

SC-100 Latest Exam Guide Help You Pass Exam with High Pass Rate - Test4Sure

BONUS!!! Download part of TrainingQuiz CPQ-Specialist dumps for free:
<https://drive.google.com/open?id=1nWsb1oynwrBc8z1CUd1Wxd7Hy-nRPJYW>

Frankly speaking, it is difficult to get the CPQ-Specialist certificate without help. Usually, the time you invest to prepare the exam is long. Now, all of your worries can be wiped out because of our CPQ-Specialist exam questions. Some people worry about that some difficult knowledge is hard to understand or the CPQ-Specialist test guide is not suitable for them. Actually, the difficult parts of the exam have been simplified, which will be easy for you to understand. Also, there will be examples, simulations and charts to make explanations vivid. In order to aid you to memorize the Salesforce Certified CPQ Specialist exam cram better, we have integrated knowledge structure. You will clearly know what you are learning and which part you need to learn carefully. You will regret if you give up challenging yourself.

In order to allow our customers to better understand our CPQ-Specialist quiz prep, we will provide clues for customers to download in order to understand our CPQ-Specialist exam torrent in advance and see if our products are suitable for you. As long as you have questions, you can send us an email and we have staff responsible for ensuring 24-hour service to help you solve your problems. If you use our [CPQ-Specialist Exam Torrent](#), we will provide you with a comprehensive service to overcome your difficulties and effectively improve your ability. If you can take the time to learn about our CPQ-Specialist quiz prep, I believe you will be interested in our products. Our learning materials are practically tested, choosing our CPQ-Specialist exam guide, you will get unexpected surprise.

100% Pass High Pass-Rate CPQ-Specialist - Latest Salesforce Certified CPQ Specialist Exam Pdf

P.S. Free 2025 Microsoft SC-100 dumps are available on Google Drive shared by Test4Sure: https://drive.google.com/open?id=1L91kH1qR7DZAWbAE-JS7_k4R5eAfLYt9

Equally amazing are Test4Sure's SC-100 dumps. They focus only the utmost important portions of your exam and equip you with the best possible information in an interactive and easy to understand language. Think of boosting up your career with this time-tested and the most reliable exam passing formula. SC-100 Brain Dumps are unique and a feast for every ambitious professional who want to try SC-100 exam despite their time constraints. There is a strong possibility that most of these dumps you will find in your actual SC-100 test.

Microsoft SC-100 certification exam is a great way to validate your expertise in cybersecurity architecture and risk management. SC-100 exam consists of multiple-choice questions and is designed to test the candidate's knowledge and skills in various cybersecurity domains. SC-100 Exam is intended for cybersecurity professionals who want to enhance their knowledge and skills and demonstrate their expertise to potential employers.

2026 Microsoft SC-100: Microsoft Cybersecurity Architect –The Best Valid Test Questions

The Microsoft SC-100 PDF questions file of Test4Sure has real Microsoft SC-100 exam questions with accurate answers. You can download Microsoft PDF Questions file and revise Microsoft Cybersecurity Architect SC-100 exam questions from any place at any time. We also offer desktop SC-100 practice exam software which works after installation on Windows computers. The SC-100 web-based practice test on the other hand needs no software installation or additional plugins. Chrome, Opera, Microsoft Edge, Internet Explorer, Firefox, and Safari support the web-based SC-100 Practice Exam. You can access the Microsoft SC-100 web-based practice test via Mac, Linux, iOS, Android, and Windows. Test4Sure Microsoft Cybersecurity Architect SC-100 practice test (desktop & web-based) allows you to design your mock test sessions. These Microsoft SC-100 exam practice tests identify your mistakes and generate your result report on the spot.

Microsoft Cybersecurity Architect Sample Questions (Q72-Q77):

NEW QUESTION # 72

Your company has an office in Seattle.

The company has two Azure virtual machine scale sets hosted on different virtual networks.

The company plans to contract developers in India.

You need to recommend a solution provide the developers with the ability to connect to the virtual machines over SSL from the Azure portal. The solution must meet the following requirements:

- * Prevent exposing the public IP addresses of the virtual machines.
- * Provide the ability to connect without using a VPN.
- * Minimize costs.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Deploy Azure Bastion to each virtual network.
- **B. Create NAT rules and network rules in Azure Firewall.**
- C. Deploy Azure Bastion to one virtual network.
- D. Enable just-in-time VM access on the virtual machines.
- **E. Create a hub and spoke network by using virtual network peering.**

Answer: B,E

Explanation:

Topic 1, Litware, inc.

Existing Environment

Litware has an Azure Active Directory (Azure AD) tenant that syncs with an Active Directory Domain Services (AD DS) forest named Utvare.com and is linked to 20 Azure subscriptions. Azure AD Connect is used to implement pass-through authentication. Password hash synchronization is disabled, and password writeback is enabled. All Litware users have Microsoft 365 E5 licenses. The environment also includes several AD DS forests, Azure AD tenants, and hundreds of Azure subscriptions that belong to the subsidiaries of Litware.

Planned Changes

Litware plans to implement the following changes:

- * Create a management group hierarchy for each Azure AD tenant.
- * Design a landing zone strategy to refactor the existing Azure environment of Litware and deploy all future Azure workloads.
- * Implement Azure AD Application Proxy to provide secure access to internal applications that are currently accessed by using the VPN.

Business Requirements

Litware identifies the following business requirements:

- * Minimize any additional on-premises infrastructure.
- * Minimize the operational costs associated with administrative overhead.

Hybrid Requirements

Litware identifies the following hybrid cloud requirements:

- * Enable the management of on-premises resources from Azure, including the following:
- * Use Azure Policy for enforcement and compliance evaluation.
- * Provide change tracking and asset inventory.
- * Implement patch management.
- * Provide centralized, cross-tenant subscription management without the overhead of maintaining guest accounts.

Microsoft Sentinel Requirements

Litware plans to leverage the security information and event management (SIEM) and security orchestration automated response (SOAR) capabilities of Microsoft Sentinel. The company wants to centralize Security Operations Center (SOC) by using Microsoft Sentinel.

Identity Requirements

Litware identifies the following identity requirements:

- * Detect brute force attacks that directly target AD DS user accounts.
- * Implement leaked credential detection in the Azure AD tenant of Litware.
- * Prevent AD DS user accounts from being locked out by brute force attacks that target Azure AD user accounts.
- * Implement delegated management of users and groups in the Azure AD tenant of Litware, including support for:
 - * The management of group properties, membership, and licensing
 - * The management of user properties, passwords, and licensing
- * The delegation of user management based on business units.

Regulatory Compliance Requirements

Litware identifies the following regulatory compliance requirements:

- * Insure data residency compliance when collecting logs, telemetry, and data owned by each United States- and France-based subsidiary.
- * Leverage built-in Azure Policy definitions to evaluate regulatory compliance across the entire managed environment.
- * Use the principle of least privilege.

Azure Landing Zone Requirements

Litware identifies the following landing zone requirements:

- * Route all internet-bound traffic from landing zones through Azure Firewall in a dedicated Azure subscription.
- * Provide a secure score scoped to the landing zone.
- * Ensure that the Azure virtual machines in each landing zone communicate with Azure App Service web apps in the same zone over the Microsoft backbone network, rather than over public endpoints.
- * Minimize the possibility of data exfiltration.
- * Maximize network bandwidth.

The landing zone architecture will include the dedicated subscription, which will serve as the hub for internet and hybrid connectivity.

Each landing zone will have the following characteristics:

- * Be created in a dedicated subscription.
- * Use a DNS namespace of litware.com.

Application Security Requirements

Litware identifies the following application security requirements:

- * Identify internal applications that will support single sign-on (SSO) by using Azure AD Application Proxy.
- * Monitor and control access to Microsoft SharePoint Online and Exchange Online data in real time.

NEW QUESTION # 73

Drag and Drop Question

You have a Microsoft 365 subscription

You need to recommend a security solution to monitor the following activities:

- User accounts that were potentially compromised
 - Users performing bulk file downloads from Microsoft SharePoint Online
- What should you include in the recommendation for each activity? To answer, drag the appropriate components to the correct activities. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each Correct selection is worth one Point.

| Components | Answer Area |
|--|---|
| <input type="checkbox"/> A data loss prevention (DLP) policy | <input type="checkbox"/> User accounts that were potentially compromised: Component |
| <input type="checkbox"/> Azure Active Directory (Azure AD) Conditional Access | <input type="checkbox"/> Users performing bulk file downloads from SharePoint Online: Component |
| <input type="checkbox"/> Azure Active Directory (Azure AD) Identity Protection | |
| <input type="checkbox"/> Microsoft Defender for Cloud | |
| <input type="checkbox"/> Microsoft Defender for Cloud Apps | |

Answer:

Explanation:

Components

- A data loss prevention (DLP) policy
- Azure Active Directory (Azure AD) Conditional Access
- Azure Active Directory (Azure AD) Identity Protection
- Microsoft Defender for Cloud
- Microsoft Defender for Cloud Apps

Answer Area

- User accounts that were potentially compromised: Azure Active Directory (Azure AD) Identity Protection
- Users performing bulk file downloads from SharePoint Online: Microsoft Defender for Cloud Apps

Explanation:

Box 1: Azure Active Directory (Azure AD) Identity Protection

Risk detections in Azure AD Identity Protection include any identified suspicious actions related to user accounts in the directory. Risk detections (both user and sign-in linked) contribute to the overall user risk score that is found in the Risky Users report. Identity Protection provides organizations access to powerful resources to see and respond quickly to these suspicious actions.

Note:

Premium sign-in risk detections include:

- * Token Issuer Anomaly - This risk detection indicates the SAML token issuer for the associated SAML token is potentially compromised. The claims included in the token are unusual or match known attacker patterns.
- * Suspicious inbox manipulation rules - This detection is discovered by Microsoft Defender for Cloud Apps. This detection profiles your environment and triggers alerts when suspicious rules that delete or move messages or folders are set on a user's inbox. This detection may indicate that the user's account is compromised, that messages are being intentionally hidden, and that the mailbox is being used to distribute spam or malware in your organization.
- * Etc.

Incorrect:

Not: Microsoft 365 Defender for Cloud

Part of your incident investigation can include user accounts. You can see the details of user accounts identified in the alerts of an incident in the Microsoft 365 Defender portal from Incidents & alerts > incident > Users.

Box 2: Microsoft 365 Defender for App

Defender for Cloud apps detect mass download (data exfiltration) policy Detect when a certain user accesses or downloads a massive number of files in a short period of time.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/identity-protection/concept-identity-protection-risks>

<https://docs.microsoft.com/en-us/defender-cloud-apps/policies-threat-protection#detect-mass-download-data-exfiltration>

<https://docs.microsoft.com/en-us/microsoft-365/security/defender/investigate-users>

NEW QUESTION # 74

You have a Microsoft 365 subscription and an Azure subscription. Microsoft 365 Defender and Microsoft Defender for Cloud are enabled.

The Azure subscription contains a Microsoft Sentinel workspace. Microsoft Sentinel data connectors are configured for Microsoft 365, Microsoft 365 Defender, Defender for Cloud, and Azure.

You plan to deploy Azure virtual machines that will run Windows Server.

You need to enable extended detection and response (EDR) and security orchestration, automation, and response (SOAR) capabilities for Microsoft Sentinel.

How should you recommend enabling each capability? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

EDR:

- Add a Microsoft Sentinel data connector for Azure Active Directory (Azure AD).
- Add a Microsoft Sentinel data connector for Microsoft Defender for Cloud Apps.
- Onboard the servers to Azure Arc.
- Onboard the servers to Defender for Cloud.

SOAR:

- Configure Microsoft Sentinel analytics rules.
- Configure Microsoft Sentinel playbooks.
- Configure regulatory compliance standards in Defender for Cloud.
- Configure workflow automation in Defender for Cloud.

Answer:

Explanation:

EDR:

- Add a Microsoft Sentinel data connector for Azure Active Directory (Azure AD).
- Add a Microsoft Sentinel data connector for Microsoft Defender for Cloud Apps.
- Onboard the servers to Azure Arc.
- Onboard the servers to Defender for Cloud.

SOAR:

- Configure Microsoft Sentinel analytics rules.
- Configure Microsoft Sentinel playbooks.
- Configure regulatory compliance standards in Defender for Cloud.
- Configure workflow automation in Defender for Cloud.

NEW QUESTION # 75

You are designing security for a runbook in an Azure Automation account. The runbook will copy data to Azure Data Lake Storage Gen2.

You need to recommend a solution to secure the components of the copy process.

What should you include in the recommendation for each component? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Data security:

- Access keys stored in Azure Key Vault
- Automation Contributor built-in role
- Azure Private Link with network service tags
- Azure Web Application Firewall rules with network service tags

Network access control:

- Access keys store in Azure Key Vault
- Automation Contributor built-in role
- Azure Private Link with network service tags
- Azure Web Application Firewall rules with network service tags

Answer:

Explanation:

Answer Area

Data security:

- Access keys stored in Azure Key Vault
- Automation Contributor built-in role
- Azure Private Link with network service tags
- Azure Web Application Firewall rules with network service tags

Network access control:

- Access keys store in Azure Key Vault
- Automation Contributor built-in role
- Azure Private Link with network service tags
- Azure Web Application Firewall rules with network service tags

NEW QUESTION # 76

You need to recommend a solution to meet the requirements for connections to ClaimsDB.

What should you recommend using for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 77

.....

If you are aiming to become a certified Microsoft SC-100, you should prepare with actual exam questions and study guides. These study materials will enable you to pass the exam without much difficulty. Microsoft's practice exams will help you prepare well for the actual exam. The questions are updated and easy to understand. The test materials also consist of a realistic scenario that simulates the exam environment.
