

1Z1-771 Praxisprüfung & 1Z1-771 Musterprüfungsfragen

2026 Die neuesten DeutschPrüfung 1Z1-771 PDF-Versionen Prüfungsfragen und 1Z1-771 Fragen und Antworten sind kostenlos verfügbar: https://drive.google.com/open?id=1AaqcvwkqRK44zBcr3rZ4_C_xtGgb9XXS

Fragenkataloge zur Oracle 1Z1-771 Zertifizierungsprüfung von DeutschPrüfung sind zutreffender, autoritärer und leichter zu verstehen als die aus anderen Webseiten. Wählen Sie DeutschPrüfung, werden Sie niemals bereuen. Falls Sie noch ein paar Sorgen haben, können Sie einige kostenlosen Testfragen und Antworten als Testvision durch unsere Webseite DeutschPrüfung herunterladen. Nachdem Sie die Fragenkataloge zur Oracle 1Z1-771 Zertifizierungsprüfung von DeutschPrüfung gekauft haben, können Sie sicherlich erfolgreich bestehen.

Oracle 1Z1-771 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.
Thema 2	Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.
Thema 3	Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Thema 4	Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
Thema 5	Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.
Thema 6	Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.

Thema 7	Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Thema 8	Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.
Thema 9	Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Thema 10	Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
Thema 11	Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
Thema 12	Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
Thema 13	Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
Thema 14	Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.
Thema 15	Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.
Thema 16	Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
Thema 17	Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Thema 18	Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.

1Z1-771 Musterprüfungsfragen & 1Z1-771 Prüfungs-Guide

Wenn Sie DeutschPrüfung wählen, steht der Erfolg schon vor der Tür. Und bald können Sie Oracle 1Z1-771 Zertifikat bekommen.

Das Produkt von DeutschPrüfung bietet Ihnen 100%-Pass-Garantie und auch einen kostenlosen einjährigen Update-Service.

Oracle APEX Cloud Developer Professional 1Z1-771 Prüfungsfragen mit Lösungen (Q38-Q43):

38. Frage

In your application, you want to display data in a searchable, customizable report that supports inline editing at runtime using the mouse or keyboard. Which report type will you create?

- A. Interactive Report
- B. Classic Report
- **C. Interactive Grid**
- D. Smart Filters

Antwort: C

Begründung:

An Interactive Grid is the report type that supports searchable, customizable data display with inline editing at runtime using mouse or keyboard. Interactive Reports are searchable and customizable but lack inline editing. Classic Reports are static, and Smart Filters is a component, not a report type.

39. Frage

There is a validation of type Item is Numeric on the P1_SALARY item. When the page is submitted, this error message is displayed both as a notification and inline with the item. What will cause the validation error to appear only in the Notification area?

- **A. Setting Display Location to Inline in Notification**
- B. Setting Value Required to Yes on P1_SALARY.
- C. Removing P1_SALARY from the validation Associated Item.

Antwort: A

Begründung:

Validation errors in APEX default to both inline (next to the item) and notification (top of page):

C . Setting Display Location to Inline in Notification: In the validation's properties, changing "Display Location" to "Inline in Notification" ensures the error appears only in the notification area, suppressing inline display. This centralizes feedback for a cleaner UI.

A . Removing Associated Item: Breaks the validation's link to P1_SALARY, stopping it entirely.

B . Value Required: Adds a separate check, unrelated to display location.

Pitfall: Test with non-numeric input (e.g., "abc") to confirm behavior.

40. Frage

Which two statements are true about Oracle APEX?

- **A. You can build interactive reporting apps based on data from disparate systems.**
- B. Application definition is not stored in the database.
- **C. APEX eliminates middle tier application logic.**
- D. Running an APEX app needs client software.

Antwort: A,C

Begründung:

Key truths about Oracle APEX:

APEX eliminates middle tier application logic: APEX runs entirely within the Oracle Database, using PL/SQL and SQL for logic, bypassing traditional middle-tier servers (e.g., Java EE). This simplifies architecture and boosts performance.

You can build interactive reporting apps based on data from disparate systems: Via REST Data Sources, database links, or ORDS, APEX integrates data from external systems, enabling unified reporting (e.g., combining on-premises and cloud data).

Needs client software: False; APEX is web-based, requiring only a browser.

Application definition not stored in database: False; definitions are stored as metadata in the database (e.g., APEX_APPLICATIONS).

This reflects APEX's database-centric, low-code philosophy.

41. Frage

The Movies faceted search report is filtered only when the Apply button for a selected facet is clicked. What must be done in the Page Designer so that report filtering is automatically executed when any facet value is selected?

- A. Navigate to the faceted search region Attributes, and disable the Batch Facet Changes attribute.
- B. Navigate to the faceted search region Attributes, and turn off the Show Facet Name attribute.
- C. Navigate to each facet and then in the Property Editor, turn on Client-Side Filtering.

Antwort: A

Begründung:

By default, faceted search can "batch" changes, requiring an "Apply" button click to filter the report. To enable automatic filtering: Disable the Batch Facet Changes attribute: In Page Designer, under the Faceted Search region's Attributes, setting "Batch Facet Changes" to "No" ensures the report refreshes immediately when a facet value is selected, improving responsiveness. This triggers an AJAX call to update the report without a manual submit.

Show Facet Name: This controls facet label visibility, unrelated to filtering behavior.

Client-Side Filtering: This applies to Interactive Reports/Grids, not faceted search regions, and isn't the correct solution here. This adjustment enhances the user experience by providing instant feedback.

42. Frage

You use the Create Page Wizard to create a faceted search page on the EMP table. What is the default report type generated for this page?

- A. Interactive Report
- B. Column Toggle Report
- C. Interactive Grid
- D. Classic Report

Antwort: A

Begründung:

When creating a faceted search page via the Create Page Wizard, the default report type is an Interactive Report. This pairs with the faceted search region to provide a searchable, filterable, and customizable report, leveraging the facets for dynamic filtering.

43. Frage
