## Salary & Growth Opportunities with Microsoft SC-400 Exam

Microsoft's Information Protection Administrator Certification (MIS) is the foundation for all of Microsoft's security products. It focuses on the protection of data and access to that data from unauthorized users. Employers are looking for this certification if you want to work in the security field; it demonstrates that you have the skills necessary to not only implement but also administer and troubleshoot Microsoft's security products. Microsoft exams are performance based, so they are hands-on. After you register, you will receive an email with a link to Microsoft's online learning center where you can view study materials, explore practice exams and labs, and learn more about the exam objectives. Students can also download a mobile app that provides additional learning tools on their phones or tablets. As long as you pass the exam within one year, you may take advantage of free re-certification. With such a low cost and high earning potential, it is well worth your while to become certified with Microsoft's MIS.

Microsoft SC-400 is a certification exam for individuals who aspire to become Information Protection Administrators. SC-400 exam is designed to validate the candidate's knowledge and skills in implementing, managing, and monitoring information protection solutions in an organization. The SC-400 exam is one of the latest certifications offered by Microsoft and is gaining popularity among IT professionals.

Microsoft Information Protection Administrator exam (SC-400) is a certification exam developed by Microsoft to test the skills and knowledge of individuals who are responsible for managing and implementing Microsoft Information Protection solutions in their organizations. SC-400 exam is intended for candidates who have experience in deploying, managing, and monitoring the Microsoft Information Protection solutions, including Microsoft Azure Information Protection (AIP), Microsoft 365 Data Loss Prevention (DLP), and Microsoft Cloud App Security.

### Microsoft Information Protection Administrator Sample Questions (Q84-Q89):

#### NEW QUESTION # 84

You have a Microsoft 365 E5 tenant that contains a Microsoft SharePoint Online site named Site1 and a user named User1. The tenant has auditing enabled. You need to ensure that User1 can perform disposition reviews. The solution must use the principle of the least privilege. What should you do?

- A. Assign User1 the Data Investigator role.
- **B. Add User1 to the Records Management role group.**
- C. Assign User1 the Compliance Data Administrator role.
- D. Add User1 to the Content Explorer Content Viewer role group.

**Answer: B**

#### NEW QUESTION # 85

Case Study 1 - Fabrikam, Inc

Overview

Fabrikam, Inc. is a consulting company that has a main office in Montreal and six branch offices in New York, Seattle, Miami, Houston, Los Angeles, and Vancouver.

Existing Environment

Cloud Environment

Fabrikam has a Microsoft 365 tenant that contains the following resources:

An Azure Active Directory (Azure AD) tenant that syncs to an on-premises Active Directory domain named corp.fabrikam.com  
Microsoft Cloud App Security connectors configured for all supported cloud applications used by the company  
Some users have company Dropbox accounts.

Compliance Configuration

Fabrikam has the following in the Microsoft 365 compliance center:

A data loss prevention (DLP) policy is configured. The policy displays a tooltip to users. Users can provide a business justification to override a DLP policy violation.

The Azure Information Protection unified labeling scanner is installed and configured.

A sensitivity label named Fabrikam Confidential is configured.

An existing third-party records management system is managed by the compliance department.

Human Resources (HR) Management System

The HR department has an Azure SQL database that contains employee information. Each employee has a unique 12-character alphanumeric ID. The database contains confidential employee attributes including payroll information, date of birth, and personal contact details.

On-Premises Environment

You have an on-premises file server that runs Windows Server 2019 and stores Microsoft Office documents in a shared folder named Data.

All end-user computers are joined to the corp.fabrikam.com domain and run a third-party antimalware application.

Business Processes

Sales Contracts

Users in the sales department receive draft sales contracts from customers by email. The sales contracts are written by the customers and are not in a standard format.

Employment Applications

Employment applications and resumes are received by HR department managers and stored in either mailboxes, Microsoft SharePoint Online sites, OneDrive for Business folders, or Microsoft Teams channels.

The employment application form is downloaded from SharePoint Online and a serial number is assigned to each application.

The resumes are written by the applicants and are in any format.

Requirements

HR Requirements

You need to create a DLP policy that will notify the HR department of a DLP policy violation if a document that contains confidential employee attributes is shared externally. The DLP policy must use an Exact Data Match (EDM) classification derived from a CSV export of the HR department database.

The HR department identifies the following requirements for handling employment applications:

Resumes must be identified automatically based on similarities to other resumes received in the past.

Employment applications and resumes must be deleted automatically two years after the applications are received.

Documents and emails that contain an application serial number must be identified automatically and marked as an employment application.

Sales Requirements

A sensitivity label named Sales Contract must be applied automatically to all draft and finalized sales contracts.

Compliance Requirements

Fabrikam identifies the following compliance requirements:

All DLP policies must be applied to computers that run Windows 10, with the least possible changes to the computers.

Users in the compliance department must view the justification provided when a user receives a tooltip notification for a DLP violation.

If a document that has the Fabrikam Confidential sensitivity label applied is uploaded to Dropbox, the file must be deleted automatically.

The Fabrikam Confidential sensitivity label must be applied to existing Microsoft Word documents in the Data shared folder that have a document footer containing the following string: Company use only.

Users must be able to manually select that email messages are sent encrypted. The encryption will use Office 365 Message Encryption (OME) v2. Any email containing an attachment that has the Fabrikam Confidential sensitivity label applied must be encrypted automatically by using OME.

Existing policies configured in the third-party records management system must be replaced by using Records management in the Microsoft 365 compliance center. The compliance department plans to export the existing policies, and then produce a CSV file that contains matching labels and policies that are compatible with records management in Microsoft 365.

The CSV file must be used to configure records management in Microsoft 365.

Executive Requirements

You must be able to restore all email received by Fabrikam executives for up to three years after an email is received, even if the email was deleted permanently.

You need to recommend a solution that meets the compliance requirements for protecting the documents in the Data shared folder. What should you recommend?

- A. From the Microsoft 365 compliance center, configure an auto-labeling policy.
- **B. From Azure Information Protection, configure a content scan job.**
- C. From the Microsoft 365 compliance center, configure a DLP policy.
- D. From the Microsoft 365 compliance center, configure a Content Search query.

**Answer: B**

Explanation:

You run an AIP scanner on premise. You cannot configure auto labeling from compliance center on premise.

### NEW QUESTION # 86

You have a Microsoft 365 tenant that uses trainable classifiers.

You are creating a custom trainable classifier.

You collect 300 sample file types from various geographical locations to use as seed content. Some of the file samples are encrypted.

You organize the files into categories as shown in the following table.

Category	Type	Language	Encryption status
Category1	.docx	French	Not encrypted
Category2	.xlsx	English	Encrypted
Category3	.pptx	German	Encrypted
Category4	.docx	English	Not encrypted
Category5	.html	English	Not encrypted
Category6	.htm	English	Not encrypted

Which file categories can be used as seed content?

- A. Category1 and Category3 only
- B. Category4 and Category5 only
- C. Category4 and Category6 only
- **D. Category3. and Category5 only**

Answer: D

Explanation:

**NEW QUESTION # 87**

You have a Microsoft 365 subscription.

You create a retention label named Label1 as shown in the following exhibit.

You publish Label1 to SharePoint sites.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer Area**

If you create a file in a Microsoft SharePoint library on January 1, 2023, and apply Label1 to the file, you can [answer choice].

If you create a file in a Microsoft SharePoint library on March 15, 2023, and apply Label1 to the file, the file will [answer choice].

delete the file after January 1, 2025  
never delete the file  
delete the file before January 1, 2025  
delete the file after January 1, 2025

be deleted automatically on March 15, 2025  
always remain in the library  
remain in the library until you delete the file  
be deleted automatically on March 15, 2025

Answer:

Explanation:

**NEW QUESTION # 88**

You have a Microsoft 365 E5 subscription that contains a user named User1 and the groups shown in the following table. You plan to create a communication compliance policy named Policy1. You need to identify whose communications can be monitored by Policy1, and who can be assigned the Reviewer role for Policy1. Who should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

**NEW QUESTION # 89**

.....
