vce Materiales von anderen Dump-Anbietern, z.B.: echte Mule-Arch-201 Prüfungsfragen mit genauen Antworten, sofortiges Herunterladen nach der Bezahlung, kostenloses Update innerhalb ein Jahr und 100% Pass Garantie für die Mule-Arch-201 Praxis Prüfung.

Es gibt jedoch auch Marketingaspekte, die das Bewusstsein und Mule-Arch-201 die Nachfrage nach diesen Diensten fördern, Eine der Folgen davon ist ein Rückgang der Beschäftigungssicherheit.

Unsere Mule-Arch-201 Test VCE Dumps bieten gültige Fragen & Antworten Materialien der tatsächlichen echten Teste, Leistungsfähiges Expertenteam, Man sollte die verlässliche Firma auswählen, wenn man etwas kaufen will.

Salesforce Certified MuleSoft Platform Architect cexamkiller Praxis Dumps & Mule-Arch-201 Test Training Überprüfungen

Ja, Sie können PDF-Version wählen und ausdrucken, Es gibt viele unterschiedene Eigenschaften unseres Mule-Arch-201 pdf vce Materiales von anderen Dump-Anbietern, z.B.: echte Mule-Arch-201 Prüfungsfragen mit genauen Antworten, sofortiges Herunterladen nach der Bezahlung, kostenloses Update innerhalb ein Jahr und 100% Pass Garantie für die Mule-Arch-201 Praxis Prüfung.
