## Real ADP Questions, ADP Study Material

Good news comes that our company has successfully launched the new version of the ADP guide tests. Perhaps you are deeply bothered by preparing the exam; perhaps you have wanted to give it up. Now, you can totally feel relaxed with the assistance of our ADP Actual Test. It is very worthy for you to buy our product. Not only can our study materials help you pass the exam, but also it can save your much time. What are you waiting for? Follow your passion and heart.

## Google Associate Data Practitioner Sample Questions (Q22-Q27):

### NEW QUESTION # 22

Your company uses Looker to visualize and analyze sales dat

a. You need to create a dashboard that displays sales metrics, such as sales by region, product category, and time period. Each metric relies on its own set of attributes distributed across several tables. You need to provide users the ability to filter the data by specific sales representatives and view individual transactions. You want to follow the Google-recommended approach. What should you do?

- A. Use Looker's custom visualization capabilities to create a single visualization that displays all the sales metrics with filtering and drill-down functionality.
- B. Create multiple Explores, each focusing on each sales metric. Link the Explores together in a dashboard using drill-down functionality.
- C. Use BigQuery to create multiple materialized views, each focusing on a specific sales metric. Build the dashboard using these views.
- **D. Create a single Explore with all sales metrics. Build the dashboard using this Explore.**

**Answer: D**

#### NEW QUESTION # 23

You are a data analyst working with sensitive customer data in BigQuery. You need to ensure that only authorized personnel within your organization can query this data, while following the principle of least privilege. What should you do?

- A. Update dataset privileges by using the SQL GRANT statement.
- B. Encrypt the data by using customer-managed encryption keys (CMEK).
- C. Export the data to Cloud Storage, and use signed URLs to authorize access.
- **D. Enable access control by using IAM roles.**

**Answer: D**

#### NEW QUESTION # 24

Your company's customer support audio files are stored in a Cloud Storage bucket. You plan to analyze the audio files' metadata and file content within BigQuery to create inference by using BigQuery ML. You need to create a corresponding table in BigQuery that represents the bucket containing the audio files. What should you do?

- **A. Create an object table.**
- B. Create a native table.
- C. Create an external table.
- D. Create a temporary table.

**Answer: A**

#### NEW QUESTION # 25

Your organization is conducting analysis on regional sales metrics. Data from each regional sales team is stored as separate tables in BigQuery and updated monthly. You need to create a solution that identifies the top three regions with the highest monthly sales for the next three months. You want the solution to automatically provide up-to-date results. What should you do?

- **A. Create a BigQuery materialized view that performs a union across all of the regional sales tables. Use the rank() window function to query the new materialized view.**
- B. Create a BigQuery table that performs a union across all of the regional sales tables. Use the row\_number() window function to query the new table.
- C. Create a BigQuery materialized view that performs a cross join across all of the regional sales tables. Use the row\_number() window function to query the new materialized view.
- D. Create a BigQuery table that performs a cross join across all of the regional sales tables. Use the rank() window function to query the new table.

**Answer: A**

#### NEW QUESTION # 26

You are developing a data ingestion pipeline to load small CSV files into BigQuery from Cloud Storage. You want to load these files upon arrival to minimize data latency. You want to accomplish this with minimal cost and maintenance. What should you do?

- A. Create a Cloud Composer pipeline to load new files from Cloud Storage to BigQuery and schedule it to run every 10 minutes.
- **B. Create a Cloud Run function to load the data into BigQuery that is triggered when data arrives in Cloud Storage.**

- C. Use the bq command-line tool within a Cloud Shell instance to load the data into BigQuery.
- D. Create a Dataproc cluster to pull CSV files from Cloud Storage, process them using Spark, and write the results to BigQuery.

**Answer: B**

## NEW QUESTION # 27

.....

You can now get Google ADP exam certification our FreeDumps have the full version of Google ADP exam. You do not need to look around for the latest Google ADP training materials, because you have to find the best Google ADP Training Materials.
