

DEP-2025 Prüfungsressourcen: Apple Deployment and Management Exam & DEP-2025 Reale Fragen

Übrigens, Sie können die vollständige Version der ITZert DEP-2025 Prüfungsfragen aus dem Cloud-Speicher herunterladen: https://drive.google.com/open?id=16PaU5XQ21sD6MWPRa5E_QwryHsueVh5L

Sorgen Sie noch um die Prüfungsunterlagen der Apple DEP-2025? Jetzt brauchen Sie keine Sorgen! Weil uns zu finden bedeutet, dass Sie schon die Schlüssel zur Prüfungszertifizierung der Apple DEP-2025 gefunden haben. Wir ITZert beschäftigen uns seit Jahren mit der Entwicklung der Software der IT-Zertifizierungsprüfung. Jetzt genießen wir einen guten Ruf weltweit. Wir bieten Ihnen die effektivsten Hilfe bei der Vorbereitung der Apple DEP-2025.

Das Zertifikat für Apple DEP-2025 bedeutet einen neuen Meilenstein im Leben. Mit dem bekommt man mehr berufliche Aufstiegschancen und bessere Arbeitsaussichten. Daher träumt jeder IT-Fachmann davon. Es ist allen bekannt, dass solche Apple DEP-2025 Prüfung schwer zu bestehen ist. In der Tat ist es auch so, zahlreiche Prüflinge fallen in der Prüfung durch. Wenn man sich gar nicht um die Prüfung bemüht, fällt einem noch schwerer. Die Apple DEP-2025 Zertifizierungsprüfung verlangt jedoch umfangreiche Fachkenntnisse. Unser ITZert bietet Ihnen einen kürzeren Weg zu der Apple DEP-2025 Zertifizierung. Auf unserer Website gibt es viele Prüfungsmaterialien für die Apple DEP-2025 Zertifizierung, die Ihnen zum Bestehen der Prüfung unter Garantie helfen. Außerdem können Sie dabei viel Zeit ersparen. So ist es Ihnen ganz preisgünstig, dass man per ITZert mit weniger Zeit und Geld ein wertvolles Zertifikat bekommt.

DEP-2025 Probesfragen & DEP-2025 Prüfungsmaterialien

Aufgrund der großen Übereinstimmung mit den echten Apple DEP-2025 Prüfungsfragen und -antworten (Apple Deployment and Management Exam) können wir Ihnen 100%-Pass-Garantie versprechen. Wir aktualisieren jeden Tag nach den Informationen von Prüfungsabsolventen oder Mitarbeitern aus dem Testcenter unsere Prüfungsfragen und Antworten zu Apple DEP-2025 Fragenpool (Apple Deployment and Management Exam). Wir extrahieren jeden Tag die Informationen der tatsächlichen Prüfungen und integrieren in unsere Produkte.

Apple DEP-2025 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none">• Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.
Thema 2	<ul style="list-style-type: none">• Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.

Thema 3	<ul style="list-style-type: none"> • Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.
Thema 4	<ul style="list-style-type: none"> • Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.
Thema 5	<ul style="list-style-type: none"> • Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.
Thema 6	<ul style="list-style-type: none"> • Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.
Thema 7	<ul style="list-style-type: none"> • Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.

Apple Deployment and Management Exam DEP-2025 Prüfungsfragen mit Lösungen (Q191-Q196):

191. Frage

Which type of device supports Automated Device Enrollment?

- A. iPad
- B. Mac
- C. iPhone
- D. All of the above

Antwort: D

Begründung:

Automated Device Enrollment (ADE), managed through Apple Business Manager (ABM) or Apple School Manager (ASM), is supported on iPads, iPhones, Macs, and Apple TVs purchased from Apple or authorized resellers. It enables automatic MDM enrollment and supervision during setup. Options A, B, and C are all correct, and D encompasses them, aligning with ADE's broad compatibility as per the Apple Platform Deployment Guide.

192. Frage

Which feature allows IT administrators to manage iCloud settings on a device?

- A. iCloud Backup
- B. MDM
- C. Configuration profiles
- D. Find My

Antwort: C

Begründung:

Configuration profiles allow IT administrators to manage iCloud settings on a device, such as enabling/disabling iCloud Drive, restricting backups, or limiting document sync. These profiles are deployed via MDM or manually, providing granular control over iCloud features. Find My (option B) is a user-facing tracking feature, not a management tool. iCloud Backup (option C) is a specific iCloud service, not a management feature. MDM (option D) is the system that deploys profiles, but the profiles themselves contain the settings. The Apple Platform Deployment Guide details configuration profiles' role in iCloud management.

193. Frage

You configure a Setup Assistant payload to skip the Location Services pane. What is the Location Services status during and after enrollment?

- A. It is shown during Setup Assistant and turned off, but a local administrator can turn it on.
- B. It is shown during Setup Assistant and turned off, but a user can turn it on.
- C. It is hidden during Setup Assistant and turned off, but a local administrator can turn it on.
- **D. It is hidden during Setup Assistant and turned off, but a user can turn it on.**

Antwort: D

Begründung:

Apple's Setup Assistant skip payloads allow organizations to streamline enrollment by hiding certain configuration panes. When the Location Services pane is skipped, the feature defaults to off during enrollment.

Apple Learning specifies that the user retains the ability to enable Location Services later in Settings. This provides flexibility while reducing setup complexity. Skipping does not force the feature permanently off, nor does it require administrator intervention to enable it. The pane is simply suppressed from Setup Assistant, and the user decides post-enrollment whether to activate it. This approach ensures privacy while maintaining compliance with organizational deployment goals.

References: Apple Platform Deployment - "Skip panes during Setup Assistant."

194. Frage

You're remotely erasing a supervised iPad. What can you preserve to speed up redeployment?

- A. User data and settings
- **B. Existing eSIM**
- C. Installed apps
- D. Device passcode

Antwort: B

Begründung:

Preserving eSIM speeds redeployment. The Mobile Device Management Protocol Reference states, "When erasing a supervised iPad, the preserveDataPlan option retains the existing eSIM, avoiding reactivation delays." References:

Mobile Device Management Protocol Reference, "EraseDevice Command" section.

iOS Deployment Reference, "eSIM Preservation" section.

195. Frage

Which type of enrollment provides the most control over organization-owned devices?

- **A. Automated Device Enrollment**
- B. Device Enrollment
- C. User Enrollment

Antwort: A

Begründung:

Automated Device Enrollment (ADE) provides the most control over organization-owned devices by integrating them with an MDM solution during initial setup, without user intervention. Devices enrolled via ADE are automatically supervised, allowing restrictions like mandatory MDM enrollment and advanced policies. Device Enrollment (option B) offers control but requires manual profile installation and doesn't inherently supervise devices unless paired with supervision tools. User Enrollment (option C) is for BYOD, offering less control to protect user privacy. The Apple Platform Deployment Guide positions ADE as the most robust option for organization-owned devices.

196. Frage

.....

Ich kann mein Leben und Arbeit jetzt nicht ertragen. Ich hoffe auf eine andere bessere Arbeit. Sind Sie der ähnlichen Meinung? Aber, wie kann ich bessere Arbeit bekommen? Lieben Sie IT? Wollen Sie durch IT-Zertifizierungsprüfungen Ihre Fähigkeit
