2026 High Pass-Rate I27001F Complete Exam Dumps | I27001F 100% Free New Test Syllabus

Doubtlessly, clearing the I27001F certification exam is a challenging task. You can make this task considerably easier by studying with actual Certified ISO/IEC 27001:2022 Foundation (I27001F) Questions of VCEngine. We provide you with a triple-formatted I27001F Practice Test material, made under the supervision of experts. This product has everything you need to clear the challenging I27001F exam in one go.

CertiProf Certified ISO/IEC 27001:2022 Foundation Sample Questions (Q38-Q43):

NEW QUESTION # 38

What does ISO/IEC 27001:2022 require for information security risk assessment?

- A. Applying an information security risk assessment process that establishes and maintains information security risk criteria
- B. Acquisition of a set of information security tools to automate the assessment using artificial intelligence
- C. A person designated by top management
- D. A consultancy to perform the information security risk assessment professionally

Answer: A

Explanation:

ISO/IEC 27001:2022 does not require a specific tool, consultant, or named individual as the basis for compliance. What it does require is that the organization define and apply an information security risk assessment process that establishes and maintains risk criteria, ensures consistent, valid, and comparable results, identifies risks, analyzes risks, and evaluates risks. Therefore, option D is the correct answer.

NEW QUESTION # 39

Which of the following aspects is considered a critical success factor in the implementation of an Information Security Management System?

- A. Promoting good information security practices
- B. Satisfying social needs and expectations
- C. Increasing the confidence of interested parties in the organization
- D. Completely avoiding all information security incidents

Answer: C

Explanation:

A well-implemented ISMS helps build trust and confidence among interested parties by demonstrating that information security risks are being managed systematically and effectively. Completely preventing all incidents is unrealistic and not required by ISO/IEC 27001:2022. Promoting good practices is important, but the broader organizational outcome recognized as a major success factor is increased confidence by customers, partners, regulators, and other interested parties. Therefore, option D is the best answer.

NEW QUESTION # 40

What does ISO/IEC 27001:2022 require for information security risk treatment?

- A. A consultancy to accurately perform information security risk treatment
- B. A person designated by top management with expertise to perform information security risk treatment
- C. Performing an information security risk treatment process to select appropriate risk treatment options, taking into account the results of the risk assessment
- D. Acquiring a set of information security tools to automate risk treatment

Answer: C

Explanation:

ISO/IEC 27001:2022 requires the organization to define and apply an information security risk treatment process. This process must select appropriate information security risk treatment options, determine the controls necessary to implement the chosen options, compare the selected controls with Annex A, produce a Statement of Applicability, and formulate a risk treatment plan. The standard does not require a consultant, a specific tool, or a single appointed individual as the basis for compliance. Therefore, option B is correct.

NEW QUESTION # 41

Which statement describes a critical success factor for an Information Security Management System ISMS?

- A. Purchasing a good antivirus system
- B. Implementing an effective information security awareness, education, and training program
- C. Hiring a consulting firm that is also the same firm that will perform the third-party audit
- D. Hiring a certified ISMS implementation consultant with at least five successful cases

Answer: B

Explanation:

A successful ISMS depends heavily on awareness, competence, and engagement across the organization. ISO/IEC 27001:2022 emphasizes competence, awareness, communication, leadership, and operational discipline. An effective awareness, education, and training program helps ensure that people understand their information security responsibilities and contribute to the effectiveness of the ISMS. Hiring consultants or buying specific tools may help in some cases, but they are not critical success factors defined by the standard itself. Therefore, option B is the correct answer.

NEW QUESTION # 42

According to ISO/IEC 27001:2022, is it necessary to ensure that the Information Security Management System can achieve its intended results?

- A. It is a recommendation, but not a requirement
- B. It is only an observation to keep in mind when auditing the management system
- C. None of the above
- **D. It is a requirement to be fulfilled**

Answer: D

Explanation:

ISO/IEC 27001:2022 requires the organization to plan actions to address risks and opportunities so that the ISMS can achieve its intended outcomes, prevent or reduce undesired effects, and achieve continual improvement. This is a direct requirement of the standard and not optional guidance. Therefore, option B is the correct answer.

NEW QUESTION # 43

.....

Our test engine is an exam simulation that makes our candidates feel the atmosphere of I27001F actual test and face the difficulty of certification exam ahead. It reminds you of your mistakes when you practice I27001F vce dumps next time and you can set your test time like in the formal test. Our I27001F Training Materials cover the most content of the real exam and the accuracy of our I27001F test answers is 100% guaranteed.
