

# UiPath UiPath-ADAv1 Prüfung Übungen und Antworten

## UIPATH-ADAV1 PRACTICE TEST QUESTIONS AND ANSWERS

UiPath Certified Professional Automation Developer Associate - answer UiPath Certified Professional Automation Developer Associate is expected to be able to (1) independently design and develop simple Automation solutions or (2) be a productive member of an automation team led by an experienced Automation Developer responsible for developing complex solutions using UiPath technologies. This exam assesses knowledge and skills related to problem solving, process identification, and building simple automation solutions with UiPath platform components such as UiPath Studio, Robots, and Orchestrator.

Exam Details - answer Certification Tracks: UiPath Certified Professional - Developer Track Credential: UiPath Certified Professional Automation Developer Associate v1.0 Valid Period: 3 years Exam Number and Exam Title: UiPath-ADAv1 - UiPath Automation Developer Associate v1.0 Exam Pre-requisite Exam(s) and/or Certification(s): None. Some Hands-on experiences with UiPath Studio are recommended. Exam Duration: 90 minutes Passing Score: 70% Exam Fee: \$150.00

Exam Domains/Exam Sections - answer The Automation Developer Associate v1.0 Exam contains the following exam sections:• Business Knowledge• Platform Knowledge• Studio Interface• Variables and Arguments• Control Flow• Debugging• Exception Handling• Logging• UI Automation• Object Repository• Excel Automation• Email Automation• PDF Automation• Working with Files and Folders• Data Manipulation• Version Control Integration• Libraries and Templates• Workflow Analyzer• Implementation Methodology• Orchestrator• Integration Service

Viele Webseiten bieten UiPath UiPath-ADAv1 Zertifizierungsunterlagen und andere Unterlagen. Aber wir Fast2test sind die einzige Website, die besten UiPath UiPath-ADAv1 Zertifizierungsunterlagen zu bieten. Mit der Hilfe von Fast2test können Sie nur einmal UiPath UiPath-ADAv1 Zertifizierungsprüfung zu bestehen. Die UiPath UiPath-ADAv1 Prüfungsfragen und Testantworten von Fast2test sind von reichen Erfahrungen und Kenntnissen gesammelt. Diese bieten Ihnen eine gute Chance, in IT-Industrie zu entwickeln.

## UiPath UiPath-ADAv1 Prüfungsplan:

| Thema   | Einzelheiten   |
|---------|--|
| Thema 1 | <ul style="list-style-type: none"><li>• UI Automation: Here, the topic explains how UI Automation works and offer guidance on using the Modern Recorder and associated activities. It also covers UI synchronization and the configuration of static and dynamic descriptors.</li></ul>  |
| Thema 2 | <ul style="list-style-type: none"><li>• Orchestrator: This topic covers the definition of Orchestrator entities, tenant entities, and folder entities, along with their respective functionalities. It also provides practical guidance on robot provisioning, workspace management, role assignments, and logging features.</li></ul> |
| Thema 3 | <ul style="list-style-type: none"><li>• Libraries and Templates: This topic covers the creation, publication, and consumption of process libraries, along with the sharing and access of templates, promoting efficient project development and standardization.</li></ul>   |
| Thema 4 | <ul style="list-style-type: none"><li>• PDF Automation: The section focuses on data extraction from native and scanned PDFs, including single and multiple document scenarios.</li></ul>   |

|          |   |
|----------|---|
| Thema 5  | <ul style="list-style-type: none"> <li>• <b>Business Knowledge:</b> This topic covers the fundamental concepts of business process automation, highlighting its value proposition. It also explores key ideas related to business processes, offering a comprehensive understanding of this domain.</li> </ul>  |
| Thema 6  | <ul style="list-style-type: none"> <li>• <b>Working with Files and Folders:</b> Here, you explore creating, managing, and navigating local files and folders, providing a foundation for file system automation.</li> </ul>   |
| Thema 7  | <ul style="list-style-type: none"> <li>• <b>Studio Interface:</b> Here, the topic guides users through installing Studio Community Edition and connecting to Orchestrator. It covers profile differences, backstage view options, compatibility modes, and package management. Additionally, it offers an in-depth exploration of the Studio interface and its various elements.</li> </ul> |
| Thema 8  | <ul style="list-style-type: none"> <li>• <b>Email Automation:</b> This topic covers retrieving emails via IMAP</li> <li>• POP3, sending SMTP messages, and managing integrations with Microsoft and Gmail accounts, utilizing their respective packages.</li> </ul>   |
| Thema 9  | <ul style="list-style-type: none"> <li>• <b>Control Flow:</b> The section explains the functionality of control flow activities and their impact on workflow types. It covers the use of sequence and flowchart layouts. Lastly, it focuses on implementing IF, For Each, and While activities, among others.</li> </ul>  |
| Thema 10 | <ul style="list-style-type: none"> <li>• <b>Data Manipulation:</b> This topic covers a range of data manipulation techniques, including string manipulation using VB.Net methods and the RegEx Builder. It also guides users through working with arrays, lists, and dictionaries, as well as building and iterating through DataTables.</li> </ul>   |
| Thema 11 | <ul style="list-style-type: none"> <li>• <b>Version Control Integration:</b> The section highlights the benefits of version control by demonstrating the use of Studio's Git integration for adding projects, cloning repositories, committing changes, and managing branches.</li> </ul>   |
| Thema 12 | <ul style="list-style-type: none"> <li>• <b>Exception Handling:</b> This topic focuses on error management, showcasing the use of Try Catch, Throw, and Rethrow activities, along with the Retry Scope feature, to handle exceptions gracefully.</li> </ul>   |
| Thema 13 | <ul style="list-style-type: none"> <li>• <b>Implementation Methodology:</b> The section offers an overview of project implementation stages, interpretation of PDDs and SDDs, and the conduct of automation project peer reviews, ensuring a structured approach to development.</li> </ul>   |
| Thema 14 | <ul style="list-style-type: none"> <li>• <b>Platform Knowledge:</b> The section provides an overview of UiPath's product suite, including Studio and Robot variants, Orchestrator, and Integration Service, showcasing their unique contributions. It also emphasizes the benefits of Academy, Forum, and Marketplace in the UiPath ecosystem.</li> </ul>                                   |

## UiPath-ADAv1 Prüfungsübungen - UiPath-ADAv1 Trainingsunterlagen

IT-Industrie entwickelt sich sehr schnell und die Angestellten in dieser Branche werden mehr gefordert. Wenn Sie nicht ausscheiden möchten, ist das Bestehen der UiPath UiPath-ADAv1 Prüfung notwendig. Vielleicht haben Sie Angst davor, dass Sie die in der UiPath UiPath-ADAv1 durchfallen, auch wenn Sie viel Zeit und Geld aufwenden. Dann lassen wir Fast2test Ihnen helfen! Zahllose Benutzer der UiPath UiPath-ADAv1 Prüfungssoftware geben wir die Konfidenz, Ihnen zu garantieren, dass mit Hilfe unserer Produkte werden Ihr Bestehen der UiPath UiPath-ADAv1 gesichert sein!

## UiPath Automation Developer Associate v1 Exam UiPath-ADAv1 Prüfungsfragen mit Lösungen (Q310-Q315):

### 310. Frage

To retrieve all Outlook emails with the word "UiPath" in the subject, which filtering property and filter schema should a developer use?

- A. Property: FilterByMessageIds

- Schema: "@SQL=""urn:schemas:httpmail:subject"" like 'UiPath%'"
- B. Property: Filter  
Schema: "@SQL=""urn:schemas:httpmail:subject"" like 'UiPath%'"
- C. Property: Filter  
Schema: "@SQL=""urn:schemas:httpmail:subject"" like '%UiPath%'"
- D. Property: FilterByMessageIds  
Schema: "@SQL=""urn:schemas:httpmail:subject"" like '%UiPath%'"

**Antwort: C**

Begründung:

To retrieve all Outlook emails with the word "UiPath" in the subject, a developer should use the Filter property and the filter schema "@SQL=""urn:schemas:httpmail:subject"" like '%UiPath%'". The Filter property allows developers to specify a DASL query that filters the emails based on various criteria, such as subject, sender, date, etc. The filter schema

"@SQL=""urn:schemas:httpmail:subject"" like '%UiPath%'"" uses the SQL dialect of DASL to search for emails that have the word "UiPath" anywhere in the subject. The "%" symbol is a wildcard that matches any character or string. (UiPath Automation Developer study guide) References:

Get Outlook Mail Messages

Chapter 11: Searching Outlook Data | Microsoft Learn

### 311. Frage

A developer is working with a Purchase Order automation process. The number of shipped containers and the number of items in each container are extracted in two strings, "ShippedContainers" and "ItemsPerContainer". The robot must calculate the total number of items in all shipped containers, as an Integer.

Which expression is suitable for calculating the total number of boxes?

- A. String.ToInt32(ShippedContainers) \* String.ToInt32(ItemsPerContainer)
- B. Convert.ToInt32(ShippedContainers) \* Convert.ToInt32(ItemsPerContainer)
- C. CInt(ShippedContainers \* ItemsPerContainer)
- D. ShippedContainers.ToInt32() \* ItemsPerContainer.ToInt32()

**Antwort: B**

Begründung:

This expression is suitable for calculating the total number of boxes because it converts both strings to integers using the Convert.ToInt32 method, which is a built-in method in .NET that can handle various formats of numeric strings<sup>1</sup>. Then, it multiplies the two integers to get the total number of boxes as an integer.

The other expressions are not suitable because they either use incorrect syntax or methods that do not exist or are not reliable for converting strings to integers. References:

1: Convert.ToInt32 Method

### 312. Frage

Which Control Flow activity is suitable for a developer who needs to assess the value of a counter before executing the loop's body in a workflow?

- A. Do While
- B. )While
- C. If
- D. Switch

**Antwort: B**

Begründung:

The While activity is a Control Flow activity that enables the developer to execute a specified part of the automation while a condition is met. The condition is evaluated before the loop body is executed, which means that the developer can assess the value of a counter or any other variable before performing the actions inside the loop. This type of activity can be useful to iterate through an array, a list, a data table, or any other collection of data, or to repeat an action until a certain value is reached or changed. The While activity can be found in the Activities panel, under Workflow > Control.

### 313. Frage

A developer has configured the Project Settings for UI Automation Modern and added a Check App State activity In the project, as shown below.

□

- A. 0.2 seconds
- B. 0 seconds
- C. 30 seconds
- D. 0.3 seconds

**Antwort: A**

Begründung:

Understanding the Default Delay in Modern UI Automation

In UiPath Studio, when using Modern UI Automation activities, the default values for delays, timeouts, and wait settings can be configured at the Project Settings level. If these properties are not explicitly set within an activity, UiPath will inherit the values from the Project Settings.

Analysis of the Provided Images:

\* Project Settings (UI Automation Modern Tab)

\* Delay before (seconds)

\* Run value: 0.2

\* Debug value: 0.2

\* This means that any Modern UI Automation activity (like Check App State) will use 0.2 seconds as the default delay before execution unless manually changed in the activity.

\* Check App State Activity Properties Panel

\* The "Delay before" field is empty, meaning it will inherit the default value from Project Settings, which is 0.2 seconds.

Explaining the Answer Choices:

\* A (0 seconds) # Incorrect

\* If the Project Settings had no predefined value, the default UiPath behavior might have been 0 seconds. However, the provided settings explicitly define it as 0.2 seconds.

\* B (0.2 seconds) # Correct

\* The Project Settings define 0.2 seconds as the default "Delay before" value for all Modern UI Automation activities.

\* Since no value is manually set in the Check App State activity, it inherits 0.2 seconds from Project Settings.

\* C (0.3 seconds) # Incorrect

\* 0.3 seconds is set as the "Delay after" value, not "Delay before".

\* D (30 seconds) # Incorrect

\* 30 seconds is the default timeout value, not the "Delay before" value.

B:(0.2 seconds)

# Official UiPath References:

\* Check App State Activity

\* Delays and Timeouts in UI Automation

### 314. Frage

What are the steps to publish a project from UiPath Studio?

Instructions: Drag the Description found on the "Left" and drop on the correct Step Sequence found on the "Right".

□

**Antwort:**

Begründung:

□

Explanation:

A screenshot of a computer Description automatically generated

□

The steps to publish a project from UiPath Studio are:

In the Design ribbon tab, click on the "Publish" button. The Publish Project window opens. (UiPath Studio documentation1) Fill in the necessary publishing details, such as the project name, version, and description. You can also add release notes and select the environment where the project will run. (UiPath Studio documentation1) Choose the desired publishing option, such as Orchestrator, Local, or Custom NuGet feed. Depending on your choice, you may need to provide additional information, such as the Orchestrator URL, the local folder path, or the custom feed URL. (UiPath Studio documentation1) Click on the "Publish" button to initiate the publishing process. A confirmation message will appear when the project is successfully published. (UiPath Studio documentation1) Short Explanation: Publishing a project from UiPath Studio means creating a package that contains all the files and dependencies required to run the automation process. The package can be deployed to different locations, such as Orchestrator, a local machine, or a custom NuGet feed. Publishing a project from UiPath Studio involves four main steps: clicking on the Publish button, filling in the publishing details, choosing the publishing option, and confirming the publishing process. (UiPath Automation Developer study guide2) References:
