

2026 CDT: Efficient Hottest Construction Documents Technologist Certification

BTW, DOWNLOAD part of PrepAwayTest CDT dumps from Cloud Storage: <https://drive.google.com/open?id=1OEBUuGwBimFK5z2sKkc23ggY8LSFv2Hl>

Getting certified is a surefire way to advance your career in the IT industry. Nowadays, Construction Specifications Institute CDT certification has been one of the hottest exams which many IT candidates chased after. While how to pass the CDT exam test in an efficient way is another question for all of you. I think our PrepAwayTest CDT will do some help. The high hit rate can ensure you 100% pass. The regular updates of the CDT study material can keep you one step ahead in the real exam. The comprehensive questions with the accurate answers will help you have a good knowledge of the actual test and assist you pass with ease.

To help you prepare well, we offer three formats of our Construction Specifications Institute CDT exam product. These formats include Construction Specifications Institute CDT PDF dumps, Desktop Practice Tests, and web-based Construction Specifications Institute CDT practice test software. Your selection on the right tool to help your pass the CDT Exam and get the according certification matters a lot for the right CDT exam braindumps will spread you a lot of time and efforts.

100% Pass Quiz Construction Specifications Institute - High-quality Hottest CDT Certification

Great concentrative progress has been made by our company, who aims at further cooperation with our candidates in the way of using our CDT exam engine as their study tool. Owing to the devotion of our professional research team and responsible working staff, our CDT Training Materials have received wide recognition and now, with more people joining in the CDT exam army, we has become the top-raking CDT learning guide provider in the international market.

Construction Specifications Institute Construction Documents Technologist Sample Questions (Q121-Q126):

NEW QUESTION # 121

The emphasis shifts from overall relationships and functions to more technical issues during which design phase?

- A. Preliminary design
- B. Construction documents
- **C. Design development**
- D. Schematic design

Answer: C

NEW QUESTION # 122

During the schematic design phase, a contingency line item in the estimate would be included to cover which of the following?

- A. Allowances
- **B. Unknown factors**
- C. Alternates
- D. Unit prices

Answer: B

NEW QUESTION # 123

In construction documents, what does the agreement refer to?

- A. The agreement between the contractor and the subcontractor
- B. The general conditions of the contract for construction
- C. The agreement between the owner and the architect/engineer
- **D. The agreement between the owner and the contractor**

Answer: D

Explanation:

Within CSI's framework for contract documents, the term "Agreement" (capitalized) has a specific meaning. It refers to the formal written contract for construction between the Owner and the Contractor.

CSI describes the typical structure of the contract documents as including:

- * The Agreement between Owner and Contractor (such as AIA A101 or similar),
- * The Conditions of the Contract (General and Supplementary Conditions),
- * Drawings, Specifications, and Addenda,
- * And other documents listed in the Agreement.

The Agreement sets out key commercial terms (contract sum, contract time, identification of the work, list of contract documents, progress payments, etc.) and binds the owner and contractor to the Conditions of the Contract and the remainder of the documents.

Why the other options are not correct:

- * A. Agreement between the owner and the architect/engineer - This is usually a separate professional services agreement (often titled Owner-Architect Agreement or similar) and is not what CSI and AIA mean by "the Agreement" within the construction contract set.
- * B. The general conditions of the contract for construction - The General Conditions are a separate document; they become part of the contract when they are incorporated by reference in the Agreement, but they are not themselves "the Agreement."
- * D. Agreement between the contractor and the subcontractor - This is a separate subcontract document, not part of the owner-contractor contract set defined in the project manual.

CSI's practice material on contract formation and document relationships consistently identifies "the Agreement" as the contract between the Owner and the Contractor, hence Option C is correct.

NEW QUESTION # 124

According to standard general conditions, which of the following is true about shop drawings?

- A. They include performance charts, instructions, and brochures.
- **B. They illustrate some portion of the work.**
- C. They are contract documents.
- D. They are reviewed only by the architect/engineer.

Answer: B

NEW QUESTION # 125

What project scheduling technique involves setting the target date of building occupancy and then working backwards to establish preceding milestone dates?

- A. Front end loading
- **B. Critical path method**
- C. Methods technique
- D. Schedule of values

Answer: B

Explanation:

CSI's project delivery and scheduling discussions describe network scheduling techniques such as the Critical Path Method (CPM) as tools for planning, sequencing, and controlling project time. CPM scheduling can be done either:

- * Forward, starting from a known start date and computing early and late completion dates, or
- * Backward, starting from a required completion/occupancy date and working backward to determine the latest allowable dates for preceding activities and milestones so that the final completion date is achieved.

This "working backward from a target completion or occupancy date to set milestone dates" is a classic application of the backward pass within the Critical Path Method. CSI's project management materials emphasize that CPM is used to:

- * Establish logic relationships and durations,
- * Calculate early and late start/finish dates,
- * Identify the critical path, and
- * Adjust the schedule to meet a required completion or occupancy date by compressing or resequencing activities where possible.

Why the other options are not correct:

- * A. Methods technique - This is not a standard CSI or mainstream term for a recognized scheduling method.
- * C. Front end loading - In project management and cost engineering usage, this refers to investing significant effort early in project definition and planning; it is not specifically defined as the technique of back-scheduling from an occupancy date.
- * D. Schedule of values - This is a cost-allocation and payment document that breaks the contract sum into portions for progress payments. It is not a scheduling technique.

Because CPM scheduling explicitly supports setting a required completion date and then working backward to develop realistic milestone dates and activity sequencing, Option B - Critical path method is the best and CSI-consistent answer.

NEW QUESTION # 126

.....

These Construction Specifications Institute CDT practice tests simulate the real Construction Documents Technologist (CDT) exam pattern, track your progress, and help you overcome mistakes. Our Construction Documents Technologist (CDT) desktop software is compatible with Windows. Whereas, the web-based Construction Specifications Institute CDT Practice Exam works online on iOS, Linux, Android, Windows, and Mac. Additionally, the web-based Construction Documents Technologist (CDT) practice exam is also compatible with MS Edge, Internet Explorer, Opera, Firefox, Safari, and Chrome.
