最新的Salesforce Sharing-and-Visibility-Architect: 新版Salesforce

Certified Sharing and Visibility Architect題庫 - 權威的Testpdf Sharing-and-Visibility-Architect考試證照

Testpdf為你提供了不同版本的資料以方便你的使用。PDF版的Sharing-and-Visibility-Architect考古題方便你的閱讀，為你真實地再現考試題目。軟體版本的Sharing-and-Visibility-Architect考古題作為一個測試引擎，可以幫助你隨時測試自己的準備情況。如果你想知道你是不是充分準備好了Sharing-and-Visibility-Architect考試，那麼你可以利用軟體版的考古題來測試一下自己的水準。這樣你就可以快速找出自己的弱點和不足，進而有利於你的下一步學習安排。

最新的 Salesforce Architect Sharing-and-Visibility-Architect 免費考試真題 (Q13-Q18):

問題 #13

Universal Containers (UC) wants to reduce the amount of redundant leads entered into the system. UC.. only edited/reassigned by the lead owner.

What organization-wide default (OWD) approach should be recommended to help UC implement these ..

- A. Implement a Public Read/Write OWD on Lead.
- **B. Implement a Public Read Only OWD on Lead.**
- C. Implement a Public Read Only/Transfer OWD on Lead
- D. Implement a private OWD on Lead.

答案: B

問題 #14

The architect has a requirement to create a criteria-based sharing rule based on the customer Social.. up the rule in Contact Sharing, the field is not shown on the list of available field.

What might cause this?

- A. fields with validation rules are not available for sharing rules.
- B. The architect does not have permission to Compliance fields.
- C. The architect's profile does not have field level Security (FLS) for this field.
- **D. The field has been configured for encryption.**

答案: D

問題 #15

Sales operations at Universal Containers (UC) wants to create list views to filter opportunities for certain geographies.

How should UC hide list views that are not relevant to an individual user since there will be more than 50 list views?

- A. Share the list views with the appropriate queue.
- B. Share the list views with the appropriate individual users.
- **C. Share the list views with the appropriate role and internal subordinates.**

答案: C

解題說明:

* List View Sharing: Salesforce allows list views to be shared with roles, roles and subordinates, public groups, or individual users. To manage visibility of list views for users effectively, sharing with roles and internal subordinates ensures only relevant users within the organizational hierarchy see the list views.

* Why Option A is Correct:

* Sharing with roles and internal subordinates limits access to users in specific roles and their reporting lines, reducing clutter for irrelevant users.

* This method is scalable for organizations with many list views and users.

* Why Others Are Incorrect:

* Option B: Sharing with individual users is not scalable when there are numerous list views and users.

* Option C: Queues are not used to manage list view sharing in this scenario.

For more details, refer to Salesforce documentation on managing list view visibility: <https://help.salesforce.com/>

問題 #16

Universal Containers has a Performance Feedback custom object (Private organization-wide default) used by customers to report any issues with delivery drivers. Feedback should not be visible to the driver, but any feedback records should be accessible to people above them in the Role Hierarchy, even when the driver changes managers.

Assuming managers have Read access to the Feedback object, which three steps are necessary to solve these requirements?

- A. Remove Read permission on the Driver profile, have feedback ownership transferred to the driver when feedback is submitted, and use the Role Hierarchy to give access to a driver's manager
- B. Remove Read permission on the Driver profile, have feedback ownership transferred to the driver when feedback is submitted, and create an ownership-based sharing rule.
- C. Remove Read permission on the Driver profile, have feedback ownership transferred to the driver's manager when feedback is submitted, and use the Role Hierarchy to give access to a driver's manager.

答案： C

解題說明：

* Step 1: Remove Read permission on the Driver profile for the Feedback object to ensure that drivers cannot see their feedback records. Object-level permissions control whether users can see, edit, or delete records.

* Step 2: Automatically transfer ownership of feedback to the driver's manager upon submission. This ensures that managers own the feedback records, providing a natural ownership hierarchy for data visibility.

* Step 3: Leverage the Role Hierarchy to grant access to the manager's superiors, ensuring that visibility extends appropriately up the organizational structure.

* Why Option B is Correct: It directly aligns with the requirement that managers (not drivers) need access, and feedback visibility should follow the Role Hierarchy even after a driver's manager changes.

* Why Others Are Incorrect:

* Option A: Sharing rules would be redundant in this case since the Role Hierarchy already provides the required access.

* Option C: Allowing drivers to retain ownership conflicts with the requirement that they should not have visibility.

For detailed references, see Salesforce Role Hierarchies and Ownership documentation: <https://help.salesforce.com/>

問題 #17

Universal Containers has set Account Sharing to Private with Account Teams enabled. Which two user groups can add team members on the Account? Choose 2 answers

- A. Someone above the Account Owner in the Role Hierarchy with read access
- B. The user specified as the Manager on the Owner's User record
- C. Any Account Team Member with read access on the Account
- D. The current Account Owner can add team members.

答案： A

問題 #18

.....

人生舞臺的大幕隨時都可能拉開，關鍵是你願意表演，還是選擇躲避，能把在面前行走的機會抓住的人，十有八九都是成功的。所以你必須抓住Testpdf這個機會，讓你隨時可以展現你的技能，Testpdf Salesforce的Sharing-and-Visibility-Architect考試培訓資料就是你通過認證的最有效的方法，有了這個認證，你將在你人生的藍圖上隨意揮灑，實現你的夢想，走向成功。要做就做一個勇往直前的人，那樣的人生才有意義。
