**Quiz CV0-004 - Trustable CompTIA Cloud+ (CV0-004) Certification Exam**

## Test Pass4sure

Notwithstanding zeroing in on our material, expecting that you went after in the CompTIA CV0-004 exam, you can guarantee your cash back as per systems. By seeing your goofs you can work on your show continually for the CV0-004 Exam approach. You can give vast phony tests to make them ideal for CompTIA Cloud+ (CV0-004) Certification Exam (CV0-004) exam and can check their past given exams. CompTIA CV0-004 Dumps will give reliable free updates to our clients generally all the CompTIA CV0-004 certifications.

### CompTIA Cloud+ (CV0-004) Certification Exam Sample Questions (Q64-Q69):

#### NEW QUESTION # 64

A company's engineering department is conducting a month-long test on the scalability of an in-house-developed software that requires a cluster of 100 or more servers. Which of the following models is the best to use?

- A. DBaaS
- B. PaaS
- C. IaaS
- D. SaaS

**Answer: C**

Explanation:

For testing the scalability of an in-house-developed software that requires a cluster of 100 or more servers, Infrastructure as a Service (IaaS) is the best model. IaaS provides the necessary compute resources and allows the engineering department to configure the environment as needed for their specific test without the constraints that might be present in PaaS or SaaS offerings. Reference: CompTIA Cloud+ Study Guide (Exam CV0-004) - Chapter on Cloud Service Models

#### NEW QUESTION # 65

An organization's web application experiences periodic bursts of traffic when a new video is launched. Users are reporting poor performance in the middle of the month. Which of the following scaling approaches should the organization use to scale based on forecasted traffic?

- A. Manual
- B. Load
- C. Scheduled
- D. Event

**Answer: C**

Explanation:

For periodic bursts of traffic that are predictable, such as when a new video is launched, a scheduled scaling approach is suitable. This strategy involves scaling resources based on forecasted or known traffic patterns, ensuring that the infrastructure can handle the load during expected peak times.

#### NEW QUESTION # 66

An administrator needs to provide a backup solution for a cloud infrastructure that enables the resources to run from another data center in case of an outage. Connectivity to the backup data center is via a third-party, untrusted network. Which of the following is the most important feature required for this solution?

- A. Compression
- B. Replication
- C. Encryption
- D. Deduplication
- E. Labeling

**Answer: C**

Explanation:

When backing up data that will traverse a third-party, untrusted network, encryption is the most important feature to ensure the confidentiality and integrity of the data. Encryption will protect the data from potential interception or tampering during transit to the backup data center. References: CompTIA Cloud+ Guide to Cloud Computing (ISBN: 978-1-64274-282-2)

#### NEW QUESTION # 67

Which of the following is an auditing procedure that ensures service providers securely manage the data to protect the interests of the organization and the privacy of its clients?

- A. CIS
- **B. SOC2**
- C. ITIL
- D. ISO 27001

**Answer: B**

Explanation:

SOC2 (Service Organization Control 2) is an auditing procedure that ensures service providers securely manage data to protect the interests of an organization and the privacy of its clients. SOC2 is specifically designed for service providers storing customer data in the cloud, making it pertinent for data management and privacy.

Reference: SOC2 and its role in auditing and ensuring secure data management by cloud service providers are part of the compliance standards and regulations included in the CompTIA Cloud+ certification material.

#### NEW QUESTION # 68

A cloud engineer is extending on-premises services to a public cloud. The following design requirements must be considered in the overall solution:

"The ability to remotely connect systems from both environments

\* No IP address conflicts or overlap

\* Cost-effectiveness

Which of the following cloud network concepts best meets these requirements?

- A. VLAN
- **B. VPN**
- C. Dedicated connection
- D. ACL

**Answer: B**

Explanation:

A Virtual Private Network (VPN) is the most cost-effective solution for extending on-premises services to a public cloud while ensuring secure remote connectivity. VPNs can be configured to avoid IP address conflicts and overlap by using IP address translation and tunneling techniques, making them suitable for connecting disparate environments without significant changes to the existing network infrastructure.

#### NEW QUESTION # 69

.....

Our company has always been following the trend of the CV0-004 certification. Our research and development team not only study what questions will come up in the CV0-004 exam. The content of our CV0-004 practice materials is chosen so carefully that all the questions for the exam are contained.
