SAP C-WME-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.

Topic 2	• Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.
Topic 3	• Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.

SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q46-Q51):

NEW QUESTION # 46
Why is it recommended to disable the multi-language Manual Toggle when using the multi-language Auto- Toggle?

- A. Because the Manual Toggle and Auto-Toggle can cause the page to refresh unexpectedly
- B. Because Manual Toggle consumes more resources than Auto-Toggle
- C. To prevent conflicts where the user's Manual Toggle choice overrides the Auto-Toggle settings
- D. To ensure that the Manual Toggle is only available for administrators

Answer: C

NEW QUESTION # 47
A brokerage firm is interested in implementing WalkMe to address an issue their customers face when transferring money from their online accounts to their banks. They have heard that users do not know where to go on the platform to complete this, but once they reach the appropriate page, they know how to fill out the forms correctly without errors. Of the listed WalkMe apps, which would best address the issue?

- A. ShoutOut to announce that this must be completed
- B. SmartTips on the fields of the page
- C. Resource to explain how to complete all parts of the process
- D. Shuttle to bring the user to the page

Answer: D

Explanation:
The issue described is that users struggle to navigate to the correct page for transferring money, but once there, they can complete the forms without errors. A Shuttle is the most appropriate WalkMe solution, as it directly addresses navigation challenges by guiding users from any page to the specific target page (e.g., the money transfer page) via a clickable link or button. Shuttles are designed to simplify navigation, making them ideal for this use case where the primary pain point is finding the right page.

The other options are less suitable:
* Resource(A) provides detailed instructions, but the issue is navigation, not understanding the process.
* SmartTips(C) offer field-level guidance, which is unnecessary since users already know how to fill out the forms.
* ShoutOut(D) is for announcements and doesn't directly solve the navigation problem.
Extract from Official WalkMe Documentation:
According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.7: Shuttles):
"Shuttles are designed to guide users to a specific page or section of an application, addressing navigation challenges by providing a direct path to the target location." The courseGetting Started with Building WalkMe Solutionsstates:
"For scenarios where users struggle to find the correct page, such as initiating a process like a money transfer, a Shuttle is the most effective tool to direct them to the destination." Option B, a Shuttle, best addresses the navigation issue.

NEW QUESTION # 48
Your company just provided you with the new company logo that they want you to use in all of your WalkMe deployables. Where is the best place to store the logo?

- A. WalkMe Admin Center
- B. Engaged Elements
- C. The Asset Library
- D. Local Settings

Answer: C

Explanation:
The WalkMe Asset Library is the centralized repository for storing and managing reusable assets, such as images, videos, and other media files, used across WalkMe deployables (e.g., Smart Walk-Thrus, ShoutOuts, Launchers). Storing the company logo in the Asset Library ensures it is easily accessible for consistent use across all WalkMe content, supports version control, and allows for efficient updates if the logo changes. This approach aligns with WalkMe's best practices for asset management, as it promotes scalability and maintainability.
The other options are not suitable for storing a logo:
* WalkMe Admin Centeris used for account management, user permissions, and configuration settings, not for storing media assets.
* Local Settingsare specific to individual WalkMe items or environments and are not designed for centralized asset storage.
* Engaged Elementsrefers to UI elements targeted by WalkMe for interaction, not a storage location for assets.
Extract from Official WalkMe Documentation:
Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.4:
Asset Management):
"The Asset Library is a centralized hub within the WalkMe Editor where Builders can upload and manage images, videos, and other media files. Assets stored here can be reused across multiple deployables, ensuring consistency and simplifying updates." The courseAdvancing Your Skills in Building WalkMe Solutionsfurther states:
"To maintain brand consistency, store commonly used assets like logos in the Asset Library. This allows Builders to apply the same asset across ShoutOuts, SmartTips, and other content types without redundant uploads." Thus, option A, "The Asset Library," is the best place to store the company logo for use in WalkMe deployables.
