

New Exam NetSec-Pro Materials & Exam NetSec-Pro Dumps

2026 Latest Braindumpsqa NetSec-Pro PDF Dumps and NetSec-Pro Exam Engine Free Share: <https://drive.google.com/open?id=1lgT-VkO4YTQJqPq3Loz58gN9ddm0qkWn>

Are you looking for valid IT exam materials or study guide? You can try our free Palo Alto Networks NetSec-Pro new exam collection materials. We offer free demo download for our PDF version. You can know several questions of the real test. It can make you master fundamental knowledge quickly. Our NetSec-Pro new exam collection materials are authorized legal products. Our accuracy is nearly 100% pass which will help you clear exam.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.
Topic 2	<ul style="list-style-type: none"> NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.

Topic 3	<ul style="list-style-type: none"> • Network Security Fundamentals: This section of the exam measures skills of network security engineers and covers key concepts such as application layer inspection for Strata and SASE products, differentiating between slow and fast path packet inspection, and the use of decryption methods including SSL Forward Proxy, SSL Inbound Inspection, SSH Proxy, and scenarios where no decryption is applied. It also includes applying network hardening techniques like Content-ID, Zero Trust principles, User-ID (including Cloud Identity Engine), Device-ID, and network zoning to enhance security on Strata and SASE platforms.

New Exam NetSec-Pro Materials - Palo Alto Networks Network Security Professional Realistic Exam Dumps Pass Guaranteed Quiz

Why we are ahead of the other sites in the IT training industry? Because the information we provide have a wider coverage, higher quality, and the accuracy is also higher. So Braindumpsqa is not only the best choice for you to participate in the Palo Alto Networks Certification NetSec-Pro Exam, but also the best protection for your success.

Palo Alto Networks Network Security Professional Sample Questions (Q46-Q51):

NEW QUESTION # 46

What key capability distinguishes Content-ID technology from conventional network security approaches?

- A. It provides single-pass application layer inspection for real-time threat prevention.
- B. It exclusively monitors network traffic volumes.
- C. It performs packet header analysis short of deep packet inspection.
- D. It relies primarily on reputation-based filtering.

Answer: A

Explanation:

Content-ID is the core of Palo Alto Networks' prevention architecture, providing single-pass application layer inspection to deliver real-time threat prevention across all traffic.

"Content-ID uses a single-pass architecture to perform application-layer (Layer 7) traffic inspection and real-time threat prevention. Unlike traditional firewalls that rely on multiple scans, Content-ID inspects traffic once to enforce multiple security controls simultaneously." (Source: Content-ID Overview) By consolidating security functions in a single pass, it ensures both efficiency and comprehensive security.

NEW QUESTION # 47

A network security engineer has created a Security policy in Prisma Access that includes a negated region in the source address. Which configuration will ensure there is no connectivity loss due to the negated region?

- A. Create a Security policy for the negated region with destination address "any".
- B. Add all regions that contain private IP addresses to the source address.
- C. Add a Dynamic Application Group to the Security policy.
- D. Set the service to be application-default.

Answer: A

Explanation:

Negated source addresses exclude traffic from the specified region. To avoid accidental connectivity loss for traffic from that region, create a separate Security policy to explicitly permit it.

When you use a negated region in a Security policy rule, ensure to create an additional Security policy to permit traffic from the excluded (negated) region to avoid unintentional drops.

NEW QUESTION # 48

How does Strata Logging Service help resolve ever-increasing log retention needs for a company using Prisma Access?

- A. It increases resilience due to decentralized collection and storage of logs.
- **B. It can scale to meet the capacity needs of new locations as business grows.**
- C. Automatic selection of physical data storage regions decreases adoption time.
- D. Log traffic using the licensed bandwidth purchased for Prisma Access reduces overhead.

Answer: B

Explanation:

The Strata Logging Service offers scalable log storage to accommodate data growth, which ensures organizations can retain logs for compliance and threat hunting as their environments expand.

"The Strata Logging Service is designed to scale dynamically to accommodate growing log retention needs, allowing enterprises to maintain comprehensive visibility as they expand their network footprint." (Source: Strata Logging Service Overview)

NEW QUESTION # 49

Which GlobalProtect configuration is recommended for granular security enforcement of remote user device posture?

- A. Configuring a rule that blocks the ability of users to disable GlobalProtect while accessing internal applications
- B. Applying log at session end to all GlobalProtect Security policies
- C. Implementing multi-factor authentication (MFA) for all users attempting to access internal applications
- **D. Configuring host information profile (HIP) checks for all mobile users**

Answer: D

Explanation:

Host Information Profile (HIP) checks are used in GlobalProtect to collect and evaluate endpoint posture (OS, patch level, AV status) to enforce granular security policies for remote users.

"The HIP feature collects information about the host and can be used in security policies to enforce posture-based access control. This ensures only compliant endpoints can access sensitive resources." (Source: GlobalProtect HIP Checks) This enables fine-grained, context-aware access decisions beyond user identity alone.

NEW QUESTION # 50

Which functionality does an NGFW use to determine whether new session setups are legitimate or illegitimate?

- A. SYN bit
- B. SYN flood protection
- **C. SYN cookies**
- D. Random Early Detection (RED)

Answer: C

Explanation:

To prevent SYN flood attacks, the NGFW uses SYN cookies to validate legitimate session establishment.

SYN cookies allow the firewall to verify the legitimacy of new session requests without allocating resources until the handshake is completed. This prevents SYN flood attacks from exhausting system resources.

SYN cookies mitigate resource exhaustion by ensuring only legitimate connections are established.

NEW QUESTION # 51

.....

You can use this NetSec-Pro practice exam software to test and enhance your Palo Alto Networks Network Security Professional (NetSec-Pro) exam preparation. Your practice will be made easier by having the option to customize the NetSec-Pro Exam Dumps. The fact that it runs without an active internet connection is an incredible comfort for users who don't have access to the internet all the time.
