You may be taken up with all kind of affairs, so you have little time for studying on our PK0-005 Exam Braindumps. But we can claim that our PK0-005 practice engine is high-effective, as long as you study for 20 to 30 hours, you will be able to pass the exam.

### CompTIA Project+ Certification Exam Sample Questions (Q327-Q332):

#### NEW QUESTION # 327

A project manager was just assigned to a new project. Which of the following activities should the project manager undertake after accepting the project? (Select TWO).

- A. Review the resource pool.
- B. Develop a preliminary scope.
- C. Review the detailed plan.
- D. Develop a project management plan.
- E. Develop a transition plan.
- F. Review the project objectives.

**Answer: A,F**

Explanation:

Review the resource pool and review the project objectives are activities that the project manager should undertake after accepting a new project. Reviewing the resource pool involves identifying and evaluating the availability, skills, and competencies of the human and material resources that are needed for the project. Reviewing the project objectives involves understanding and clarifying the expected outcomes and benefits of the project and how they align with the organizational strategy and stakeholder expectations. These activities can help to plan and execute the project effectively and efficiently.

#### NEW QUESTION # 328

During a complex, multiyear project, a PM must discern which project tasks overlap so resources can be allocated appropriately. Which of the following is best for determining this information?

- A. Budget burndown chart
- B. Milestone chart
- C. Gantt chart
- D. PERT chart

**Answer: C**

Explanation:

A Gantt chart is a visual tool used in project management to represent the timing of tasks required to complete a project. It is particularly useful for showing the start and finish dates of elements of a project, dependencies between tasks, and the current schedule status. This makes it an ideal choice for a project manager to discern overlapping tasks and allocate resources efficiently. References = CompTIA Project+ Certification Study Guide (PK0-005)

#### NEW QUESTION # 329

Which of the following best represents an intellectual property breach?

- A. Internal developers use code from a legacy in-house system to develop a new solution for the marketing department.
- B. Customer data is stored on a shared network drive that is accessible by employees from all departments.

- C. A service provider that worked on a project uses the developed software on a project for a new customer.
- D. The price list to end customers was stored on a stolen external hard drive.

**Answer: C**

Explanation:

An intellectual property (IP) breach occurs when proprietary information, such as software, designs, or trade secrets, is used without authorization. In this scenario, a service provider reusing developed software for another customer constitutes an IP breach, as the software is typically owned by the company that commissioned its development.

The CompTIA Project+ PK0-005 exam objectives, under Domain 3.4: Explain the importance of project compliance, emphasize the significance of protecting intellectual property and ensuring that all project outputs are used in accordance with contractual agreements and legal standards.

### NEW QUESTION # 330

Which of the following is a quality assurance tool?

- A. Assessing skill gaps
- B. Identifying the root cause analysis
- C. Assessing employee efficiency
- D. Defining project goals

**Answer: B**

Explanation:

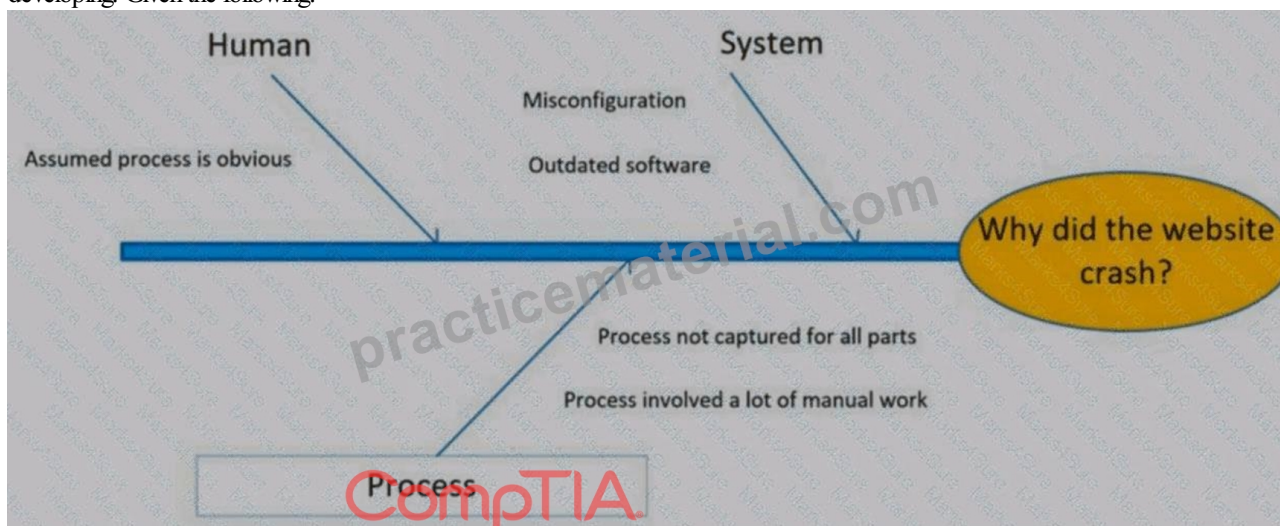

Explanation

Identifying the root cause analysis. Identifying the root cause analysis is a quality assurance tool that can help to find and eliminate the underlying causes of quality problems or defects. Root cause analysis is a systematic process of asking why a problem occurred and tracing it back to its source. Root cause analysis can help to prevent recurrence of the same or similar problems, improve quality performance, and reduce costs and risks.

2

### NEW QUESTION # 331

During a brainstorming session, a project team is elaborating on what caused the unexpected crash of the website that the team was developing. Given the following:

Which of the following was the initial cause of the issue?

- A. Lack of infrastructure
- B. Incorrect configuration
- C. Inadequate memory
- D. Inadequate instructions

**Answer: B**

Explanation:

Incorrect configuration was the initial cause of the issue that caused the unexpected crash of the website that the team was developing. The diagram given is an example of a fishbone diagram or a cause-and-effect diagram that shows the possible causes of a problem or effect. The diagram has four main categories: people, process, technology, and environment. Each category has subcategories that list specific factors that may contribute to the problem or effect. The diagram shows that incorrect configuration under technology was marked as an initial cause of website crash.

**NEW QUESTION # 332**

• • • • •

The CompTIA sector is an ever-evolving and rapidly growing industry that is crucial in shaping our lives today. With the growing demand for skilled CompTIA professionals, obtaining CompTIA Project+ Certification Exam (PK0-005) certification exam has become increasingly important for those who are looking to advance their careers and stay competitive in the job market.
