Juniper JN0-232 Reliable Guide Files - Passing JN0-232 Score Feedback

But our company can provide the anecdote for you--our JN0-232 study materials. Under the guidance of our JN0-232 exam practice, you can definitely pass the exam as well as getting the related certification with the minimum time and efforts. We would like to extend our sincere appreciation for you to browse our website, and we will never let you down. The advantages of our JN0-232 Guide materials are more than you can imagine. Just rush to buy our JN0-232 practice braindumps!

Juniper Security, Associate (JNCIA-SEC) Sample Questions (Q66-Q71):

NEW QUESTION # 66

What is transit traffic in the Junos OS?

- A. It is traffic that is processed by the control plane.
- B. It is traffic that requires special handling by the Routing Engine.
- C. It is traffic that is rate-limited to prevent denial-of-service attacks.
- **D. It is traffic that is processed solely through the forwarding plane.**

Answer: D

Explanation:

In Junos OS, traffic is classified into three main categories:

* Transit traffic:

* Defined as traffic that enters one interface and exits another interface.

* It is handled entirely in the forwarding plane (Packet Forwarding Engine).

* Example: User data packets moving between trust and untrust zones.

* Correct #Option A.

* Exception traffic:

* Traffic requiring processing by the Routing Engine (control plane), such as routing updates or management traffic.

* Matches Option C/D, but that is not transit traffic.

* Control traffic:

* Management or routing-related, handled by the control plane.

* Rate-limiting (Option B):

* This applies specifically to exception traffic to protect the Routing Engine, not to transit traffic.

Correct Statement: Transit traffic is traffic that is processed solely through the forwarding plane.

Reference: Juniper Networks - Traffic Types (Transit, Exception, Control), Junos OS Security Fundamentals.

NEW QUESTION # 67

In J-Web, the management and loopback address configuration option allows you to configure which area?

- A. the IP address of the Network Time Protocol server
- B. the CIDR address
- C. the IP address of the primary Gigabit Ethernet port
- **D. the IP address of the device management port**

Answer: D

Explanation:

J-Web is a web-based interface for configuring and managing Juniper devices. The management and loopback address configuration option in J-Web allows you to configure the IP address of the device management port, which is used to remotely access and manage the device.

NEW QUESTION # 68

Referring to the exhibit, which two statements are correct? (Choose two.)

□

- A. Traffic does not match this NAT rule.
- **B. This is the first NAT rule in the rule set.**
- C. Only traffic that matches the default route matches this NAT rule.
- **D. All traffic that ingresses the trust security zone and egresses the untrust security zone matches this NAT rule.**

Answer: B,D

Explanation:

The rule matches all source addresses (0.0.0.0 - 255.255.255.255) from the Trust zone to the Untrust zone, so all traffic going from Trust to Untrust is eligible for this source NAT rule.

The field Rule position : 1 indicates that this is the first NAT rule in the source-NAT rule set.

NEW QUESTION # 69

Which two statements are correct about IPsec security associations? (Choose two.)

- A. IPsec security associations are bidirectional.
- **B. IPsec security associations are unidirectional.**
- C. IPsec security associations are established during IKE Phase 1 negotiations.
- **D. IPsec security associations are established during IKE Phase 2 negotiations.**

Answer: B,D

Explanation:

A security association (SA) is a unidirectional agreement between the VPN participants regarding the methods and parameters to use in securing a communication channel. Full bidirectional communication requires at least two SAs, one for each direction.

An IPsec tunnel consists of a pair of unidirectional SAs—one SA for each direction of the tunnel— that specify the security parameter index (SPI), destination IP address, and security protocol (Authentication Header [AH] or Encapsulating Security Payload [ESP]) employed.

NEW QUESTION # 70

What are two system-defined zones created on the SRX Series Firewalls? (Choose two.)

- A. DMZ
- **B. null**
- C. management
- **D. junos-host**

Answer: B,D

Explanation:

junos-host is a system-defined zone that represents traffic destined to or from the SRX device itself (host traffic).

null is another system-defined zone used for interfaces not assigned to any user-defined security zone; traffic entering interfaces in the null zone is automatically dropped.

NEW QUESTION # 71

.....

In today's fast-paced world, having access to Security, Associate (JNCIA-SEC) (JN0-232) study material on the go is important. Dumps4PDF Security, Associate (JNCIA-SEC) (JN0-232) PDF questions are compatible with all smart devices, allowing you to study and prepare for the JN0-232 Exam whenever and wherever you choose. Since you can access real Juniper JN0-232 dumps in PDF from your smartphone or tablet, you can easily fit JN0-232 exam preparation into your busy schedule.

JN0-232 Reliable Guide Files: <https://www.dumps4pdf.com/JN0-232-valid-braindumps.html>

To save you from these losses, Dumps4PDF has a collection of actual and updated JN0-232 Exam Questions, On the one hand, JN0-232 Reliable Guide Files - Security, Associate (JNCIA-SEC) test torrent is revised and updated according to the changes in the syllabus and the latest developments in theory and practice, Now you do not need to worry about the relevancy and top standard of Dumps4PDF Security, Associate (JNCIA-SEC) in JN0-232 exam questions, To test out the JN0-232 study material, you can download a free Juniper JN0-232 demo from Dumps4PDF.

If the active link fails or the error count threshold is exceeded, the JN0-232 Reliable Guide Files interface with the next highest priority is activated, We were paid for our hours and I just really liked what I was doing, she said.
