So you can also trust the top standard of Amazon AWS-Certified-Cloud-Practitioner exam dumps and start AWS-Certified-Cloud-Practitioner practice questions preparation without wasting further time.

Amazon AWS Certified Cloud Practitioner Sample Questions (Q551-Q556):

NEW QUESTION # 551

A company with a Developer-level AWS Support plan provisioned an Amazon RDS database and cannot connect to it.

- A. AWS Professional Services
- **B. Who should the developer contact for this level of support?**
- C. AWS Support using a support case
- D. AWS Technical Account Manager AWS consulting partners

Answer: B

NEW QUESTION # 552

Which of the following AWS Cloud services can be used to run a customer-managed relational database?

- A. Amazon Route 53
- B. Amazon DynamoDB
- **C. Amazon EC2**
- D. Amazon ElastiCache

Answer: C

NEW QUESTION # 553

What function do security groups serve related Amazon Elastic Compute Cloud (Amazon EC2) instance security?

- A. Use Amazon CloudFront to protect the Amazon EC2 instance.
- **B. Act as a virtual firewall for the Amazon EC2 instance.**
- C. Provide DDoS protection with AWS Shield.
- D. Secure AWS user accounts with AWS identity and Access Management (IAM) policies.

Answer: B

Explanation:

AWS Security Groups act like a firewall for your Amazon EC2 instances controlling both inbound and outbound traffic. When you launch an instance on Amazon EC2, you need to assign it to a particular security group.

After that, you can set up ports and protocols, which remain open for users and computers over the internet.

AWS Security Groups are very flexible. You can use the default security group and still customize it according to your liking (although we don't recommend this practice because groups should be named according to their purpose.) Or you can create a security group that you want for your specific applications. To do this, you can write the corresponding code or use the Amazon EC2 console to make the process easier.

NEW QUESTION # 554

According to the AVVS shared responsibility model, the customer is responsible for applying the latest security updates and patches for which of the following?

- A. Amazon RDS instances
- B. Amazon DynamoDB
- **C. Amazon EC2 instances**
- D. Amazon S3

Answer: C

NEW QUESTION # 555

A characteristic of edge locations is that they:

- A. refresh data changes daily.
- B. host Amazon EC2 instances closer to users.
- C. help lower latency and improve performance for users.
- **D. cache frequently changing data without reaching the origin server.**

Answer: D

NEW QUESTION # 556
