

ACD201 Pass4sure Dumps & ACD201 Sichere Praxis Dumps

P.S. Kostenlose 2026 Appian ACD201 Prüfungsfragen sind auf Google Drive freigegeben von DeutschPrüfung verfügbar: https://drive.google.com/open?id=1iAzAoC8wFIHFhioQ1ZK9Cetqx1_1W_pI

Falls Sie nicht wissen, wie die Appian ACD201 Prüfungen hocheffektiv zu bestehen, können Sie eine gute Online-Bildung auswählen, sehr effektiv diese Appian ACD201 Zertifizierungsprüfungen zu bestehen. Wir DeutschPrüfung bemühen uns um Prüfungsteilnehmer originale Zertifizierungsunterlagen anzubieten und Die Dumps zur Appian ACD201 Zertifizierungsprüfung von DeutschPrüfung sind die Produkte, die von Lieferanten Genehmigungen bekommen und vielfältige Inhalte abdecken. Damit können Sie viel Zeit und Energie sparen. Und es kann Ihnen gewährleisten, einmal Erfolg zu machen. Ansonst geben wir Ihnen voll Geld zurück.

Appian ACD201 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> Performance and Scalability: This section of the exam measures the skills of Appian Developers and covers designing performant components, building memory-efficient models, conducting database load and automated testing, analyzing server memory and logs for risks, and resolving performance concerns for end users.
Thema 2	<ul style="list-style-type: none"> Data Management: This section of the exam measures the skills of Solution Architects and covers designing and documenting data models, recommending record types for optimization and security, working with relational data, and implementing complex models with supporting objects.
Thema 3	<ul style="list-style-type: none"> Application Design and Development: This section of the exam measures the skills of Appian Developers and covers translating business requirements into user stories, building end-to-end applications, managing object security, applying design best practices, and ensuring user-centric experiences through proper UX design.
Thema 4	<ul style="list-style-type: none"> Advanced Appian Concepts: This section of the exam measures the skills of Solution Architects and covers creating and configuring authentication methods, setting up integration objects, designing APIs, evaluating smart services and plug-ins, and applying SSO mechanisms with SAML and LDAP.

ACD201 Lernhilfe, ACD201 Demotesten

IT-Industrie entwickelt sich sehr schnell und die Angestellten in dieser Branche werden mehr gefordert. Wenn Sie nicht ausscheiden möchten, ist das Bestehen der Appian ACD201 Prüfung notwendig. Vielleicht haben Sie Angst davor, dass Sie die in der Appian ACD201 durchfallen, auch wenn Sie viel Zeit und Geld aufwenden. Dann lassen wir DeutschPrüfung Ihnen helfen! Zahllose Benutzer der Appian ACD201 Prüfungssoftware geben wir die Konfidenz, Ihnen zu garantieren, dass mit Hilfe unserer Produkte werden Ihr Bestehen der Appian ACD201 gesichert sein!

Appian Senior Developer ACD201 Prüfungsfragen mit Lösungen (Q38-Q43):

38. Frage

You're inspecting the items in a deployment package for issues you might have missed during package preparation. Which two objects can be in your list of missing precedents for an application? (Choose two.)

- A. Group Type Custom
- B. Connected System
- C. System Knowledge Center
- D. Document

Antwort: A,B

Begründung:

Connected System and Group Type Custom can both be missing precedents in an Appian deployment package, meaning dependent objects required by the application may not have been included.

39. Frage

You need to connect to an external system using OAuth 2.0: SAML Bearer Assertion Flow authentication type, which requests access to an API on of a signed in user.

This standard has several steps involved with the SAML Bearer Assertion Flow.

Which two steps should you perform to connect to the external system? (Choose two.)

- A. Configure SAML for single sign-on (SSO).
- B. Register the connection in the third-party system
- C. Use an `!authorizationLink()` on the relevant interface.
- D. Generate a service account key in third-party systems.

Antwort: A,B

Begründung:

Configure SAML for single sign-on (SSO).

The bearer-assertion flow relies on an existing SAML SSO configuration so Appian can issue a signed SAML assertion on behalf of the signed-in user.

Register the connection in the third-party system.

You must register (or "trust") Appian's client/certificate with the external system so it will accept the SAML assertion and issue an OAuth 2.0 access-token for the user.

40. Frage

A view is created with the primary table PERSON and is joined using a left join with the APPOINTMENT table on the column "PERSON_ID". There is a one-to-many relationship between the PERSON and APPOINTMENT tables.

A Custom Data Type (CDT) and a data store entity have been created based on this view, with the primary key being "PERSON_ID".

Review the data presented in the PERSON and APPOINTMENT tables:

Which two statements are true when the following query entity is executed? (Choose two.)

- A. result totalCount is 3
- B. Appian makes one more query to the database(other than the actual query to fetch the data) to get the totalCount based on the applied filters.
- C. result totalCount is 1

- D. Appian makes one more query to the database (other than the actual query to fetch the data) to get the totalCount based on the applied filters and paging info.

Antwort: B,C

Begründung:

Appian makes an additional query to the database (other than the main query for data) to retrieve the totalCount when fetchTotalCount: true() is used.

The result totalCount is 1, as there is only one person (PERSON_ID 1101) being filtered, even though there are multiple "New" appointments for that person; with a CDT based on PERSON_ID as the primary key, only one row is counted per person.

41. Frage

You have a requirement to implement an audit trail for any modifications to a record.

You need to select the most efficient design option that has the least impact on your Appian application.

What should you do?

- A. Create a trigger on the database table to capture the audit trail to a table
- B. Create an Appian process to capture the change history and write the audit trail to the database
- C. Create a custom plug in that can write an audit trail to a log file.

Antwort: A

42. Frage

You need to create a read-only grid that displays support case information. Data for the support cases is mapped to the "Case" record type with data sync enabled.

Within the record, there are fields named "createdDateTime" and "resolvedDateTime". These two fields store the timestamps for when a case is created and resolved, respectively.

The grid includes a column indicating the number of hours between when the case was created and when it was resolved. This column must be sortable within the grid.

How should you calculate the hour value that will display in the column?

- A. Create a custom record field that evaluates at sync-time, and calculates the number of hours between when the case was created and the current date and time.
- B. Create a custom record field that evaluates in real-time, and calculates the number of hours between when the case was created and when it was resolved.
- C. Within the grid column, utilize an Appian function to calculate the number of hours between when the case was created and when it was resolved.

Antwort: B

Begründung:

A custom record field that evaluates in real-time and calculates the hours between "createdDateTime" and "resolvedDateTime" ensures the calculated value is available as a sortable field within the read-only grid.

43. Frage

.....

Wünschen Sie nicht großen Erfolg in Ihrem Arbeitsleben machen? Wenn ja, sollen Sie jetzt sich verbessern. Und wie kann Ihre selbe Fähigkeit in IT-Industrie sich verbessern? Es ist eine gute Weise, die Appian ACD201 Zertifizierungsprüfung abzulegen. Die Appian Zertifizierungsprüfung ist eine sehr wichtige Zertifizierung, deshalb gibt es immer mehr Appian Prüfungskandidaten.
