Practice GH-300 Tests & Latest GH-300 Real Test

Some people are not good at operating computers. So you might worry about that the GH-300 certification materials are not suitable for you. Try to believe us. Our experts have taken your worries seriously. They have made it easy to operate for all people. Even if you know little about computers, you can easily begin to do exercises of the GH-300 real exam dumps. Also, we have invited for many volunteers to try our study materials. The results show our products are suitable for them. In addition, the system of our GH-300 test training is powerful. You will never come across system crashes. The system we design has strong compatibility. High speed running completely has no problem at all.

Microsoft GitHub Copilot Sample Questions (Q93-Q98):

NEW QUESTION # 93
In what way can GitHub Copilot and GitHub Copilot Chat aid developers in modernizing applications?

- A. GitHub Copilot can directly convert legacy applications into cloud-native architectures.
- B. GitHub Copilot can suggest modern programming patterns based on your code.
- C. GitHub Copilot can refactor applications to align with upcoming standards.
- D. GitHub Copilot can create and deploy full-stack applications based on a single query.

Answer: B

Explanation:
GitHub Copilot and GitHub Copilot Chat are powerful AI-driven tools designed to assist developers by providing context-aware code suggestions and interactive support. Specifically, in the context of modernizing applications, GitHub Copilot excels at analyzing existing code and suggesting modern programming patterns, best practices, and syntax improvements that align with contemporary

development standards. For example, it can recommend updates to outdated constructs, propose more efficient algorithms, or suggest frameworks and libraries that are widely used in modern application development.

* Why not A?GitHub Copilot does not "directly convert" legacy applications into cloud-native architectures. It can assist by suggesting code changes or patterns that support such a transition, but it doesn't autonomously perform the full conversion process, which involves architectural decisions and deployment steps beyond its scope.

* Why not C?While GitHub Copilot can generate code snippets and even larger portions of an application, it cannot create and deploy full-stack applications from a single query. It requires developer input, refinement, and integration to achieve a complete, deployable solution.

* Why not D?GitHub Copilot can assist with refactoring by suggesting improvements to existing code, but it doesn't inherently "align with upcoming standards" in a predictive sense. Its suggestions are based on current best practices and the data it was trained on, not future standards that are yet to be defined.

Thus,Bis the most accurate and realistic way GitHub Copilot aids developers in modernizing applications, leveraging its ability to provide relevant, context-based suggestions to update and improve codebases.

Reference: GitHub Copilot documentation on application modernization.

NEW QUESTION # 94

How does GitHub Copilot Enterprise assist in code reviews during the pull request process? (Select two.)

- A. It generates a prose summary and a bulleted list of key changes for pull requests.
- B. It can answer questions about the changeset of the pull request.
- C. It automatically merges pull requests after an automated review.
- D. It can validate the accuracy of the changes in the pull request.

Answer: A,B

Explanation:
GitHub Copilot Enterprise assists in code reviews by generating summaries of pull requests and answering questions about the changes made.

NEW QUESTION # 95

An independent contractor develops applications for a variety of different customers. Assuming no concerns from their customers, which GitHub Copilot plan is best suited?

- A. GitHub Copilot Enterprise
- B. GitHub Copilot Business for non-GHE Customers
- C. GitHub Copilot Teams
- D. GitHub Copilot Business
- E. GitHub Copilot Individual

Answer: E

Explanation:
For an independent contractor, GitHub Copilot Individual is the most suitable and cost-effective plan.
Reference: GitHub Copilot pricing documentation.

NEW QUESTION # 96

What content can be configured to be excluded with content exclusions? (Each correct answer presents part of the solution. Choose three.)

- A. Gists
- B. Lines in files
- C. Files
- D. Repositories
- E. Folders

Answer: C,D,E

Explanation:

"Enterprise administrators can configure content exclusions to exclude entire repositories, folders, or specific files from being used by Copilot." This confirms that files, folders, and repositories can be excluded, but not individual lines or gists.
References: GitHub Copilot content exclusions documentation.

NEW QUESTION # 97
What is a likely effect of GitHub Copilot being trained on commonly used code patterns?

- A. Suggest code snippets that reflect the most common practices in the training data.
- B. Suggest homogeneous solutions if provided a diverse data set.
- C. Suggest innovative coding solutions that are not yet popular.
- D. Suggest completely novel projects, while reducing time on a project.

Answer: A

Explanation:
GitHub Copilot is likely to suggest code snippets that reflect common practices in its training data, as it learns from frequently used patterns.

NEW QUESTION # 98
......

We are intent on keeping up with the latest technologies and applying them to the GH-300 exam questions and answers not only on the content but also on the displays. Our customers have benefited from the convenience of state-of-the-art. That is why our pass rate on GH-300 practice quiz is high as 98% to 100%. The data are unique-particular in this career. With our GH-300 exam torrent, you can enjoy the leisure study experience as well as pass the GH-300 exam with success ensured.
