Netsuite Suitefoundation Study Cards 2024/2025 Latest Questions and Revised Answers 100% Correct

What is a SuiteAnalytics Dataset? - Answer- 1. A collection of information from records
2. Starts with a root record
3. Pulls info from other record types
4. Used in workbooks

What are the 3 record categories for a Dataset? - Answer- 1. Standard
2. Custom - record types created specifically for your Netsuite instance.
3. Analytical - record types created by Netsuite with the intent to provide analytical data

What is a SuiteAnalytics Workbook? - Answer- A workbook is where you can visualize the data in your datasets.

Datasets contain raw information. Workbooks present that information visually.

The Trend Graph Portlet can be based off of how many KPIs? - Answer- Up to 3

KPI meter does what? - Answer- Has a visual KPI meter that tracks 1 KPI. It can be changed via the dropdown.

A KPI meter portlet displays data for one of the KPIs included in the Key Performance Indicators portlet.

To be able to add a KPI meter for a key performance indicator, you need to add and configure a Key Performance Indicators portlet first.

Each KPI meter can show KPI data for one date range, a comparison of KPI data for two different date ranges, or a flagged threshold value. By default, the meter shows comparisons or thresholds if they are set up for the KPI in the Key Performance Indicators portlet. Whenever you change these options in either the KPI meter or the Key Performance Indicators portlet, they are also changed in the other portlet so that the two portlets remain in sync. You can, however, set up different options for the KPI meter, for instance not showing a comparison in the KPI meter portlet but showing one in the Key Performance Indicators portlet.
