# Valid NCP-DB-6.10 Test Topics, NCP-DB-6.10 Latest Dumps Sheet

Our NCP-DB-6.10 study question contains a lot of useful and helpful knowledge which can help you find a good job and be promoted quickly. Our NCP-DB-6.10 test pdf is compiled by the senior experts elaborately and we update them frequently to follow the trend of the times. Before you decide to buy our study materials, you can firstly look at the introduction of our NCP-DB-6.10 Exam Practice materials on our web. Or you can free download the demo of our NCP-DB-6.10 exam questions to have a check on the quality.

In today's technological world, more and more students are taking the Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) exam online. While this can be a convenient way to take an Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) exam dumps, it can also be stressful. Luckily, PracticeMaterial's best Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) exam questions can help you prepare for your Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) certification exam and reduce your stress.

NCP-DB-6.10 Latest Dumps Sheet - Regualer NCP-DB-6.10 Update

If you are ready for the exam for a long time, but lack of a set of suitable NCP-DB-6.10 learning materials, I will tell you that you are so lucky to enter this page. We are such NCP-DB-6.10 exam questions that you can use our products to prepare the exam and obtain your dreamed NCP-DB-6.10 certificates. We all know that if you desire a better job post, you have to be equipped with appropriate professional quality and an attitude of keeping forging ahead. Our NCP-DB-6.10 exam questions will be your best ally to get what you wanted.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q13-Q18):

NEW QUESTION # 13

Which action must an administrator take in Era Networks before using Era to provision a MSSQL AG cluster?

- A. A private network must be configured in Era for the heartbeat traffic.
- B. A that has a static pool managed by Era must be configured.
- C. A network that has a DHCP pool must be configured in Era.
- D. A network in each data center must be configured for Era.

Answer: A

Explanation:
According to the Nutanix Database Automation (NCP-DB) learning documents, before using Era to provision a MSSQL AG cluster, an administrator must configure a private network in Era for the heartbeat traffic. This is because the heartbeat traffic is crucial for maintaining the health and status of the MSSQL AG cluster. The heartbeat traffic is used by the nodes in the cluster to communicate with each other and check the status of the other nodes. If a node does not receive a heartbeat from another node within a certain time frame, it assumes that the other node has failed and takes appropriate action.

NEW QUESTION # 14
An administrator has deployed an NDB HA setup. An electrical maintenance window needs to be planned and the clusters where NDB is deployed must be powered off. After shutting down the load balancer server, what should the administrator do next?

- A. Run the high-availability list command.
- B. Shutdown the API standby node.
- C. Shutdown the API leader node.
- D. In the sudo systemctl stop patroni command.

Answer: B

Explanation:
In an NDB HA (High Availability) setup, when planning an electrical maintenance window requiring the clusters hosting NDB to be powered off, the administrator must follow a controlled shutdown sequence to preserve data integrity and minimize disruption. After shutting down the load balancer server (HAProxy), the next step is to shut down the API standby node. In an NDB HA configuration, the API leader node handles active operations, while the standby node provides redundancy. Shutting down the standby node first ensures the leader remains operational, allowing ongoing management tasks to continue until the final shutdown of the leader node.

NEW QUESTION # 15
An administrator needs to provision a 3-node MSSQL Server AG with the following configuration:
- Two database server VMS including the primary replica on a local site
- A third database server VM on a remote site
How many IP addresses will the network at each site require?

- A. 2 Cluster VIP and 1 listener IP on the local site
- B. 1 Cluster VIP and 1 listener IP on the remote site
  2 IPs in the local site and 1 on the remote site for the database server nodes
  1 Cluster VIP on the local site
  1 Cluster VIP and 1 Listener IP on the remote site
  2 IPs in the local site and 1 on the remote site for the database server nodes
- C. 1 Cluster VIP end I Listener IP on the local site
  1 Listener IP on the local site
  2 IPs in the local site and I on the remote site for the database server nodes
- D. 1 Cluster VIP end I Listener IP on the local site
  1 Cluster VIP and 1 Listener IP on the remote site
  2 IPs in the local site and 1 on the remote site for the database server nodes

Answer: D

Explanation:
When setting up a 3-node MSSQL Server AG with two database server VMs on a local site and a third database server VM on a remote site, the network at each site will require the following IP addresses:

1 Cluster VIP and 1 Listener IP on the local site.
1 Cluster VIP and 1 Listener IP on the remote site.
2 IPs in the local site and 1 on the remote site for the database server nodes.
This configuration ensures that each node in the cluster has a unique IP address, and each cluster and listener also has a unique IP address. This is necessary for the proper functioning of the cluster and to ensure that all nodes can communicate with each other and with clients.

NEW QUESTION # 16
Before registering a SQL Server VM with NDB, an administrator must first verify what is enabled?

- **A. Remote Management (WinRM)**
- B. Remote Desktop (RDP)
- C. Windows PowerShell
- D. Secure Shell (SSH)

Answer: A

Explanation:
Before registering a SQL Server VM with Nutanix Database Service (NDB), the administrator must ensure that the VM is configured to allow NDB to communicate with and manage it. For SQL Server VMs running on Windows, NDB relies on Windows Remote Management (WinRM) to facilitate remote administration, discovery, and management tasks. WinRM is a Microsoft protocol that enables secure communication between the NDB control plane and the Windows-based database server VM. It must be enabled and properly configured (e.g., with HTTP or HTTPS listeners and appropriate firewall rules) to allow NDB to register the VM and perform operations like provisioning, patching, or cloning.

NEW QUESTION # 17
An administrator is experiencing issues with NDB and some of its operations. A case has been logged with Nutanix Support and a request has been made to gather a diagnostics bundle. Where are two valid places to generate and download a diagnostics bundle? (Choose two.)

- A. Prism Central GUI
- **B. NDB GUI**
- **C. NDB CLI**
- D. Prism Element GUI

Answer: B,C

Explanation:
When an administrator experiences issues with NDB and Nutanix Support requests a diagnostics bundle, it can be generated from two valid locations. The NDB GUI provides an option under the administration or support section to create and download the bundle, offering a user-friendly interface. Alternatively, the NDB CLI allows generation via specific commands (e.g., era diagnostics collect), providing a scriptable approach. Both methods are supported for troubleshooting and support purposes.

NEW QUESTION # 18
......

Therefore, you must prepare as per the changes of the Nutanix NCP-DB-6.10 real test. For your assistance, PracticeMaterial offers free real Nutanix NCP-DB-6.10 dumps updates if Nutanix Certification Exams changes the NCP-DB-6.10 examination content within 365 days of your purchase. These free NCP-DB-6.10 dumps updates will prevent you from mental stress, wasting time, and losing money.

NCP-DB-6.10 Latest Dumps Sheet: https://www.practicematerial.com/NCP-DB-6.10-exam-materials.html

You can get success in the NCP-DB-6.10 exam on first attempt and save your resources with the help of updated exam questions, Nutanix Valid NCP-DB-6.10 Test Topics Preparing the Test initiative, Nutanix Valid NCP-DB-6.10 Test Topics As an IT professional, it has become extremely important to have certifications in your resume, Nutanix NCP-DB-6.10 Nutanix Certified Professional (NCP) from BrainDump's latest lab scenarios and Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (Nutanix Certified Professional (NCP)) from PracticeMaterial audio training online are going to give you maximum guidance

and support and then your wishes will get fulfilled in the smart manner o PracticeMaterial can sort out your preparation in the most reliable manner for the Nutanix NCP-DB-6.10 audio training online due to its great helping tools like latest Nutanix NCP-DB-6.10 Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (Nutanix Certified Professional (NCP)) from Braindump audio guide and online NCP-DB-6.10 Nutanix Nutanix Certified Professional (NCP) testing engine and both these tools are made to carry forward your preparation easily and effective for the exam.

Client input is the foundation on which successful websites are Regualer NCP-DB-6.10 Update built, But based on what we know today, its likely the Trump administration is going to be very gig economy friendly.

You can get success in the NCP-DB-6.10 Exam on first attempt and save your resources with the help of updated exam questions, Preparing the Test initiative, As an IT professional, NCP-DB-6.10 it has become extremely important to have certifications in your resume.
