

Pass ACD201 Exam with Reliable ACD201 Reliable Test Practice by TorrentExam

DOWNLOAD the newest TorrentExam ACD201 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1zLt5OjeTi94rIc3qK2hMv6RTvjpDhova>

Are you planning to appear in the Appian Senior Developer (ACD201) certification test and need to know where to get updated practice questions? Then you are at the right place because Appian Senior Developer (ACD201) has made the learning material for the applicants to prepare successfully for the certification exam in a short time.

Appian ACD201 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Advanced Appian Concepts: This section of the exam measures the skills of Solution Architects and covers creating and configuring authentication methods, setting up integration objects, designing APIs, evaluating smart services and plug-ins, and applying SSO mechanisms with SAML and LDAP.
Topic 2	<ul style="list-style-type: none">Application Design and Development: This section of the exam measures the skills of Appian Developers and covers translating business requirements into user stories, building end-to-end applications, managing object security, applying design best practices, and ensuring user-centric experiences through proper UX design.
Topic 3	<ul style="list-style-type: none">Data Management: This section of the exam measures the skills of Solution Architects and covers designing and documenting data models, recommending record types for optimization and security, working with relational data, and implementing complex models with supporting objects.
Topic 4	<ul style="list-style-type: none">Performance and Scalability: This section of the exam measures the skills of Appian Developers and covers designing performant components, building memory-efficient models, conducting database load and automated testing, analyzing server memory and logs for risks, and resolving performance concerns for end users.

Excellent ACD201 – 100% Free Reliable Test Practice | Pdf ACD201 Pass Leader

In addition to the PDF questions TorrentExam offers desktop Appian Senior Developer (ACD201) practice exam software and web-based Appian Senior Developer (ACD201) practice exam, to help you cope with Appian Senior Developer (ACD201) exam anxiety. These Appian ACD201 Practice Exams simulate the actual Appian ACD201 exam conditions and provide you with an accurate assessment of your readiness for the ACD201 exam.

Appian Senior Developer Sample Questions (Q19-Q24):

NEW QUESTION # 19

You need to add test cases to an existing expression rule in the system. Expression rule gives a complex data type value as an output result.

The test case should pass only when a field in the resultant data matches with a specific value mentioned.

How should you configure the test case assertion?

- A. Test completes without errors.
- B. Test output matches the asserted output.
- C. Assertion expression evaluates to True.

Answer: C

Explanation:

Configuring the test case assertion so that the assertion expression evaluates to True allows you to specifically check whether the desired field in the complex data type result matches the required value.

NEW QUESTION # 20

You're reviewing the process model built by your team member.

Which two design decisions might cause performance issues? (Choose two.)

- A. No target process for the Send Message event
- B. Too many nodes
- C. Asynchronous subprocess
- D. Data types passed by reference

Answer: A,B

Explanation:

Having no target process for the Send Message event can cause unnecessary processing and delays.

Too many nodes in a process model increase complexity and processing overhead, leading to potential performance issues.

NEW QUESTION # 21

You're conducting a code review and notice that some accessibility features are missing on the interfaces.

Which two UX best practices should be followed to align with accessibility requirements? (Choose two.)

- A. Indicate the hierarchy of sections with a heading tag in addition to label sizes (for example: "H1").
- B. Use rich text items to act as headers for structuring interfaces.
- C. Use a single rich text icon with "POSITIVE" or "NEGATIVE" styling to indicate statuses.
- D. Apply a label value for all fields when the label position is "Hidden".

Answer: A,D

Explanation:

Applying a label value for all fields, even when the label position is hidden, ensures screen readers and assistive technologies can interpret the field correctly.

Indicating the hierarchy of sections with heading tags improves navigation for users with assistive technologies, aligning with accessibility standards.

NEW QUESTION # 22

You're conducting a design review.

You identify slow-performing expression rules querying a specific data store, and need to understand the "number of operations against data stores."

Which metric from the data_store_details.csv file is helpful to you?

- A. Execute Count
- B. Query Count

- Answer: B**

The "Query Count" metric in the `data_store_details.csv` file indicates the number of operations (queries) performed against data stores, helping you analyze data store usage.

- A. Multiple local variables hold duplicate data.
- B. Local variables are set to refresh every five minutes.
- C. Data transformation is performed inside the interface rather than delegated to the source system.
- D. The load variable has a web service response as JSON.

Performing data transformation inside the interface can increase the amount and size of context data stored, raising context size risk. Multiple local variables holding duplicate data unnecessarily inflate the interface's memory footprint, contributing to large context size.
