PRAXIS Praxis Business Education: Content Knowledge (5101)Exam 認定 Business-Education-Content-Knowledge-5101 試験問題 (Q62-Q67):

質問 # 62

To exchange one currency for another in international transactions, companies rely on a mechanism called the

- A. international equity market
- B. Eurocurrency market
- C. international bond market
- **D. foreign exchange market**

正解: D

解説:

The foreign exchange market facilitates the exchange of one currency for another, enabling international transactions by determining exchange rates. Option A (Eurocurrency market) deals with currencies held outside their home country. Option C (international equity market) involves stock trading. Option D (international bond market) pertains to debt securities. This question aligns with the Economics category, focusing on international finance.

質問 # 63

Which of the following best describes the relationship between a firm's assets, liabilities, and owners' equity?

- A. The statement of cash flows
- **B. The accounting equation**
- C. Net worth
- D. An annual report

正解: B

解説:

The accounting equation, $\text{Assets} = \text{Liabilities} + \text{Owners' Equity}$, defines the relationship between a firm's resources (assets), obligations (liabilities), and owners' residual claims (equity). Option A (net worth) is a derived value, not the equation itself. Option B (statement of cash flows) tracks cash movements, not this relationship. Option C (annual report) is a comprehensive document, not a specific equation. This is a core concept in the Accounting and Finance category.

質問 # 64

Which of the following is a primary purpose of financial markets?

- A. Controlling inflation
- B. Lowering the yield on bonds
- C. Increasing the price of common stock
- **D. Allocating capital efficiently**

正解: D

解説:

Financial markets facilitate the allocation of capital by connecting investors with businesses and governments needing funds, ensuring resources are directed to productive uses. Option B (controlling inflation) is a monetary policy function, primarily handled by central banks. Option C (increasing stock prices) is not a primary purpose, as stock prices fluctuate based on market dynamics. Option D (lowering bond yields) is an outcome of market conditions, not a purpose. This question aligns with the Accounting and Finance category, emphasizing the role of financial systems.

質問 # 65

The primary goal of just-in-time inventory planning is to

- **A. reduce the amount of inventory kept on hand**
- B. reduce the likelihood of running out of inventory
- C. increase the space allocated for storing inventory

- D. reduce ordering costs

正解: A

解説:

Just-in-time (JIT) inventory planning aims to minimize inventory levels by receiving goods only as needed, reducing storage costs and waste. Option A (ordering costs) is a secondary benefit. Option C (avoiding stockouts) is a concern but not the primary goal. Option D (increasing storage) contradicts JIT principles. This question aligns with the Management and Marketing category, emphasizing operations management.

質問 # 66

The vast majority of funds appropriated in the form of grants under the Perkins Act is awarded to which of the following entities?

- A. School boards
- B. Early college high schools
- C. Career and technology schools
- **D. State education agencies**

正解: D

解説:

The Carl D. Perkins Career and Technical Education Act provides federal funding primarily to state education agencies, which then distribute funds to local schools and institutions for career and technical education programs. Option A (school boards) may receive funds indirectly. Option C (career and technology schools) and Option D (early college high schools) are specific recipients, not primary awardees. This question aligns with the Professional Business Education category, focusing on educational funding.
