Pass Guaranteed 2026 C_ACDET_2506: SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Perfect Valid Dumps Free

The SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) exam preparation material is available in three different formats for the customers. The formats are PDF format, web-based software, and SAP C_ACDET_2506 desktop practice exam software. The portable PDF format means customers can access real SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) exam questions on their smartphones, tablets, and laptops. The PDF format can be printed and customers can also make proper C_ACDET_2506 exam notes.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q15-Q20):

NEW QUESTION # 15
What does ? represent in the ariba expression below? HierarchicalType=="SubAgreement" ? false: true

- A. if
- B. replace
- C. else
- D. then

Answer: D

NEW QUESTION # 16
Which of the following languages is used to define defaults on fields within Ariba?

- A. Javascript
- B. Ariba expression language
- C. ABAP
- D. Python programming language

Answer: B

NEW QUESTION # 17
What actions can typically be performed on existing fields? (Select 3 correct answers)

- A. Change the field type
- B. Change the internal name
- C. Add a Visibility, Editability, or Validity Condition
- D. Make the field mandatory
- E. Change the help tip

Answer: C,D,E

Explanation:
In SAP Ariba, existing fields can be made mandatory by setting the Required property, help tips can be edited to clarify field usage, and visibility, editability, and validity conditions can be added or modified to control when and how fields appear or accept values. However, the internal field name is immutable once the field is created, and the field data type cannot be changed post-creation. These restrictions ensure system consistency and prevent data corruption. These limitations are well documented in SAP Ariba configuration best practices.

NEW QUESTION # 18
When preparing to load legacy contracts during a Bluefield deployment in SAP Ariba Contracts, which of the following actions are required to ensure a successful migration?

- A. Skip the legacy contract upload step if the Production site already contains migrated Flex Master Data Templates.
- B. Create a new customized contract upload process specifically for Bluefield deployments to accommodate differences in site structure.
- C. Use the exact same process and tools as used in the Greenfield migration scenario to upload legacy contracts.
- D. Manually enter legacy contract data into SAP Ariba Contracts using the application's Ul instead of using import tools.

Answer: C

NEW QUESTION # 19
Which read-only files show the key and English translations for custom field labels and helptips?

- A. The JSON files that can be exported through ICM
- B. The JSON files that can be exported through AML & Translations Upload
- C. The customerResource files that can be exported through AML & Translations Upload
- D. The customerResource files that can be exported through ICM

Answer: B

Explanation:
SAP Ariba stores translations for custom field labels and help tips inJSON files exported and imported via AML (Advanced Metadata List) & Translations Upload. These JSON files contain key-value pairs representing the translation keys and their English or localized strings. This mechanism supports language management and bulk updates of translated content.
ICM exports configuration bundles but does not handle translation files in JSON format. CustomerResource files are not the standard format for translation export/import.
Using AML & Translations Upload allows administrators to maintain and update translations across multiple languages efficiently, ensuring consistent user experience in multi-lingual deployments.

NEW QUESTION # 20
