Pdf Salesforce Plat-Dev-301 Format, New Plat-Dev-301 Exam Dumps

Improve your professional ability with our Plat-Dev-301 certification. Getting qualified by the Salesforce certification will position you for better job opportunities and higher salary. Now, let's start your preparation with Plat-Dev-301 training material. The Plat-Dev-301 practice pdf offered by Prep4sureExam latest pdf is the latest and valid study material which suitable for all of you. The Plat-Dev-301 free demo is especially for you to free download for try before you buy. You can get a lot from the Plat-Dev-301 simulate exam dumps and get your Plat-Dev-301 certification easily.

Salesforce Certified Platform Developer II - Multiple Choice Sample Questions (Q157-Q162):

NEW QUESTION # 157

What is the best practice to initialize a Visualforce page in a test class?

- A. Use Test.setCurrentPage(Page.MyTestPage);
- B. Use controller.currentPage.setPage(MyTestPage);
- C. Use Test.currentPage.getParamaters put(MyTestPage);
- D. Use Test.setCurrentPage MyTestPage;

Answer: A

Explanation:

Test.setCurrentPage(Page.MyTestPage) is used to set the context to a Visualforce page in tests, allowing you to simulate a page request in a test method.

NEW QUESTION # 158

A developer created a Lightning web component for the Account record page that displays the five most recently contacted Contacts for an Account. The Apex method, Contacts, returns a list of Contacts and will be wired to a property in the component.

Which two lines must change in the above code to make the Apex method able to be wired? Choose 2 answers

- A. Remove private from line 09.
- B. Add public to line 04.
- C. Add @AuraEnabled {cacheable=true} to line 03.
- D. Add @AuraEnabled {cacheable=true} to line 08.

Answer: A,D

Explanation:

To make an Apex method callable from a Lightning Web Component, you need to annotate the method with @AuraEnabled and mark it as cacheable if it's only retrieving data without modifying it. Additionally, the method must be public to be accessible from the component.

Line 04: Needs @AuraEnabled(cacheable=true) to allow the method to be called from the Lightning Web Component and indicate that the method doesn't modify any data, making it suitable for caching.

Line 09: The method getFiveMostRecent should not be private because private methods cannot be called from a Lightning Web Component. Changing it to public (or default, which is equivalent to public within the same namespace) is required.

Lightning Web Components and Salesforce Data: Developer Documentation

@AuraEnabled Annotation: Apex Developer Guide

NEW QUESTION # 159

A Salesforce developer is hired by a multi-national company to build a custom Lightning application that shows employees their employment benefits and earned commissions over time. The application must acknowledge and respect the user's locale context for dates, times, numbers, currency, and currency symbols.

When using Aura components, which approach should the developer implement to ensure the Lightning application complies with the user's locale?

- A. Create a Hierarchical custom setting to store user preferences.
- B. Use the \$User global variable to retrieve the user preferences.
- C. Use the \$Locale value provider to retrieve the user preferences.
- D. Use the \$Label global value provider.

Answer: C

Explanation:

The \$Locale value provider should be used to ensure the Lightning application respects the user's locale for dates, times, numbers, currency, and currency symbols. This global value provider gives components access to locale formats and labels, which are automatically rendered according to the user's locale settings.

NEW QUESTION # 160

Which three approaches should a developer implement to obtain the best performance for data retrieval when building a Lightning web component? Choose 3 answers

- A. Use getRecordUi to obtain metadata.

- B. Use layoutTypes: 'Full') to display a set of fields.
- C. Use lazy load for occasionally accessed data.
- D. Use {Cacheable=true} whenever possible
- E. Use the Lightning Data Service.

Answer: C,D,E

Explanation:

Lazy loading improves performance by loading data only when needed.

Lightning Data Service (LDS) handles data operations and caching efficiently.

Using {Cacheable=true} on Apex methods enables the Lightning Component framework to cache the method's return value, reducing server round-trips for the same data.

Lightning Web Components Developer Guide

NEW QUESTION # 161

A developer creates a Lightning web component to allow a Contact to be quickly entered. However, error messages are not displayed.

Which component should the developer add to the form to display error messages?

- A. lightning-messages
- B. lightning-error
- C. apex.messages
- D. aura.messages

Answer: A

Explanation:

The correct answer is B, lightning-messages. This Lightning Web Components (LWC) service component provides a way to display error messages that are generated during the processing of lightning-input-field components within a lightning-record-edit-form.

Display Error Messages

NEW QUESTION # 162

.....

There is no doubt that the Plat-Dev-301 certification is a popular exam in the industry. And, Plat-Dev-301 is one of the most demanded certifications by the Cisco. We at Prep4sureExam, provide the money back guarantee on our Plat-Dev-301 practice exam questions and training material. Our Plat-Dev-301 certified professional team continuously works on updated exam content with Latest Plat-Dev-301 Questions. If you want to clear the Plat-Dev-301 exam in the best way, then you can utilize the best quality products and services provided by us. Our Plat-Dev-301 PDF questions have all the updated question answers for Plat-Dev-301 exams.
