Cisco 300-745 Questions Exam Study Tips And Information

Everyone has the right to pursue happiness and wealth. You can rely on the 300-745 certificate to support yourself. If you do not own one or two kinds of skills, it is difficult for you to make ends meet in the modern society. After all, you can rely on no one but yourself. At present, our 300-745study materials can give you a ray of hope. You can get the 300-745 certification easily with our 300-745 learning questions and have a better future.

Cisco Designing Cisco Security Infrastructure Sample Questions (Q25-Q30):

NEW QUESTION # 25
A software development company relies on GitHub for managing the source code and is committed to maintaining application security. The company must ensure that known software vulnerabilities are not introduced to the application. The company needs a capability within GitHub that can analyze semantic versioning and flag any software components that pose security risks. Which GitHub feature must be used?

- A. Depend-a-bot
- B. Artifact attestations

- C. Sealed boxes
- D. GitHub Actions

Answer: A

Explanation:
Dependabot is a GitHub feature that automatically scans project dependencies, analyzes semantic versioning, and flags or updates components with known vulnerabilities. This prevents insecure software libraries from being introduced into the application.

NEW QUESTION # 26
A manufacturing company recently experienced a network-down scenario due to malware spread on the management network. The company wants to implement a solution to detect and mitigate a similar threat in the future and protect the overall network. Which solution meets the requirements?

- A. endpoint detection and response
- B. encrypted threat analysis
- C. IPsec VPN
- D. RADIUS

Answer: A

Explanation:
Endpoint Detection and Response (EDR) provides continuous monitoring, detection, and automated mitigation of malware at the endpoint level. By stopping threats before they spread across the management network, EDR protects the overall infrastructure from similar network- down scenarios in the future.

NEW QUESTION # 27
Which two best practices align with incident response and compliance objectives? (Choose two.)

- A. Disable auditing to improve performance
- B. Maintain immutable logs
- C. Use shared admin credentials
- D. Implement real-time monitoring

Answer: B,D

Explanation:
Immutable logs preserve evidence integrity, while real-time monitoring allows faster detection and response-both essential for incident response and regulatory compliance.

NEW QUESTION # 28
A global hotel chain is using Cisco ISE and Cisco switches to manage the network. The hotel company wants to enhance network security by segmenting users and endpoints. The company must ensure that devices within the same VLAN cannot communicate with each other. The goal is to prevent cross-communication without the use of dynamic access control lists. Which action must be taken using Cisco ISE to meet the requirement?

- A. Configure TrustSec.
- B. Enable identity groups.
- C. Set up endpoint profiling.
- D. Implement device posturing.

Answer: A

Explanation:
Cisco TrustSec provides software-defined segmentation by assigning Security Group Tags (SGTs) to users and devices. This allows policy enforcement that prevents communication between devices in the same VLAN without needing dynamic ACLs. It is the correct approach to achieve secure segmentation in this scenario.

NEW QUESTION # 29

A financial company uses a remote access solution that directs all traffic over a secure tunnel.
The company recently received some large ISP bills from the headcounter location. According to traffic analysis during the investigation, most of the network traffic was due to employees spending a lot of time on video conferences provided by a SaaS collaboration company. What must the company modify to reduce the cost without negatively impacting security or employee experience?

- A. Reduce the video resolution size permitted within the SaaS application.
- B. Suggest users to disconnect from the VPN when on video calls.
- C. Split-exclude the video SaaS application from the VPN.
- D. Block the video conferencing app when connected on VPN.

Answer: C

Explanation:
Split-exclusion allows trusted SaaS traffic (such as video conferencing) to bypass the VPN tunnel while keeping all other traffic secured. This reduces bandwidth costs at the headend location without degrading security or employee experience, since traffic to the SaaS provider is still encrypted natively.

NEW QUESTION # 30

......

If you are going to purchase 300-745 test materials online, the safety of the website is significant. We provide you with a clean and safe online shopping environment if you buying 300-745 trining materials form us. We have professional technicians to exam the website every day, therefore the safety for the website can be guaranteed. Moreover, 300-745 Exam Materials are high quality and accuracy, and you can pass the exam just one time. We offer you free update for 356 days for 300-745 traing materials and the update version will be sent to your email automatically.
