When dealing with any kind of exams, the most important thing is to find a scientific way to review effectively. Our C_S4PM_2504 practice materials compiled by the most professional experts. Till now, we have over tens of thousands of customers around the world supporting our C_S4PM_2504 exam torrent. If you are unfamiliar with our C_S4PM_2504 Study Materials, please download the free demos for your reference. To some unlearned exam candidates, you can master necessities by our C_S4PM_2504 practice materials quickly. So our materials are elemental materials you cannot miss.

Our C_S4PM_2504 free demo provides you with the free renewal in one year so that you can keep track of the latest points happening in the world. As the questions of exams of our C_S4PM_2504 exam torrent are more or less involved with heated issues and customers who prepare for the exams must haven't enough time to keep trace of exams all day long, our C_S4PM_2504 Practice Test can serve as a conducive tool for you make up for those hot points you have ignored. Therefore, you will have more confidence in passing the exam, which will certainly increase your rate to pass the C_S4PM_2504 exam.

C_S4PM_2504 Online Test - Free PDF Quiz 2026 C_S4PM_2504: SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects First-grade Customized Lab Simulation

We have an authoritative production team, after you purchase C_S4PM_2504 study materials, our professions can consolidate important knowledge points for you, and we guarantee that your C_S4PM_2504 practice quiz is tailor-made. The last but not least, we can provide you with a free trial service, so that customers can fully understand our format before purchasing our C_S4PM_2504 training guide, which can be an unparalleled trial experience compared to other counterparts.

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q67-Q72):

NEW QUESTION # 67

What tools enable non-developers to create low/no-code extensions? Note: There are 2 correct answers to this question.

- A. SAP Fiori extensibility apps
- B. SAP Build
- C. SAP Business Application Studio
- D. SAP Cloud SDK

Answer: A,B

NEW QUESTION # 68

Which of the following Accelerators can you find in the SAP Signavio Process Navigator? Note: There are 2 correct answers to this question.

- A. Test Script
- B. Stakeholder Identification Guide
- C. Process Diagram
- D. Data Migration plan

Answer: A,C

Explanation:

SAP Signavio Process Navigator is a tool that provides access to SAP Best Practice process models and accelerators to support SAP S/4HANA Cloud Public Edition implementations, particularly during the Explore phase for process validation.

* Option A: Data Migration plan Incorrect. Data migration plans are managed through the SAP S/4HANA Migration Cockpit, not SAP Signavio Process Navigator. The SAP S/4HANA Cloud Migration Guide states, "Data migration plans are created using the Migration Cockpit, not included as accelerators in SAP Signavio Process Navigator."

* Option B: Stakeholder Identification Guide Incorrect. Stakeholder identification guides are part of organizational change management (OCM) accelerators, typically found in SAP Cloud ALM or SAP Activate resources, not SAP Signavio. The SAP S/4HANA Cloud OCM Guide notes, "Stakeholder identification guides are OCM tools, not part of SAP Signavio Process Navigator's process-focused accelerators."

* Option C: Test Script Correct. SAP Signavio Process Navigator includes test scripts to support process validation and testing. The SAP Signavio Documentation explains, "SAP Signavio Process Navigator provides accelerators like test scripts, which outline steps to validate SAP Best Practice processes during implementation."

* Option D: Process Diagram Correct. Process diagrams, often in BPMN format, are core accelerators in SAP Signavio Process Navigator, illustrating standard processes. The SAP S/4HANA Cloud Implementation Guide confirms, "SAP Signavio Process Navigator offers process diagrams as accelerators, providing visual representations of SAP Best Practices to support Fit-to-Standard workshops." Extract from Official Documentation:

* SAP Signavio Documentation (SAP Help Portal, <https://help.sap.com>): "SAP Signavio Process Navigator includes accelerators such as test scripts and process diagrams, which support process validation and implementation planning for SAP S/4HANA Cloud Public Edition."

* SAP S/4HANA Cloud Implementation Guide (SAP Community, <https://community.sap.com>):

"Accelerators in SAP Signavio Process Navigator, including process diagrams and test scripts, enable teams to understand and validate SAP Best Practice processes during the Explore phase." Additional Context:

SAP Signavio Process Navigator enhances the Fit-to-Standard process by providing visual and actionable accelerators like process diagrams and test scripts, which help customers align their requirements with SAP Best Practices, ensuring a standardized and efficient implementation.

:

SAP Help Portal: SAP Signavio Documentation (<https://help.sap.com>).

SAP Community: SAP S/4HANA Cloud Implementation Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details Signavio accelerators.

SAP Activate Methodology: Outlines process validation tools.

NEW QUESTION # 69

Which system tenant is the first to be provisioned when implementing SAP S/4HANA Cloud, public edition?

- A. SAP S/4HANA Cloud Sandbox system
- B. SAP Cloud Identity Services
- C. SAP S/4HANA Cloud Development system
- **D. Central Business Configuration system**

Answer: D

Explanation:

The implementation of SAP S/4HANA Cloud Public Edition involves provisioning multiple system tenants in a specific sequence to support configuration, testing, and production. The first tenant provisioned sets the foundation for subsequent activities.

* Option A: SAP S/4HANA Cloud Sandbox systemIncorrect. The Sandbox system is provisioned later for prototyping and testing, not as the first tenant. TheSAP S/4HANA Cloud Implementation Guide states, "The Sandbox system is provisioned after initial configuration to support exploration and testing, not as the first tenant."

* Option B: SAP S/4HANA Cloud Development systemIncorrect. There is no dedicated Development system in SAP S/4HANA Cloud Public Edition; development occurs in other systems. TheSAP S/4HANA Cloud Study Guidenotes, "Development activities are handled in Sandbox or Test systems, not a separate Development tenant."

* Option C: SAP Cloud Identity ServicesIncorrect. SAP Cloud Identity Services manage user authentication but are not the first tenant provisioned for implementation. TheSAP S/4HANA Cloud Security Guideclarifies, "SAP Cloud Identity Services are configured alongside implementation systems, not as the initial tenant."

* Option D: Central Business Configuration systemCorrect. The Central Business Configuration (CBC) system is the first tenant provisioned, enabling scoping and configuration of the SAP S/4HANA Cloud solution. TheSAP Central Business Configuration Guideexplains, "The Central Business Configuration system is the first tenant provisioned in SAP S/4HANA Cloud Public Edition, providing the platform for defining scope, organizational structure, and pre-configuration." Extract from Official Documentation:

* SAP Central Business Configuration Guide(SAP Help Portal,<https://help.sap.com>): "The Central Business Configuration system is the first tenant provisioned when implementing SAP S/4HANA Cloud Public Edition, enabling the initial scoping and configuration of the solution."

* SAP S/4HANA Cloud Implementation Guide(SAP Community,<https://community.sap.com>):

"Implementation begins with the provisioning of the Central Business Configuration system, which serves as the foundation for defining the SAP S/4HANA Cloud solution scope and settings." Additional Context:

The CBC system is critical for initiating the implementation, as it allows customers to define the solution scope, activate SAP Best Practices, and configure organizational structures before other systems like the Starter or Sandbox are provisioned. This ensures a standardized and efficient setup process.

:

SAP Help Portal: SAP Central Business Configuration Guide (<https://help.sap.com>).

SAP Community: SAP S/4HANA Cloud Implementation Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details system provisioning.

SAP Activate Methodology: Outlines implementation sequence.

NEW QUESTION # 70

Which type of testing should be done after a release upgrade has occurred?

- A. Integration tests
- B. String tests
- C. User Acceptance tests
- **D. Regression tests**

Answer: D

Explanation:

Release upgrades in SAP S/4HANA Cloud Public Edition introduce new features and updates, necessitating testing to ensure system stability.

* Option A: Regression testsCorrect. Regression testing is performed after a release upgrade to verify that existing functionalities continue to work as expected. SAP's official documentation recommends regression testing to validate that new changes do not negatively impact core processes.

- * Option B: User Acceptance testsIncorrect. User Acceptance Testing (UAT) is typically conducted during the initial implementation or major configuration changes, not specifically after a release upgrade.
- * Option C: String testsIncorrect. String tests validate specific process flows during implementation, not post-upgrade scenarios.
- * Option D: Integration testsIncorrect. Integration tests focus on system connectivity during implementation, not post-upgrade validation of existing functionality.

:

SAP S/4HANA Cloud Testing Guide: Recommends regression testing post-upgrade (<https://help.sap.com>).

SAP Activate Methodology: Includes regression testing in the Deploy phase for upgrades.

SAP S/4HANA Cloud Public Edition Study Guide: Highlights testing strategies for release upgrades.

NEW QUESTION # 71

Why does SAP recommend to perform regression testing during the upgrade window for SAP S/4HANA Cloud Public Edition?

- A. To confirm that the database schema changes have been implemented successfully
- B. To validate that all user permissions have been properly migrated to the new version
- **C. To verify existing functionality still works correctly after the upgrade**
- D. To ensure that new features of the upgrade are working as specified in the requirements

Answer: C

Explanation:

Regression testing is a critical activity during the upgrade window for SAP S/4HANA Cloud Public Edition to ensure system stability and continuity of operations post-upgrade.

* Option A: To ensure that new features of the upgrade are working as specified in the requirementsIncorrect. Testing new features is part of functional or exploratory testing, not regression testing, which focuses on existing functionality. TheSAP S/4HANA Cloud Testing Guidestates,

"Regression testing verifies existing functionality, while new features are tested separately during functional or user acceptance testing."

* Option B: To validate that all user permissions have been properly migrated to the new version Incorrect. User permissions are validated through security testing, not regression testing. TheSAP S/4HANA Cloud Security Guidenotes, "Permission validation is handled through security and role-based testing, not regression testing, which focuses on business processes."

* Option C: To confirm that the database schema changes have been implemented successfully Incorrect. Database schema changes are validated through technical or integration testing, not regression testing. TheSAP S/4HANA Cloud Implementation Guideclarifies, "Databaseschema validation is a technical task, whereas regression testing focuses on business process continuity."

* Option D: To verify existing functionality still works correctly after the upgradeCorrect.

Regression testing ensures that existing business processes and functionalities remain operational after an upgrade. TheSAP S/4HANA Cloud Testing Guideexplains, "SAP recommends regression testing during the upgrade window to verify that existing functionality in SAP S/4HANA Cloud Public Edition continues to work correctly, preventing disruptions to business operations."

Extract from Official Documentation:

* SAP S/4HANA Cloud Testing Guide(SAP Help Portal,<https://help.sap.com>): "Regression testing is performed during the upgrade window to verify that existing functionality in SAP S/4HANA Cloud Public Edition remains intact, ensuring business continuity after the introduction of new releases."

* SAP S/4HANA Cloud Implementation Guide(SAP Community,<https://community.sap.com>): "During upgrades, regression testing is critical to confirm that core business processes and existing functionalities are unaffected by the new release, safeguarding system reliability." Additional Context:

SAP S/4HANA Cloud Public Edition's semi-annual upgrades introduce new features and updates, making regression testing essential to mitigate risks of unintended impacts on existing processes. This aligns with SAP's cloud strategy of maintaining stability while delivering continuous innovation.

:

SAP Help Portal: SAP S/4HANA Cloud Testing Guide (<https://help.sap.com>).

SAP Community: SAP S/4HANA Cloud Implementation Guide (<https://community.sap.com>).

SAP Activate Methodology Guide: Includes testing strategies for upgrades.

SAP S/4HANA Cloud Study Guide: Explains regression testing purpose.
