DumpsActual CV0-004 questions are the best option.

CompTIA Cloud+ (CV0-004) Certification Exam Sample Questions (Q158-Q163):

NEW QUESTION # 158

An organization is working to become compliant with industry regulations. An administrator needs to amend the organization's existing log policy so that logs are available during the period in which the organization is audited. Which of the following should the administrator implement?

- A. Log tracing
- B. Log aggregation
- C. Log retention
- D. Log collection

Answer: C

Explanation:

Log retention ensures logs are stored and preserved for a defined period, meeting compliance requirements and guaranteeing availability during audits.

NEW QUESTION # 159

Which of the following is the focus of DevSecOps?

- A. Developing, testing, and maintaining software
- B. Developing, maintaining, and securing software
- C. Securing, testing, and maintaining new software
- D. Developing, securing, and testing software

Answer: D

Explanation:

DevSecOps integrates security controls early in the development lifecycle. Its focus is to develop, secure, and test continuously, ensuring that vulnerabilities are identified and addressed before deployment. Security is not bolted on later but woven into development and testing workflows.

NEW QUESTION # 160

A company wants to implement a work environment that will have low operational overhead and highly accessible enterprise resource planning, email, and data resources. Which of the following cloud service models should the company implement?

- A. IaaS
- B. DBaaS
- C. PaaS
- D. SaaS

Answer: D

Explanation:

A company that requires low operational overhead and highly accessible enterprise resources would benefit from implementing Software as a Service (SaaS). SaaS provides access to applications hosted in the cloud, eliminating the need for internal infrastructure or application development, which aligns with the requirement of having low operational overhead. Reference: CompTIA Cloud+ Study Guide (Exam CV0-004) by Todd Montgomery and Stephen Olson

NEW QUESTION # 161

A CI/CD pipeline is used to deploy VMs to an IaaS environment. Which of the following can be used to harden the operating system once the VM is running?

- A. Docker
- B. Kubernetes

- C. Git
- **D. Ansible**

Answer: D

Explanation:

Ansible can be used to harden the operating system once the VM is running. It is an automation tool that can configure systems, deploy software, and orchestrate more advanced IT tasks such as continuous deployments or zero downtime rolling updates.

Ansible and other configuration management tools are part of the cloud management strategies discussed in the CompTIA Cloud+ certification material.

NEW QUESTION # 162

A software engineer needs to transfer data over the internet using programmatic access while also being able to query the data. Which of the following will best help the engineer to complete this task?

- A. Web sockets
- B. SQL
- C. RPC
- **D. GraphQL**

Answer: D

Explanation:

GraphQL is a query language for APIs that allows clients to request specific data from a server and enables efficient data transfer over the internet. It's designed for programmatic access to data and allows clients to define the structure of the response they need, which is ideal for querying data as mentioned in the question.

NEW QUESTION # 163

.....

It is known to us that more and more companies start to pay high attention to the CV0-004 certification of the candidates. Because these leaders of company have difficulty in having a deep understanding of these candidates, may it is the best and fast way for all leaders to choose the excellent workers for their company by the CV0-004 Certification that the candidates have gained.
